

Dear Sirs

I cannot Believe that you would even try
To Raise the Rates that much most of us live
on a fixed income and sometime chose between
Food or medicine now with every thing else go up
the Percentage Rate is Beyond Belief ~~and~~ 203%
would Have Been Plenty enough so please for
the seniors and poor do not do this with the loss
of all the Jobs in coal some may have nothing
with the House and Senate in control I think
The Companies are Jumping the Gun to go to
Natural gas which will also rise in price Just wait
to see what the House and Senate can do about
coal But Please consider the people that have
none or little income before raising the
Percentage this much and small Businesses
try to survive please help us.
Just because there not making a Fortune they can spare
a little for us.
