COMMISSION

I am writing to object to the increase of the Mountain Water District , in Pikeville, Ky.

We already pay an exorbitant amount for water. To increase the bills would be detrimental to the elderly who live on a fixed income. And to those who barely get by with the all ready exorbitant bills, it could mean whether or not they eat. Our water company has already caused enough problems by changing the due dates. And people are having to pay a fee for not paying on time due to the fact the bills are due before most people get their Social Security checks.

Water should be free. It is a necessity of life. However, Mountain Water District, is taking money from those who really don't have the money to pay. Therefore I ask that you deny the increase that they are asking. Do an audit of their entire company and see what they are doing with the already exorbitant amount of money that we the citizens of Pike County are paying for their services.

Sincerely yours,

LT and Pjet
