Case No. 213-00035

To Whom It May Concern,

In my opinion the PSC should have public meetings to let the 112,000 homeowners and local business owners in the 22 counties voice their opinion for the application of Kenergy Corp for an adjustment in existing rates instead of letting Big Rivers and Century Aluminum decide what is best for the Rate Payers.

Big Rivers will have an adundance of power if the deal with Century is not worked out. That will give Big Rivers the opportunities to sell on the open market. If and when Big Rivers sells on the open market they should not be able to sell it cheaper than what it is costing Kenergy and their Rate Payers.

Last year Kenergy was granted a increase in all their present rate schedules. Currently Kenergy has applied for a Flow Through Rate from Big Rivers (Case No. 2012-00535) along with another increase in their present rate schedules. In my opinion there shouldn't be any other increase in the rate scheduled except the Flow Through Rate.

Kenergy is a board elected member company who has the option to purchase power from other electric companies. When the members change do rates change? The most important job of the board should be to do what is best for it's Rate Payers. In todays economy we cannot afford a increase like this every year.
