## APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

#### Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

# September 3, 2013

| 1  | Item 1)       | Refer to page 8 of the Direct Testimony of Mark Bailey and page 8 of the        |
|----|---------------|---|
| 2  | Direct Testim | ony of Billie Richert.  |
| 3  | a.            | Reconcile Ms. Richert's statement that BREC, with the requested rate            |
| 4  |               | increase, would be only \$633,000 above the critical threshold of a 1.10        |
| 5  |               | MFIR, with Mr. Bailey's statement that the requested increase would put         |
| 6  |               | Big Rivers \$6.1 million above the same threshold.                              |
| 7  | b.            | Confirm how large a decline in revenues below the forecasted level BREC         |
| 8  |               | could incur without needing to request an additional rate increase.             |
| 9  |               |   |
| 10 | Response)     |   |
| 11 | a.            | The Direct Testimonies are explaining different values. Ms. Richert states      |
| 12 |               | that Big Rivers will earn a 1.11 MFIR in the test period. After implementing    |
| 13 |               | the rates from the Cost of Service Study, Big Rivers will actually only achieve |
| 14 |               | a 1.11 TIER in the test period due to the pro forma adjustments. The            |
| 15 |               | difference between achieving a 1.11 TIER and a 1.10 TIER is approximately       |
| 16 |               | \$633,000 in net margins. This is what Ms. Richert is explaining in her Direct  |
| 17 |               | Testimony. Mr. Bailey in his Direct Testimony is explaining that the            |
| 18 |               | difference between a 1.24 TIER and 1.10 TIER is only about \$6.1 million.       |

Case No. 2013-00199 Response to SC 1-1 Witness: Billie J. Richert Page 1 of 2

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| ۵ | Witness) |    | Rillie I Richert   |
|---|----------|----|--|
| 8 |          |    |  |
| 7 |          |    | approximately \$633,000.   |
| 6 |          |    | revenues, all other amounts remaining unchanged, could only decline              |
| 5 |          | b. | To maintain a 1.10 MFIR versus a 1.11 MFIR in the test period, Big Rivers'       |
| 4 |          |    | of John Wolfram.   |
| 3 |          |    | The Cost of Service Study is described in greater detail in the direct testimony |
| 2 |          |    | which was the basis for the revenue requirement in the Cost of Service Study.    |
| 1 |          |    | Mr. Bailey's statement is that Big Rivers is seeking to maintain a 1.24 TIER,    |

# APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

# September 3, 2013

| 1  | Item 2)     |            | Refer to page 8 of the Direct Testimony of Mark Bailey, page 10 of the        |
|----|-------------|------------|---|
| 2  | Direct Test | time       | ony of Billie Richert, and page 11 of the Direct Testimony of Christopher     |
| 3  | Warren.     |            |   |
| 4  |             | a.         | Reconcile the statements of Mr. Bailey and Ms. Richert that Big Rivers'       |
| 5  |             |            | requested rate increase would lead to a projected TIER of 1.24 with Mr.       |
| 6  |             |            | Warren's statement that Big Rivers' projected TIER with the requested rate    |
| 7  |             |            | increase would be 1.10 in 2014, 1.11 in the fully forecasted test period, and |
| 8  |             |            | 1.22 in 2015.   |
| 9  |             | <i>b</i> . | Confirm Big Rivers' projected TIER for 2014, the projected test year, and     |
| 10 |             |            | 2015 with the requested rate increase.  |
| L1 |             | c.         | If Mr. Warren's testimony accurately identifies Big Rivers' projected TIER    |
| L2 |             |            | with the requested rate increase, identifying Big Rivers' resulting projected |
| L3 |             |            | MFIR for 2014, the projected test year, and 2015.                             |
| L4 |             |            |   |
| 15 | Response)   |            |   |
| L6 |             | a.         | Please refer to the response to SC 1-1.                                       |
| L7 |             | b.         | Big Rivers' projected TIER with the requested rate increase would be 1.10 in  |
| 8  |             |            | 2014, 1.11 in the fully forecasted test period, and 1.22 in 2015.             |

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

# September 3, 2013

| 1 | Item 3)   | Please refer to pages 9 to 10 of the Direct Testimony of Mark Bailey.     |
|---|-----------|---|
| 2 | a.        | Please confirm that prior to the Century and Alcan rate cases, the demand |
| 3 |           | charge was lower for rural customers than for large industrials; while    |
| 4 |           | under the Company's proposal in this case the reverse would be true.      |
| 5 | b.        | If so, what accounts for this change?                                     |
| 6 |           |   |
| 7 | Response) |   |
| 8 | a.        | Confirmed. See the following table.                                       |

| Time Period                   | Demand Charge (\$/kW-Month) |                  |                 |  |
|-------------------------------|-----------------------------|------------------|-----------------|--|
|                               | Rural                       | Large Industrial | Variance        |  |
| (1)                           | (2)                         | (3)              | (4) = (2) - (3) |  |
| Prior to Both Rate Cases      | 9.697                       | 10.500           | -0.803          |  |
| Filed with Century Rate  Case | 16.950                      | 12.410           | 4.540           |  |
| Filed with Alcan Rate Case    | 24.742                      | 17.979           | 6.763           |  |

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 4 | Witness) |    | John Wolfram  |
|---|----------|----|---|
| 3 |          |    |   |
| 2 |          |    | rate subsidies from the smelters to the Rural and Large Industrial rate classes |
| 1 |          | b. | The change is driven by the departure of the smelters and the elimination of    |

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

#### September 3, 2013

| 1  | Item 4)      | Please refer to pages 8 to 11 of the Direct Testimony of Billie Richert and    |
|----|--------------|--|
| 2  | Exhibit Warı | ren-3.   |
| 3  | a.           | Is it the case that the requested rates are forecasted to achieve both a       |
| 4  |              | 1.24 TIER and 1.11 MFIR, as you seem to say on p.8 and p.11?                   |
| 5  | b.           | If these two values are equivalent, please explain the gap between them        |
| 6  |              | in light of the following: The formulas on Witness Richert's Direct            |
| 7  |              | Testimony of page 11 show that TIER - MFIR = Income Tax / Interest             |
| 8  |              | Expense on Long-Term Debt. However, Exhibit Warren-3 shows that                |
| 9  |              | BREC's tax payments are less than \$1,000, while interest expense is           |
| 10 |              | more than \$43 million. This appears incompatible with TIER – MFIR =           |
| 11 |              | 0.13.  |
| 12 |              |  |
| L3 | Response)    |  |
| L4 | a.           | The requested rates are forecasted to achieve a 1.11 TIER and 1.11 MFIR        |
| 15 |              | in the forecast period. As stated in the response to SC 1-1, the basis for the |
| L6 |              | Cost of Service Study was a 1.24 TIER. After the proforma adjustments          |
| .7 |              | were made, the resulting TIER for the forecast period was 1.11.                |

## APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

#### September 3, 2013

| 1  | Item 5)   |    | Please refer to pages 10 and 12 of the Direct Testimony of Robert Berry.        |
|----|-----------|----|---|
| 2  | a         | a. | If "off-system sales will remain depressed" because MISO prices are             |
| 3  |           |    | expected to be below BREC's marginal generation costs throughout 2013           |
| 4  |           |    | and 2014, explain how it is possible that BREC's plants are routinely           |
| 5  |           |    | exceeding 90 percent dispatch rates in MISO.                                    |
| 6  | l         | ь. | For each of Big Rivers' generating units, identify the projected dispatch cost  |
| 7  |           |    | for each of the years 2014 through 2027.  |
| 8  |           |    |   |
| 9  | Response) |    |   |
| 10 | 8         | a. | Please see response to KIUC 1-49(a) for the dispatch rate of Big Rivers' units. |
| 11 |           |    | The generating units are being dispatched based on the production variable      |
| 12 |           |    | costs. Big Rivers' generating units are profitable because their production     |
| 13 |           |    | variable cost is less than the market price. The off-system sales price is      |
| 14 |           |    | causing the off-system gross sales margins to remain depressed, not             |
| 15 |           |    | necessarily the off-system sales volume.  |
| 16 | Ĭ         | b. | The projected generating unit dispatch cost (production operating cost – does   |
| 17 |           |    | not include any fixed cost) can be found in the production cost model outputs.  |
| 18 |           |    | The production cost model outputs are provided in response to AG 1-98.          |
|    |           |    |   |

| 10 | Witness)       | Robert W. Berry   |

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

#### Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1  | Item 12) |    | Refer to page 17 of the Direct Testimony of Robert Berry.                  |
|----|----------|----|--|
| 2  |          | a. | Please confirm that the contracts among Big Rivers, Kenergy, and Century   |
| 3  |          |    | that were approved by the Commission in Case No. 2013-00221 have been      |
| 4  |          |    | executed.  |
| 5  |          | b. | Has MISO determined at what Base Load Century may operate without          |
| 6  |          |    | Coleman Station being required to run for reliability purposes?            |
| 7  |          |    | i. If yes, please describe MISO's determination and produce any            |
| 8  |          |    | documents reflecting that determination.                                   |
| 9  |          |    | ii. If no, please explain why MISO has not yet provided a determination    |
| 10 |          |    | and when Big Rivers expects such a determination to be made.               |
| 11 |          | c. | Regarding the exclusion of transmission revenues from Century in the       |
| 12 |          |    | forecast test year: Under the approved agreements between Century, BREC,   |
| 13 |          |    | and Kenergy, if Century continues to operate at the same load as in recent |
| 14 |          |    | years, while buying all of its power from outside the BREC system, what    |
| 15 |          |    | level of recurring annual transmission revenues would BREC receive from    |
| 16 |          |    | Century or its suppliers?  |

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1  |          | d.  | How much transmission revenue will BREC receive if Century operates at        |
|----|----------|-----|---|
| 2  |          |     | the baseload level determined by MISO that would allow Coleman to be          |
| 3  |          |     | idled?  |
| 4  |          |     |   |
| 5  | Response | )   |   |
| 6  |          | a-b | e. Please see Big Rivers' response to PSC 2-17(b) in this instant filing.     |
| 7  |          | c.  | Utilizing rates published by MISO effective July 1, 2013 for Schedule 9 of    |
| 8  |          |     | \$15,586.7989/MW-yr and Century monthly peak loads of 482 MW, Big             |
| 9  |          |     | Rivers would expect to receive about \$7,512,837/yr in transmission revenues. |
| 10 |          | d.  | Utilizing the same rates and Century monthly peak loads equal to the base     |
| L1 |          |     | load level determined by MISO of 338 MW, Big Rivers would expect to           |
| L2 |          |     | receive about \$5,268,338/yr in transmission revenues.                        |
| L3 |          |     |   |

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

September 3, 2013

1

2 Witness) Robert W. Berry

Case No. 2013-00199 Response to SC 1-15(a-d) Witness: Robert W. Berry Page 2 of 2

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

# September 3, 2013

| 1  | Item 16)  | Refer to page 20 of the Direct Testimony of Robert Berry.                        |
|----|-----------|--|
| 2  | a.        | How much would BREC's costs be reduced if Coleman was sold or retired,           |
| 3  |           | rather than idled?   |
| 4  | b.        | How much would costs be reduced if Wilson was sold or retired, rather than       |
| 5  |           | idled?   |
| 6  |           |  |
| 7  | Response) |  |
| 8  | a.        | If Big Rivers sold Coleman Station for the net book value it would reduce its    |
| 9  |           | annual cost an additional \$16.8 Million.  |
| 10 | b.        | If Big Rivers sold Wilson Station for the net book value it would reduce its     |
| 11 |           | annual cost an additional \$39.7 Million. Because of the significant             |
| 12 |           | unamortized plant balance of the Coleman and Wilson generating units,            |
| 13 |           | retirement would result in the need to recover the unamortized plant balances    |
| 14 |           | of those units. If Big Rivers were to retire the Coleman and Wilson plants it    |
| 15 |           | would amount to throwing away valuable assets that the Members have              |
| 16 |           | invested in and that are parts of Big Rivers' long-term rate increase mitigation |
| 17 |           | plan. Coleman and Wilson both have many years of useful life left. It just       |
| 18 |           | does not make sense for Big Rivers to prematurely retire these plants without    |

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

# September 3, 2013

| 1  |    | customer. Price elasticity coefficients were derived through the modeling         |
|----|----|---|
| 2  |    | process. The model specifications, data used to estimate the models, model        |
| 3  |    | statistics, and associated outputs are provided electronically under petition for |
| 4  |    | confidential treatment as Exhibit-SC-1-20a-Kenergy.xlsx, Exhibit-SC-1-20a-        |
| 5  |    | JPEC.xlsx, and Exhibit-SC-1-20a-MCRECC.xlsx. Refer to sheet "ELAS" in             |
| 6  |    | each file for the price elasticity coefficient.                                   |
| 7  | b. | Big Rivers has not performed any analyses of the difference between short-        |
| 8  |    | run and long-run price elasticity. The regression models identified in item (a)   |
| 9  |    | above are used to compute the short-run price elasticity. While a specific        |
| 10 |    | analysis of the long-run price elasticity has not been performed, the models      |
| 11 |    | reflect changes in the market shares and operating efficiencies of electric       |
| 12 |    | heating and air conditioning, which indirectly capture long-run price elasticity  |
| 13 |    | (e.g., customers purchasing more efficient appliances or switching fuel           |
| 14 |    | sources).   |
| 15 | c. | Big Rivers' consultant compared the price elasticities derived in its             |
| 16 |    | forecasting models to those published in reports by the Energy Information        |
| 17 |    | Administration and the National Renewable Energy Laboratory. These                |
| 18 |    | reports are provided electronically as Exhibit-SC-1-20c-EIA.pdf and Exhibit-      |
| 19 |    | SC-1-20c-NREL.pdf.  |

Case No. 2013-00199 Response to SC 1-20 Witness: Lindsay N. Barron Page 2 of 3

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

#### Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1 |          | d. | The price elasticity of demand provided in response to KIUC DR 1-35           |
|---|----------|----|---|
| 2 |          |    | corresponds to the models developed in Big Rivers' 2011 Load Forecast. The    |
| 3 |          |    | elasticities of demand presented in the current proceeding are based on model |
| 4 |          |    | from Big Rivers' 2013 Load Forecast. The price elasticities of demand from    |
| 5 |          |    | both studies are very similar and indicate that the impacts of price on       |
| 6 |          |    | consumption are essentially the same in both forecasts.                       |
| 7 |          |    |   |
| 8 | Witness) |    | Lindsay N. Barron   |
| 9 |          |    |   |

#### APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

# September 3, 2013

| 1  | Item 21)   |    | Please  | refer to Witness Barron Direct Testimony at pages 12-13, discussing      |  |  |
|----|--|----|---------|--|--|--|
| 2  | the use of price elasticity in the 2013 load forecast. |    |         |  |  |  |
| 3  | ú  | a. | State n | whether the 2013 load forecast assumes any price elasticity for large    |  |  |
| 4  |  |    | industr | rial customers.  |  |  |
| 5  | ı  | ь. | If so:  |  |  |  |
| 6  |  |    | i.      | Identify the industrial customer elasticity values.                      |  |  |
| 7  |  |    | ii.     | Provide the analyses that led to those values.                           |  |  |
| 8  |  |    | iii.    | Identify any studies or other documents relied upon in identifying       |  |  |
| 9  |  |    |         | such elasticity value.   |  |  |
| 10 | C  | c. | If not: |  |  |  |
| 11 |  |    | i.      | Explain the reasons for excluding price elasticity effects on the large  |  |  |
| 12 |  |    |         | industrial customer class.   |  |  |
| 13 |  |    | ii.     | Provide any analyses supporting the claim that any increases in          |  |  |
| 14 |  |    |         | electric prices for the large industrial customer class will not impact  |  |  |
| 15 |  |    |         | demand from such class.  |  |  |
| 16 |  |    | iii.    | Identify any studies or other documents relied up in deciding to         |  |  |
| 17 |  |    |         | exclude price elasticity effects on the large industrial customer class. |  |  |
| 18 |  |    |         |  |  |  |
| 19 |  |    |         |  |  |  |

8 Witness) Billie J. Richert

Case No. 2013-00199 Response to SC 1-22 Witness: Billie J. Richert Page 2 of 2

# APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1  | Item 23)      | Please refer to pages 13 to 14 of the Direct Testimony of Daniel Walker.      |
|----|---------------|---|
| 2  | With regards  | to Mr. Walker's testimony that BREC should be aiming for a TIER between       |
| 3  | 1.40 and 1.60 | in order to attract capital and obtain an investment grade rating, but that a |
| 4  | lower TIER o  | of 1.24 is acceptable for a transition period:                                |
| 5  | a.            | Identify the duration of the transition period that would be acceptable.      |
| 6  | <i>b</i> .    | How much additional revenue would be needed to get Big Rivers to a TIER       |
| 7  |               | of between 1.40 and 1.60 in the forecasted test period?                       |
| 8  | с.            | Is it possible for BREC to reach a TIER of 1.40 to 1.60 without an            |
| 9  |               | additional rate increase, beyond the increase requested in this case?         |
| 10 | d.            | When should BREC plan on exiting the transition period with TIER of 1.24,     |
| 11 |               | and raising rates again to reach a TIER of 1.40 to 1.60?                      |
| 12 | e.            | With regards to Big Rivers' long-term financial forecast, identify the        |
| 13 |               | projected TIER for each of the years 2016 through 2028.                       |
| 14 |               | i. For each such year, identify the amount of additional revenue that         |
| 15 |               | would be needed to get Big Rivers to a TIER of between 1.40 and               |
| 16 |               | 1.60.   |
|    |               |   |

# APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1  | f.        | State whether simply increasing Big Rivers' TIER to the 1.40 to 1.60 range  |
|----|-----------|---|
| 2  |           | would be sufficient to attract capital and obtain an investment grade rating,   |
| 3  |           | or whether other steps would be needed?   |
| 4  |           | i. If other steps would be needed, identify such steps?   |
| 5  | Response) |   |
| 6  | a.        | The transition period has to be long enough for Big Rivers to prove to the  |
| 7  |           | rating agencies and creditors that Big Rivers can earn sufficient revenues to   |
| 8  |           | produce stable margins at the 1.24x level. It is expected that the transition   |
| 9  |           | period will take 1 to 3 years.  |
| 10 | b.        | In the forecasted test period additional revenue of \$12.5 million over a 1.24  |
| 11 |           | TIER would be needed to achieve a 1.40 TIER and an additional \$21.3  |
| 12 |           | million over a 1.24 TIER would be needed to achieve a 1.60 TIER.  |
| 13 | c.        | Yes.  |
| 14 | d.        | Please refer to response in a. above regarding the duration of the transition   |
| 15 |           | period. It is not Big Rivers' intent to seek an additional rate increase to reach   |
| 16 |           | a TIER of 1.40 to 1.60.   |
| 17 | e.        | Please see the attachment to this response for the projected TIER for each of   |
| 18 |           | the years 2016 through 2027 (the current forecast only goes through 2027).  Case No. 2013-00199  Response to SC 1-23  Witnesses: Daniel M. Walker (a. & f.), Billie J. Richert (c. d. & f.) and |
|    |           | Christopher A. Warren (b. & e.)<br>Page 2 of 4  |

# APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

## Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

## September 3, 2013

| 1  |    | i. Please see the attachment to this response for the amount of additional      |
|----|----|---|
| 2  |    | revenue that would be needed to get Big Rivers to a TIER of between             |
| 3  |    | 1.40 and 1.60 for each of the years 2016 through 2027.                          |
| 4  | f. | In general, generation and transmission cooperatives ("G&Ts") have very         |
| 5  |    | little market liquidity in the capital markets compared to investor owned       |
| 6  | ,  | utilities. As a result, in order to attract capital at reasonable cost and with |
| 7  | 1  | reasonable terms and conditions, G&Ts must have solid credit profiles. In       |
| 8  | :  | some cases, investment grade ratings are not sufficient to produce enough       |
| 9  | (  | credit support to achieve reasonable costs, terms, and conditions. Achieving a  |
| 10 | •  | TIER of 1.40 to 1.60 would substantially aid in Big Rivers' ability to attract  |
| 11 | ţ  | capital and obtain an investment grade rating. However, other steps are         |
| 12 | 1  | necessary, as well. Other steps or mitigation efforts needed to attract capital |
| 13 | 8  | and obtain investment grade ratings include:                                    |
| 14 |    | 1. Obtaining additional working capital \$50 million line of credit;            |
| 15 |    | 2. Obtaining financing to meet environmental compliance requirements;           |
| 16 |    | 3. Obtaining replacement load diversification;                                  |
| 17 |    | 4. Generating sufficient cash flows from operations; and                        |
| 18 |    | 5. Maintaining quality financial metrics.                                       |

## APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's **Initial Request for Information** dated August 19, 2013

## September 3, 2013

| 1  | Item 25)      | Refer to page 13 of the Direct Testimony of Witness Lindsay Barron. With      |
|----|---------------|---|
| 2  | regards to th | e MetrixND software package used to compute the price elasticity of demand    |
| 3  | coefficients: |   |
| 4  | a.            | Describe what the MetrixND software does.                                     |
| 5  | b.            | Identify the vendor of the MetrixND software package and state whether the    |
| 6  |               | software is proprietary software that requires a license in order to gain     |
| 7  |               | access to the files.  |
| 8  | c.            | Produce, in machine readable format with formulas intact, all of the          |
| 9  |               | modeling files (including input and output files) and workpapers produced     |
| 10 |               | for BREC by the MetrixND software package.                                    |
| 11 | d.            | Please identify the assumptions, including any supporting documentation,      |
| 12 |               | which Big Rivers or its agents used as inputs in the MetrixND software        |
| 13 |               | package.  |
| 14 | е.            | If a license is required to obtain access to any information in this request, |
| 15 |               | please explain who Sierra Club should contact to either obtain that license   |
| 16 |               | or present information that Sierra Club or its experts already have a license |
| 17 |               | for that model.   |
| 18 | f.            | How much does BREC pay for the use of the MetrixND software?                  |
| 19 |               |   |

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

# September 3, 2013

| 1  | 3. Market shares for electric heating and electric air conditioning                     |
|----|---|
| 2  | - Projections of market share are based on residential end-use surveys                  |
| 3  | and appliance stock data obtained from the Energy Information                           |
| 4  | Administration's 2013 Annual Energy Outlook.  |
| 5  | 4. Appliance efficiencies – Historical and projected appliance                          |
| 6  | efficiencies are obtained from the Energy Information                                   |
| 7  | Administration's 2013 Annual Energy Outlook.  |
| 8  | 5. Heating and cooling degree days – Historical heating and                             |
| 9  | cooling degree days for Evansville, Indiana; Paducah, Kentucky; and                     |
| 10 | Louisville, Kentucky are obtained from the National Oceanic and                         |
| 11 | Atmospheric Administration. Projected values are based on average                       |
| 12 | values computed for the most recent 20 years.   |
| 13 |   |
| 14 | In developing the rural system peak demand model, the                                   |
| 15 | following assumptions were made for the model inputs:                                   |
| 16 | 1. Annual rural energy requirements – Projected rural system                            |
| 17 | energy requirements are based on model estimates generated using the                    |
| 18 | models developed for Big Rivers' three member cooperatives. The                         |
| 19 | energy projections included in the peak demand model reflect 50% of Case No. 2013-00199 |

# APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

## September 3, 2013

| 1     | the price impacts developed for the rural system energy sales forecast.   |
|-------|---|
| 2     | This reduced impact reflects the assumption that peak demand is less  |
| 3     | elastic with respect to price than are energy sales.  |
| 4     | 2. Peak day heating and cooling degree days – Historical peak   |
| 5     | day degree days for Evansville, Indiana; Paducah, Kentucky; and   |
| 6     | Louisville, Kentucky are computed based on daily temperature data   |
| 7     | obtained from WeatherBank, Inc. Projected values are based on   |
| 8     | average values computed for the most recent 20 years.   |
| 9     | 3. Degree day buildup – Temperature buildup is represented as   |
| 10    | the average of daily degree days for the two days prior to the day on   |
| 11    | which the rural system peak demand occurs. Historical degree day  |
| 12    | buildup values are computed for Evansville, Indiana; Paducah,   |
| 13    | Kentucky; and Louisville, Kentucky based on daily temperature data  |
| 14    | obtained from WeatherBank, Inc. Projected values are based on   |
| 15    | average values computed for the most recent 20 years.   |
| 16 e. | The requested information is available at   |
| 17    | https://www.itron.com/na/productsAndServices/Pages/MetrixND.aspx.   |
| 18 f. | Big Rivers pays its forecasting consultant for professional fees and projected  |
| 19    | related expenses, which included a \$500 usage fee for MetrixND. Big Rivers  Case No. 2013-00199  Response to SC 1-23 |

## APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

## Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

## September 3, 2013

- 1 Item 30) Produce a copy of any forecast or projection of future CO2 costs, taxes, or
- 2 emissions allowances prices that has been prepared by or for Big Rivers.

3

- 4 Response) Big Rivers has no projections for future taxes or emission allowance prices.
- 5 Big Rivers provided CO<sub>2</sub> cost estimates as part of its Environmental Compliance Plan in
- 6 Case No. 2012-00063. Estimates have not been updated since that time.

## APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1  | Item 31)  | With respect to EPA's GHG Tailoring Rule:  |
|----|-----------|--|
| 2  | a.        | Does the Company anticipate that any of its units would be subject to EPA's      |
| 3  |           | GHG Tailoring Rule? If so, when? If not, why not?                                |
| 4  | ь.        | What impact does the Company anticipate the Tailoring Rule having on             |
| 5  |           | either the costs of operations of any of its units?                              |
| 6  | C.        | Please provide any work papers or modeling analysis that considers the cost      |
| 7  |           | impacts associated with the Tailoring Rule.                                      |
| 8  |           |  |
| 9  | Response) |  |
| 10 | a.        | Big Rivers does not know at this time because the specifics of this rule are not |
| 11 |           | yet known.   |
| 12 | b.        | Without the specifics of the final rule, Big Rivers is unable to determine the   |
| 13 |           | impact the rule will have on its units.  |
| 14 | c.        | No modeling analysis is available.   |
| 15 |           |  |

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1  | Item 32) EPA recently issued a proposed New Source Performance Standard that              |
|----|---|
| 2  | would regulate greenhouse gas emissions from electric generating units. In this proposed  |
| 3  | rule, EPA stated that it soon plans to issue regulations for existing electric generating |
| 4  | units. With respect to EPA's forthcoming rule regulating greenhouse gas emissions for     |
| 5  | existing electric generating units ("EGUs"):  |
| 6  | a. Does the Company anticipate that the forthcoming existing EGU                          |
| 7  | greenhouse gas rule could impact any of its units? If so, what would be the               |
| 8  | expected cost of this rulemaking? If not, why not?  |
| 9  | b. Has a cost for the forthcoming existing EGU greenhouse gas rule been                   |
| 10 | taken into account in any of its production cost modeling or long-term                    |
| 11 | financial forecast?   |
| 12 | c. Please provide any work papers or modeling analysis that considers the cost            |
| 13 | impacts associated with the forthcoming existing EGU greenhouse gas rule.                 |
| 14 |   |
| 15 |   |
|    |   |

# APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A GENERAL ADJUSTMENT IN RATES CASE NO. 2013-00199

# Response to Ben Taylor and Sierra Club's Initial Request for Information dated August 19, 2013

| 1 | Response) |    |  |
|---|-----------|----|--|
| 2 |           | a. | Big Rivers does not know because the specifics of the rule are currently |
| 3 |           |    | unknown.   |
| 4 |           | b. | No.  |
| 5 |           | c. | No modeling analysis is available.                                       |
| 6 |           |    |  |

# September 3, 2013

| 1  | Item 33)                    | With regard to the potential impacts of the proposed EPA rule for Coal          |  |  |
|----|-----------------------------|---|--|--|
| 2  | Combustion Residuals (CCR): |   |  |  |
| 3  | a.                          | Does the Company anticipate that this pending regulation would impact any       |  |  |
| 4  |                             | of its units? If so, what would be the expected cost of this rulemaking? If     |  |  |
| 5  |                             | not, why not?   |  |  |
| 6  | <i>b</i> .                  | Has a cost for the pending Coal Combustion Residuals rule been taken into       |  |  |
| 7  |                             | account in the modeling done by the Company? If not, how would such a           |  |  |
| 8  |                             | cost impact its analysis?   |  |  |
| 9  | c.                          | Please provide any work papers or modeling analysis that considers the cost     |  |  |
| 10 |                             | impacts associated with the CCR rule.   |  |  |
| 11 |                             |   |  |  |
| 12 | Response)                   |   |  |  |
| 13 | a.                          | Big Rivers does not know at this time because the specifics of the rule are not |  |  |
| 14 |                             | known. The potential costs of this proposed rule were included in the Sargent   |  |  |
| 15 |                             | and Lundy study previously provided in Case No. 2012-00063.                     |  |  |
| 16 | b.                          | No. It could increase production costs at the affected plant depending on the   |  |  |
| 17 |                             | specifics of the final rule.  |  |  |
| 18 | c.                          | No modeling analysis is available.  |  |  |

#### PROFESSIONAL BACKGROUND

#### DANIEL M. WALKER

7106 University Drive Richmond, Virginia 23229

#### **SUMMARY**

Thirty years of management experience includes Executive Management, Capital Market Financing, Investment Analysis, Acquisitions, Auditing, Risk Management, Internal Control, Corporate Policy and Staff Development, Personnel Management, and Utility Analysis.

#### PROFESSIONAL HISTORY

WALKER AND ASSOCIATES; Richmond, Virginia

**Financial Advisor** — Provided financial advisory services in negotiating, structuring, and implementing almost \$3 billion of capital market transactions. Served as an expert witness before Federal and state jurisdictions on finance and regulatory issues.

## OLD DOMINION ELECTRIC COOPERATIVE; Glen Allen, Virginia

**Senior Vice President and CFO** - Responsible for the accounting and financial integrity of Old Dominion and its subsidiaries and the development of financial resources to meet its obligations and objectives. Member of Senior Management team for over 20 years.

#### VIRGINIA STATE CORPORATION COMMISSION; Richmond, Virginia

**Director, Accounting and Finance** - Supervised a large staff of accountants, auditors, and financial analysts in their analysis of public utility matters under the jurisdiction of the Virginia State Corporation Commission. In charge of task force responsible for policy recommendation for the Virginia State Corporation Commission on deregulation in the electric and telecommunication industry.

Case No. 2013-00199 Attachment 1 to Response to SC 1-35 Witness: Daniel M. Walker Page 1 of 2

## **EDUCATION**

- MBA University of Richmond
- **B.S.** Appalachian State University

## **PROFESSIONAL ACTIVITY**

- President, National G&T Accounting and Finance Association
- Member of G&T Alternative Finance Task Force
- Director National Society of Rates of Return Analysts
- Member of FERC-EEI Accounting Liaison Committee
- Member of NARUC Accounting Committee
- Published Article: Public Utilities Fortnightly
- Published Article: William & Mary Business Review
- Addressed Price Waterhouse's Global Structured Finance Conference in Ireland in 1999 and 2000, and in Portugal in 2001 and 2002.
- Addressed Mercedes Conference on Infrastructure Financing in Berlin, Germany in 2003.
- Adjunct faculty in Accounting and Finance, Virginia Commonwealth University
- Guest lecturer, University of Virginia, William & Mary College, Duke University and Virginia Commonwealth University
- Lecturer on various accounting and finance issues before professional groups in the United States and Europe
