RE: Case No. 2014-00267 – Surcharge Activity Report

Ms. Mathews,

Please take a moment to review the status and actions Cannonsburg Water District has taken this month to further gain control of its water loss.

As reflected on the January 2018 Water Loss Report, water loss has slightly increased. This is due in part by the changing of temperatures. We have made significant gains on the detection and repair of these leaks in our zoned areas and will continue in our efforts in location and repair.

CWD is continuing its efforts, with the guidance of the PSC, in planning a water loss and detection project to further capture and reduce water loss. CWD has obtained all pricing for this project and will soon be submitting requests for this project once legal counsel is available.

If at any time, you have any questions or concerns regarding this report please, do not hesitate to contact me for further information.

Sincerely,

Tim Webb
General Manager
