

2014. 3 71

I want to express my feelings on the rate increase proposed by the Kentucky Utilities of 9.57 percent. That is about 5.6 times that of the 1.7 percent of the living increase.

Also the residential service increase of \$10.75 to \$18.00 per month, that is about 67% increase. I don't know how they can justify these increases.
