## COMMENTS:

Big River's operating Plan post Century & Alcom should be established prior to their requesting any rate increase. This operating plan would need to be reviewed by expert non biased panel to determine that it is the lowest cost operating plan which may require shuttering 1-2 facilities.

The proposed rate increased will cause undue financial burdens on fixed income families & marginally profitable businesses that may close causing additional economic hardships to the remaining businesses. There should be concern of a domino effect of families leaving the area as businesses close due to the 30+ % rate increases.
