

To whom it may concern,

I am writing in opposition to the proposed rate increase requested by Ky. Utilities here in Lexington. I am on fixed income and fear that if my bill increases any more I will be forced to opt between electric or medicines. This rate increase can jeopardize my health and the health of elderly people on fixed income. I understand the rate increase request is for building a new plant.

Why should we pay for this plant it doesn't have our name on it. KU didn't help me pay for my house or automobile. It just seems that KU always needs the public's help paying for construction. As I said earlier, I can't afford any more increases. Please say no to the increase.
