RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Mathews,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

CWD has continued to lower its water loss every month through and by all available means. With recent single digit temperatures, we have been able to locate several smaller leaks in unmetered areas. However, as temperatures rise, the risk of leaks grows. We will continue to monitor for leaks as much as possible and repair them as quickly as time and manpower allows

CWD is continuing its efforts, with the guidance of the PSC, in planning a water loss and detection project to further capture and reduce water loss. At this time, CWD is obtaining pricing for such a project. Once a project estimate is obtained and locations of further detection set, a motion will be filed to revise the water loss detection plan. In the meantime, we will continue our efforts in leak detection with all available means.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

Tim Webb  
General Manager
