Name: Carolyn SandersAddress: 4036 Gilman Ave - Louisville KY 40207Case: Rate Increase Requested by LG & E and KY Utilities

COMMENTS: I am writing to express my discontent with the rather large rate increase requested by LG & E & KY utilities. In particular the rate increase for the Basic Service Charges (Fixed Rate) for gas asking for an additional \$5.50 and another \$7.25 for the Basic electric. That's a total increase of 12.75 for fixed rates each month for which I have no control.

I already keep thermostat low in winter, 66° during day - 62° at night. I wear long johns & sweaters. 70° in summer.

I am a proud person & take pride in paying all bills myself, no government assistance. I am currently retired & still working. I am approximately 90 years away from owning my home for which I have lived for 27 years. I drive a 17 year old car & I am saving up for a new one.

Quite frankly - when I do the math for these requested rate increases, it comes out to be approximately \$218 per year. That would be a car payment for me.

I respectfully ask that you deny these Basic fixed rate increases. No one gets raised at this rate!

I have no problem with the usage charges increase as they appear reasonable at this time.

These fixed rates were last raised in 1/2013 - \$2.25 electric
1.00 Gas
