Public Service Commission: 2014-371

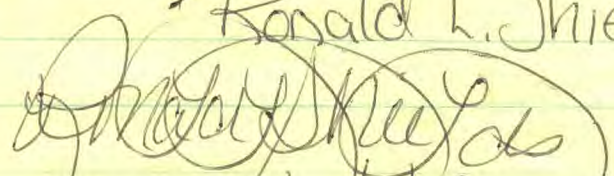

As a resident and a disabled senior citizen, living on a fixed income, I believe the Kentucky Utilities Co. is asking a little to much on a rate increase: 9.6% is more than my cost of living increase for all I have expenses for. In fact they will take my increase for the next 2 yrs. Lets not mention what else will go up. I ask you to look out for all of us and see that this increase is a little much.

I still remember the ice storm and being without electric for 7 days. No sorry or any thing, but I did get a electric bill 2 days after I threw out over \$90.00 worth of meat!

Please say "no" or cut it down would be fair. Like 4.5%

Sincerely

Ronald L. Shields
