Request:

Please provide the average power rate being paid by other aluminum smelters operating in the United States.

Response:

The average power rate for aluminum smelters operating in the United States, for 2013, is approximately \$37/MWh. This average power rate was calculated based on a review of industry publications and internal knowledge about the power rates of other U.S.-based smelters. This average power rate does not include the rate currently being paid by the Hawesville Smelter, but does include the rate currently being paid by the Sebree Smelter.
