To: PSC.

Can you please tell how Kentucky Utilities justified this high rate increase? This is wrong. Oh I agree they may be entitled to a rate increase but not this high. This is America where people are supposed to be treated fair. But the utility company could care less about the people. All they care about is their pockets. I may get a cost of living on my Social Security check next year but not as much an increase as they are asking for. They charge customers high utility prices during the winter and in the spring and summer you have to pay it off which is understandable. I just like to know why do they get a big Rate Increase

Thank you
Mrs. Loretta A Smith
