RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Mathews,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CWD is continuing to monitor the data received from the 8 flow meters in use at this time, in addition to visual inspections by walking meter routes to check for leaks and inactive usage meters. These methods, along with the use of leak detection devices, has enabled us to find some minor leaks. With the repair of these leaks and the leaks discovered and repaired in the month prior, CWD's water loss should start showing reduction starting with the April water loss report.

On June 9th, CI Thornburg installed a new register to a 9th flow monitor and will be back on June 16th to install a new register on the 10th and install the radio communication devices on both. At that time CWD should have all 10 zone monitors in use.

CWD is continuing its efforts, with the guidance of the PSC, in planning a water loss and detection project to further capture and reduce water loss.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

Tim Webb
General Manager
