RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Mathews,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

As can be seen in the current Water Loss Report, loss from the winter freeze and thaw cycle is now coming down. We are continuing to locate and repair leaks throughout the system and expect to see even more reductions in loss.

Zone Meters #6 and #4 have now been re-installed and seem to be working well. Zone 4 is not showing any indications of a leak however, Zone 6 has shown elevated flow. CWD has repaired 2 leaks in the area thus far and is continuing detection efforts to locate remaining leaks in this area.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

Tim Webb  
General Manager
