Dear Sirs:

2014-371

I saw in the paper that Kentucky Utilities is proposing to raise their rates by an increase of 9.57 percent. I think that kind of raise in rates is ridiculous. My cost of living rate is 1.7 percent.

Their increase in rates seems to me to be gouging people that don't make much ~~with~~ money and especially on old and retired people and also on working people that don't make much of a salary. Can this be stopped. I would be pleased if you can do something about that kind of ~~thing~~ from K.U. - raising rates that much.

Thank you,

Tommy D. Clark
