PUBLIC SERVICE  
COMMISSION

It has come to our attention that the current propane provider, AmeriGas, has proposed to change the delivery system in our old Bridge subdivision to individual tanks.

We urge you to consider the following reasons for denying the request:

- Initially, we paid several hundred dollars to connect our house to the pipeline at the street
- our lot is full of septic tanks and overflow lines, therefore, we have no space to bury a tank
- deed restrictions do not allow either above or below-the-ground tanks
- Billing will be changed to propel a larger amount of dollars up-front.
- This system seems to be going backward in time and would have a negative impact on our neighborhood.
- proposed changes would not increase the efficiency of the delivery system.

Thank you for your attention to this matter.

Respectfully,

Sandra & Darrell Houston

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This not only helps in tracking expenses but also ensures compliance with tax regulations.

In the second section, the author outlines the process of reconciling bank statements with the company's ledger. This involves comparing the bank's record of deposits and withdrawals against the internal accounting records to identify any discrepancies.

The third section covers the preparation of financial statements, including the balance sheet, income statement, and cash flow statement. Each statement provides a different perspective on the company's financial health and performance over a specific period.

Finally, the document concludes with a summary of key points and a reminder to review all financial data regularly to ensure accuracy and identify potential issues early on.

The following table provides a detailed breakdown of the company's revenue and expenses for the quarter. It shows a steady increase in sales, which is a positive indicator for the business's growth.

Category	Q1	Q2	Q3
Total Revenue	\$120,000	\$135,000	\$150,000
Cost of Goods Sold	\$75,000	\$80,000	\$85,000
Gross Profit	\$45,000	\$55,000	\$65,000
Operating Expenses	\$30,000	\$32,000	\$35,000
Net Income	\$15,000	\$23,000	\$30,000

The data indicates that while operating expenses have increased slightly, the overall profitability has improved significantly due to higher revenue and better cost management.

In conclusion, the financial performance of the company for the quarter is strong. The management team is pleased with the results and looks forward to continuing the growth in the coming months.

Please refer to the attached documents for more detailed information and supporting data.
