Subject: comments in case number 2012-00535 - Big Rivers Electric Corp. rates
Attachments: last aarp.pdf

Dear AARP:

We have received the attached e-mails, and a large number of identical e-mails, with regard to the above-referenced case.

The PSC's normal practice is to respond individually to such comments. In this instance, due to the large number of identical comments sent by AARP on behalf of individuals, we are responding to AARP acting on behalf of its members.

Therefore, this e-mail will serve as an acknowledgement of all of the comments received via AARP and notice that they will be placed into the record of the case for the Commission's consideration.

You should be aware that the record in this matter is now closed, as the hearing in the case concluded on July 3. Therefore, any further comments received will not be placed into the case file.

We thank you and your members for your interest in this matter.

Chairman David L. Armstrong
211 Sower Boulevard
Frankfort, KY 40601

Dear Chairman Armstrong,

I simply can't afford a rate increase from Big Rivers Corporation, especially in these tough economic times. I'm concerned about the steep cost of utilities and especially for our older citizens.

I believe that this proposed rate increase hurts all electric utility customers, but particularly residential electric customers, including those on fixed and limited incomes.

Too often, low-income older people must choose between risking their health and nutrition by cutting back on energy expenditures and reducing spending for other basic necessities. We need to ensure that older consumers are not caught between paying their next electric bill and taking their needed medications every day or eating sufficiently.

If approved by the Kentucky Public Service Commission, the increase would raise the typical monthly residential bill by 19%. That's about a \$22 increase in the average monthly residential electric bill, almost \$264 more a year.

Utility companies should only be able to charge what is fair and reasonable, and not a penny more. Please be the voice for our families and our communities by saying NO to higher electric rates in western Kentucky.

Thanks for your consideration, I urge you to OPPOSE Big Rivers proposed rate increase!

Sincerely,

Ms. Mary Faith Sides
2437 Homewood Ave
Paducah, KY 42003-2100

Frankfort, KY 40601

Dear Chairman Armstrong,

I simply can't afford a rate increase from Big Rivers Corporation, especially in these tough economic times. I'm concerned about the steep cost of utilities and especially for our older citizens.

I believe that this proposed rate increase hurts all electric utility customers, but particularly residential electric customers, including those on fixed and limited incomes.

Too often, low-income older people must choose between risking their health and nutrition by cutting back on energy expenditures and reducing spending for other basic necessities. We need to ensure that older consumers are not caught between paying their next electric bill and taking their needed medications every day or eating sufficiently.

If approved by the Kentucky Public Service Commission, the increase would raise the typical monthly residential bill by 19%. That's about a \$22 increase in the average monthly residential electric bill, almost \$264 more a year.

Utility companies should only be able to charge what is fair and reasonable, and not a penny more. Please be the voice for our families and our communities by saying NO to higher electric rates in western Kentucky.

Thanks for your consideration, I urge you to OPPOSE Big Rivers proposed rate increase!

Sincerely,

Mr. D P
South 9th Street
Mayfield, KY 42066

Too often, low-income older people must choose between risking their health and nutrition by cutting back on energy expenditures and reducing spending for other basic necessities. We need to ensure that older consumers are not caught between paying their next electric bill and taking their needed medications every day or eating sufficiently.

If approved by the Kentucky Public Service Commission, the increase would raise the typical monthly residential bill by 19%. That's about a \$22 increase in the average monthly residential electric bill, almost \$264 more a year.

Utility companies should only be able to charge what is fair and reasonable, and not a penny more. Please be the voice for our families and our communities by saying NO to higher electric rates in western Kentucky.

Thanks for your consideration, I urge you to OPPOSE Big Rivers proposed rate increase!

Sincerely,

Miss sue stultz

Frankfort, KY 40601

Dear Chairman Armstrong,

I simply can't afford a rate increase from Big Rivers Corporation, especially in these tough economic times. I'm concerned about the steep cost of utilities and especially for our older citizens.

I believe that this proposed rate increase hurts all electric utility customers, but particularly residential electric customers, including those on fixed and limited incomes.

Too often, low-income older people must choose between risking their health and nutrition by cutting back on energy expenditures and reducing spending for other basic necessities. We need to ensure that older consumers are not caught between paying their next electric bill and taking their needed medications every day or eating sufficiently.

Too often, low-income older people must choose between risking their health and nutrition by cutting back on energy expenditures and reducing spending for other basic necessities. We need to ensure that older consumers are not caught between paying their next electric bill and taking their needed medications every day or eating sufficiently.

If approved by the Kentucky Public Service Commission, the increase would raise the typical monthly residential bill by 19%. That's about a \$22 increase in the average monthly residential electric bill, almost \$264 more a year.

Utility companies should only be able to charge what is fair and reasonable, and not a penny more. Please be the voice for our families and our communities by saying NO to higher electric rates in western Kentucky.

Thanks for your consideration, I urge you to OPPOSE Big Rivers proposed rate increase!

Sincerely,

Mr. Rickey McIntyre
566 Faye Dr
Ledbetter, KY 42058-9512

Frankfort, KY 40601

Dear Chairman Armstrong,

I simply can't afford a rate increase from Big Rivers Corporation, especially in these tough economic times. I'm concerned about the steep cost of utilities and especially for our older citizens.

I believe that this proposed rate increase hurts all electric utility customers, but particularly residential electric customers, including those on fixed and limited incomes.
