RE: CASE NO 2014-00267
Surcharge Monthly Activity Report

Dear Mr. Derouen:

Please find this as our monthly Sur-Charge activity report.

1. C. I. Thornburg Co. has installed the replacement master meters that were inoperable. They had to actually dig them back out of the ground. They were however not installed with radio read or reading capability. The radio read meters were not programed from the factory to read radio read. C. I Thornburg spend 2 weeks trying to program and were unsuccessful until they found out that they needed special equipment to program them. The equipment was received last week and the C I Thornburg techs are programing them the week of July 6, 2015. Hopefully we will be able to start collecting data so we can narrow down which areas have high water usage. Then the by-pass meters will come into effect as we can narrowed down even further the areas.
2. Cannonsburg Water District (CWD) has found and repaired 10 water leaks throughout the District in the month of June 2015.
3. The Bids for the replacement of service lines are still not ready for bid until we collect the data from the master meters.

Sincerely,

Danny R. Clarkson
Manager
