Case ^{KU} 2014-00371

W.R. Wiley
Harrodsburg
Ky
40330

To whom it concerns:

I do not understand all the in and outs of the KU proposal for the fixed rates that are to be raised.

I do know that when I moved to my present location in 2009 my winter bill was ^{much} less than \$20.00 because I have Gas Heat as well as my hot water is Gas heated. Now, my winter bill is \$30.00 most of the time.

Yes, I get ~~my~~ updates as to how my house is Top rated for less usage than some homes. One reason is that I usually wear sweat shirts and fleece in the house in order to save money on my part.

Being on a fixed income it's going to be hard to add another \$8-\$11 to my monthly service charge. Lower usage will mean higher fees whereas larger usages will have lower charges.

How can one compete with such a company that is close to my home?

Sincerely,

Wanda Wiley
