RE: Case No. 2014-00267 – Surcharge Activity Report

Mr. Derouen,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CI Thornburg and Siemens have been able to reprogram 8 of the 10 Zone Meters through a firmware update. Unfortunately, 2 of the 10 meters are beyond a firmware update for repair. One meter while require repodding of the register or possible meter replacement while the second meter will most likely require a complete replacement of the meter. As of this date however, I have not been given a time frame for this by Siemens or CI Thornburg.

With regards to repairs Cannonsburg Water was able to locate and repair 1 leak of moderate size and have also made repairs on 2 smaller leaks.

If at any time you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

A handwritten signature in black ink, appearing to read "Tim Webb".
