PARTIES OF RECORD

Re: Case No. 2014-00372
Minutes of the Information Session and Public Meeting
Louisville Male High School
Louisville, Kentucky
March 30, 2015

Attached is a copy of the memorandum summarizing the public meeting held March 30, 2015, in Louisville, Kentucky, which is being filed in the record of the above-referenced case. If you have any questions, please contact Nancy J. Vinsel, Staff Attorney, at 502-782-2582.

Sincerely,

A handwritten signature in blue ink, appearing to read "Jeff Derouen".

COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

In the Matter of:

APPLICATION OF LOUISVILLE GAS)
AND ELECTRIC COMPANY FOR AN) Case No. 2014-00372
ADJUSTMENT OF ITS ELECTRIC AND)
GAS RATES)

MINUTES OF THE INFORMATION SESSION AND PUBLIC MEETING
LOUISVILLE MALE HIGH SCHOOL
LOUISVILLE, KENTUCKY
MARCH 30, 2015 5:30 P.M.

A public information session and public meeting was held at Louisville Male High School in Louisville, Jefferson County, Kentucky on March 30, 2015. Andrew Melnykovich, Director of Communications for the Public Service Commission, conducted the information session introducing the Commission and Commission Staff, and explained the procedure and protocol for the information session and the public hearing. Mr. Melnykovich then presented an overview of the legal basis, criteria and review process for the Commission's consideration of applications for proposed rate increases. The presentation included a general overview of the instant application, explained which aspects of this case are within the Commission's jurisdiction, and concluded with a question-and-answer period with Commission Staff.

At the conclusion of the information session and after a short intermission, Chairman David Armstrong initiated the public hearing portion of the meeting, providing a brief overview of the case at bar, the parties involved, and setting forth the procedure and protocol for the taking of comments. Chairman Armstrong then invited the public to

make comments to the Commission regarding Louisville Gas and Electric Company's ("LG&E") application for an adjustment in rates to increase adjusted annual revenue from electric rates by \$30 million and to increase adjusted annual revenue from gas rates by \$14 million. The following individuals spoke at the public meeting:

1. John Kettig: Mr. Kettig stated his opposition to the proposed rate adjustment and his concern regarding a lack of advocacy for coal. He said that it costs more to manufacture electricity from natural gas than from coal. He asked why the community is being taxed \$2 billion for the purchase of Cane Run Natural Gas Combined Cycle ("NGCC") Generating Unit when coal plants are being shut down.

2. Robert Mattingly: Mr. Mattingly stated his opposition to the proposed rate adjustment. He asked why LG&E needs to raise rates if natural gas is cheaper and it takes less people to operate a natural gas generating unit.

3. Judy Lyons: Ms. Lyons is Chair of the Sierra Club Cumberland Chapter. Ms. Lyons stated she is opposed to the proposed rate structure, which she said will increase the flat fixed monthly charge by 67% for electric service and a similar increase in the flat fixed monthly charge for gas service. Ms. Lyons said that the proposed rate structure hurts low income customers, discourages energy efficiency, and discourages customers from investing in green energy options.

4. Mike Baker: Mr. Baker stated his opposition to the proposed rate adjustment. Mr. Baker said the increase in fixed cost monthly charge is outrageous.

5. Stanley Alsman: Mr. Alsman stated his opposition to the proposed rate adjustment. Mr. Alsman said that LG&E is doing better than the average citizen because the average citizen has not received an increase in wages or fixed income

amounts. Mr. Alsman said that he has heated his house with wood since 1984 and that, while his LG&E bill has increased, it has not risen as steeply as his neighbors' LG&E bills. Mr. Alsman stated that his neighbors' LG&E bills are consuming their pensions.

6. Cathy Hinko: Ms. Hinko¹ stated her opposition to the proposed rate adjustment and rate structure, which she said undermines Kentucky's energy policy that promotes energy efficiency and clean energy technology. Ms. Hinko said that the proposed rate for fixed costs is regressive and noted that customers have no control over fixed cost charges. Ms. Hinko would prefer the fixed cost charge to be lower and variable cost for energy to be higher, which would give customers greater control over their bills. Ms. Hinko asked why LG&E did not raise the rate re-balancing in a previous case addressing energy efficiency.

7. John Hartmann: Mr. Hartmann stated that the proposed rate adjustment will have a negative effect on low-income customers. Mr. Hartmann said that the proposed rate structure discourages customers from pursuing solar energy and clean energy options, and therefore is not keeping up with what should be done to address climate change.

8. Forrest Land: Mr. Land questioned why LG&E is "guaranteeing" stockholders a 10.5% rate of return because no other business does that and no other stockholders are guaranteed a set return. Mr. Land stated that the rate increase is "ridiculous" and said that LG&E should have set money aside for future use. Mr. Land said that coal miners are losing jobs due to natural gas generating units, which will cost

¹ Ms. Hinko is Executive Director of the Metropolitan Housing Coalition, which is an Intervenor in this matter. She indicated she was speaking as an individual and not as a party to this matter.

the state for unemployment benefits. Mr. Land asked that the Commission help Kentucky citizens and not a utility that takes money out of the state.

9. Mark Romines: Mr. Romines questioned why LG&E is getting more money to burn more coal and said that his neighborhood was polluted due to Mill Creek Station. Mr. Romines asked that the Commission not raise LG&E's rates.

10. Doug Belongia: Mr. Belongia questioned how the proposed rate adjustment is fair if it is based upon the premise that customers are not using enough electricity for LG&E to earn enough revenue. Mr. Belongia stated that it was not right that others were wasting energy while he was conserving energy. Mr. Belongia said that the proposed rate adjustment is not reasonable, and asked why LG&E should get a 67% rate increase when customers are not getting 67% wage increases.

11. Wallace McMullen: Mr. McMullen is the co-chair of the Greater Louisville Sierra Club chapter. Mr. McMullen stated that the increase in the flat monthly charge hurts fixed income customers, discourages energy efficiency, and discourages investment in clean technology. Mr. McMullen stated that, under the proposed rate structure, customers would pay \$444 per year in order to access gas and electric service, and that the proposed rate structure is bad public policy that hurts customers. Mr. McMullen asked that the Commission reject the proposed rate adjustment, stating that approving the proposed rate increase would "backtrack" on the Commission's position in recent cases promoting energy efficiency. Mr. McMullen provided Commission Staff with a written copy of his statement and signed petitions opposing the rate increase.

12. Robert Pulliam: Mr. Pulliam stated he was here to “talk sense” to LG&E. Mr. Pulliam said that seniors in Newburg would be harmed by the proposed rate increase because they would be forced to cut back on their prescriptions in order to pay their utility bill. Mr. Pulliam questioned why LG&E guarantees stockholders a profit.

13. William Harned: Mr. Harned presented Commission Staff with signed petitions. Mr. Harned stated that the proposed rate increase will affect customers of rural electric cooperatives because the cooperatives purchase power from LG&E. Mr. Harned said that the increase will have a business impact because businesses will pass on to customers the businesses’ increased gas and electric costs. Mr. Harned stated that LG&E should have made prior arrangements to build up cash rather than pay the cost of the new plant “on the backs of the customers.”

14. Nancy Givens: Ms. Givens stated that the proposed rate structure and adjustment “takes us in the wrong direction,” is based on an outdated business model, and places Louisville and Kentucky in a worse economic position than those areas that are moving away from fossil fuels. Ms. Givens said that Kentucky needs a diversified energy strategy, and discussed models for energy transformation that were enacted by other jurisdictions. Ms. Givens asked the Commission to encourage policies that encourage energy efficiency and renewable sources.

15. Tammy Stewart: Ms. Stewart stated her opposition to the proposed rate adjustment raising the fixed cost fee. Ms. Stewart does not support any rate increase, but would prefer LG&E raise the energy costs and not the proposed fixed rate fee since energy costs can be controlled. Ms. Stewart discussed how she struggles to make

ends meet while staying within her budget, then questioned why LG&E is granted rate increases. Ms. Stewart asked the Commission to say “no” to LG&E.

16. Attica Scott: Ms. Scott is a former member of the Louisville Metro Council who stated her opposition to the proposed rate adjustment on behalf of “neighbors who can't make ends meet.” Ms. Scott stated that the proposed rate adjustment will impact low and fixed income customers disproportionately and discourage energy efficiency. Ms. Scott asked that the Commission consider the impact upon low income customers.

17. Thomas Pearce: Mr. Pearce is Chair of the American Indian Movement Chapter of Indiana and Kentucky. Mr. Pearce stated his opposition to the proposed rate adjustment, which he said will harm low income customers, penalize investment in solar energy and energy efficiency, and produce more pollution from burning coal. Mr. Pearce stated that he believes one day there will be a legal decision finding utilities responsible for health issues similar to the “tobacco settlement.”

18. Greg Zahradnik: Mr. Zahradnik stated his opposition to the proposed rate adjustment, which he said will raise fixed charges by 67% and therefore provides customers with no incentive for energy efficiency or conservation. Mr. Zahradnik asked what plans LG&E had for future rate increases. Mr. Zahradnik requested that LG&E charge customers “based on what we use.”

19. Sarah Lynn Cunningham: Ms. Cunningham spoke as a representative of Louisville Climate Action Network in opposition to the proposed rate adjustment and structure. Ms. Cunningham stated that the rate structure will retard the shift to energy efficiency and clean energy. Ms. Cunningham said that customers with solar panel help

LG&E to operate efficiently and that such customers should have greater rights, such as single customer transfer credit on same or contiguous property.

20. Joseph Pence: Mr. Pence spoke in opposition to the proposed rate structure, which he said will punish customers who conserve and discourage energy efficiency.

21. Garrett Adams: Mr. Adams spoke in opposition to the proposed rate adjustment and structure. Mr. Adams stated that the proposed fixed rate cost has a regressive effect on lower income customers, is an unfair assessment, and is "anti-conservation." Mr. Adams encouraged LG&E to look to renewable energy sources. Mr. Adams asked that the Commission delay the requested rate adjustment to perform additional studies on energy efficiency.

22. Amanda Fuller: Ms. Fuller spoke in opposition to the proposed rate adjustment and structure, which she said is regressive, and therefore not fair, just, and reasonable. Ms. Fuller said that LG&E's stated justification of a transition to cleaner energy was inconsistent with an outcome that would discourage energy efficiency and conservation. Ms. Fuller said she prefers that LG&E charge customers based on usage only, which will incentivize customers to use energy efficiently.

23. Nate Pederson: Mr. Pederson said that LG&E was engaged in "greenwashing," asked for transparency in LG&E's decisions, and challenged LG&E to be "creative and proactive" instead of reactive. Mr. Pederson stated that LG&E should pair a rate increase with support for increased housing insulation. Mr. Pederson said that LG&E should have citizen ownership. Mr. Pederson provided Commission Staff with a copy of his statement.

No other member of the public wished to make a comment. The public hearing was then adjourned.

All persons in attendance were asked to sign in and provide their home address for the record. The sign-in sheet is attached hereto as Appendix A. Mr. McMullen's written statement is attached as Appendix B. The petitions gathered by Mr. McMullen are attached as Appendix C. The petitions gathered by Mr. Harned are attached as Appendix D. Mr. Pederson's written statement is attached as Appendix E.

APPENDIX B

**APPENDIX B TO A PUBLIC MEETING SUMMARY OF THE KENTUCKY
PUBLIC SERVICE COMMISSION IN CASE NO. 2014-00372 DATED**

STATEMENT ON LG&E'S RATE RESTRUCTURING PROPOSAL

Wallace McMullen

Co-Chair, Greater Louisville Sierra Club

March 31, 2015

I am speaking on behalf of the 1700 Sierra Club members in the Greater Louisville area tonight. We vigorously oppose this proposal from LG&E to transform the utility's electric rate structure for residential customers.

The proposal to increase the flat fixed monthly charge by 67% from \$10.75 to \$18 per month, if implemented, will hurt fixed income customers, discourage energy efficiency in the residential sector, and discourage customers from investing in clean technology like rooftop solar installations.

Note that this is combined with a proposed increase in the fixed charge for natural gas service from \$13.50/month to \$19/month. The Company wants a guarantee of \$444 per year for having a connection to gas and electricity before we use one iota of either product, up from \$291/year. This would be a bad public policy, which would hurt many people, although it may "mitigate bill fluctuations" as the company asserts in its testimony.

The company bases much of its proposal on an average use, which is skewed upwards by a few high users. But the majority of the residential customers use less than the average figure of 984 kwh/month which the Company used as a justification its cost figures. My entire residence used an average of 309 kwh/month last year. The company did not provide a median customer usage figure, which would have been a more realistic indicator.

The Sierra Club's consultant, Paul Chernick, determined from the cost figures LG&E did provide that adding a minimum usage electric customer has a cost to the company for hardware and bill servicing of \$6.81/month, roughly one third of what LG&E is asking for. Their request should be denied.

The fixed fee for residential service was \$3.31 in 2004. Respectfully, Commissioners, you have raised it three times in less than a decade already, to the present \$10.75/month.¹ If you choose to rubber-stamp the Company's proposal (and I hope you won't), that would be a 40% increase in the fixed fee, and that's an exorbitant rate of inflation.

Residential customers do respond to the price incentives created by the rate structure. Increased consumption is the expected effect of this rate restructuring, with decreasing the per kwh energy charge, and minimizing the impact of efficiencies with a big fixed charge. Expert studies have found that rate structures as proposed by the companies can be expected to increase electric usage, increasing consumption by about 2.5%.

¹ LG&E's fixed charge has increased in the previous three rate cases. In 2004, the Commission approved an increase in the customer charge from \$3.31 to \$5. In 2011, it went from \$5 to \$8.50. In 2013 it went from \$8.50 to \$10.75.

The significance of this is that the expected increased consumption is 12 times the expected savings to customers from the company's Residential Incentives energy-efficiency programs. (A savings of 0.2% in residential load)

Commissioners, you have taken positions in favor of efficiency in a number of recent decisions, and we hope you will not backtrack now! For example, in the 2012 Kentucky Utilities rate case, you said:

For over 30 years, the Commission has noted the importance of energy efficiency (conservation) as a ratemaking standard...

[W]ith the potential for huge increases in the costs of generation and transmission as a result of aging infrastructure, low natural gas prices, and stricter environmental requirements, we will strive to avoid taking actions that might disincent energy efficiency.²

Please, DO NOT make a decision now that will seriously discourage residential energy efficiency!

Further, the adverse impacts of the company's proposal will be quite strong for those who invest in homeowner solar investments. If these rate changes go through as requested, suddenly the monthly savings from a typical rooftop PV system go down about 30%. That really damages the economic viability of making an investment in a solar PV system.

Our society badly needs to be encouraging clean renewable energy, not creating barriers that discourage it with regressive rate schemes. We must now begin to employ clean, carbon-free electric generation to reduce the impacts of global warming. Homeowner solar PV is one of the best carbon-free technologies for Kentucky to encourage. Efficiency is the lowest-cost way to reduce our use of fossil fuels quickly. So these proposals from the biggest electric utility in the state are very undesirable.

In conclusion, this rate restructuring proposal will hurt fixed income customers, discourage energy efficiency, and inhibit customers from investing in clean technology like rooftop solar installations. Please REJECT IT! If you determine that additional revenue is indeed needed by the monopoly utility, please just increase the kwh energy charge by the appropriate 1-2%.

Our community is widely opposed to this proposal, and I have a stack of petitions to give you demonstrating the opposition to the company's rate restructuring proposal. Please accept them on behalf of all of us.

² Order, Case No. 2012-00221, December 20, 2012, pp. 7, 20.

APPENDIX C

APPENDIX C TO A PUBLIC MEETING SUMMARY OF THE KENTUCKY
PUBLIC SERVICE COMMISSION IN CASE NO. 2014-00372 DATED

Petition Opposing LG&E Rate Restructuring

Louisville Gas & Electric wants to **significantly raise your monthly fixed billing charge**, which will adversely affect low and fixed income customers, as well as customers who have made energy efficient improvements to their homes such as improving insulation, upgrading windows, adding efficient light bulbs or solar panels, and upgrading appliances. In other words, LG&E's proposal raises revenue at the expense of its most vulnerable and responsible customers. The utility has filed with the Public Service Commission to **raise the monthly fixed charge more than 67%** and lower the kWh rate just 5.6%. [PSC Case 2014-00372] This rate restructuring plan discourages **energy conservation and homeowner investments in clean energy**, affecting customer choice and savings power by reducing the returns on investments in energy efficient home improvements and renewable energy.

This also results in restricting the **growth of clean energy industries—like solar and energy efficiency**—just when Kentucky needs the jobs from those promising industries the most. The effects of climate disruption (heat waves, polar vortexes) are already affecting Kentuckians. We should be encouraging clean renewable energy, not creating barriers to consumer choice and job creation. We must begin to employ clean, carbon-free electric generation to reduce the impacts of global warming. Homeowner solar systems are one of the best carbon-free technologies for Kentucky to encourage. Efficiency is the lowest-cost way to reduce our use of fossil fuels quickly.

With the belief that efficiency and clean energy should not be discouraged or punished,

We, the undersigned, call on LG&E to keep the fixed monthly charge small and unchanged!

Mail Completed Petition to Wallace McMullen.

Petition Opposing LG&E Rate Restructuring

Louisville Gas & Electric wants to **significantly raise your monthly fixed billing charge**, which will adversely affect low and fixed income customers, as well as customers who have made energy efficient improvements to their homes such as improving insulation, upgrading windows, adding efficient light bulbs or solar panels, and upgrading appliances. In other words, LG&E's proposal raises revenue at the expense of its most vulnerable and responsible customers. The utility has filed with the Public Service Commission to **raise the monthly fixed charge more than 67%** and lower the kWh rate just 5.6%. [PSC Case 2014-00372] This rate restructuring plan discourages **energy conservation** and **homeowner investments in clean energy**, affecting customer choice and savings power by reducing the returns on investments in energy efficient home improvements and renewable energy.

This also results in restricting the **growth of clean energy industries—like solar and energy efficiency**—just when Kentucky needs the jobs from those promising industries the most. The effects of climate disruption (heat waves, polar vortexes) are already affecting Kentuckians. We should be encouraging clean renewable energy, not creating barriers to consumer choice and job creation. We must begin to employ clean, carbon-free electric generation to reduce the impacts of global warming. Homeowner solar systems are one of the best carbon-free technologies for Kentucky to encourage. Efficiency is the lowest-cost way to reduce our use of fossil fuels quickly.

With the belief that efficiency and clean energy should not be discouraged or punished,

We, the undersigned, call on LG&E to keep the fixed monthly charge small and unchanged!

Robert Brower

People on fixed incomes will be hurt by this. already hae no extra means of paying additional bills. When you look at what CEO's of companies make, including LGE then they want to increase just to fatten their pockets. Thee ae elderly, and others, who during this horrible past winter had no lights, gas, etc. because they couldn't pay their bills or either intentionally kept heat off because they can't afford it. when does all this stop? When do we get back to life where we try to make it possible for everyone regardless of their income to live comfortably? Why do large companies have to pay their upper management employees exorbitant salaries at the expense of the general public? I absolutely oppose this rate increase.

I am adamantly opposed to this increase on meters! Those people who make decent, or in the case of CEO's, top management personnel - more than decent, wages probably don't think twice about an increase. However, people on fixed income, only social security checks etc. are already living on a very strict budget. With everything going up from medicine to groceries this will be a true hardship for them. Find another way to put money in LGE budget to cover any necessary needs!

Jim Cowgill

I have just read that LG&E is asking for a 53% rate increase to use their electric meter. Once again the additional costs are on the backs of those who are on social security whose income is fixed. The KPSC needs to stand up to LG&E and "just say NO". Enough is enough. Thank you

We are already paying too much for gas and electric usage. The poor people definitely can't afford these astronomical payments and neither can the middle class. I guess they expect babies, children and the elderly to freeze to death. No wonder everyone wants other ways like windmills to be built so nobody has to depend on these astronomical prices. I hope they succeed. I would be willing to switch.

Robert Ernst

It is ridiculous they are granted time and time again favorable rate increases well above the direct impact to them for the costs of energy they pay or produce. It is well past time for the Utility Energy Rate Commission to actually stand up to them and work for the people of the commonwealth as they were designed to do. Quit allowing pass through increases for all indirect support costs they try to pass on to consumers such as employee raises, board member praises and perks. They need to manage their business like all other private businesses. Tighten the purse strings and suck it up in a poor weak economy. Employees are never guaranteed wage or perk increases. They have enough catered meeting events in Louisville at hotels to make your head spin as well as convention attendance on our dollars because they know the commission just blindly approves their requests. Ask for much more than they need so they will accept a negotiated rate increase by the commission. Which is always always granted for more than they need or are justified to receive. Make them produce all correspondence for what the direct costs are for energy and only allow increase for those and not a cost of living or other increases

I am still working but your plan to increase the meter rates for everyone to raise money is very disconcerting. First I struggle to understand how it can be legal to charge more for something that is your tool so you can determine how much to charge your customers? Secondly, besides not making sense, I am concerned about the many people who are on a fixed income, low income and maybe unemployed. It appears to be just another way to increase the marginalized—I thought taking the ability of TV reception was bad, but this is worse. One can and does go without TV but try going without heat/air/electricity. This meter rate increase will do exactly that. I thought Louisville was trying to be a compassionate city---

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

Rebecca fuller

There has got to be other ways to "trim the fat" from LG&E...raising taxes is not always the answer!! I cut electric usage and hot water usage all the time. This winter the only time I use hot water is for a 7 minute shower. I boil water on the stove to wash dishes and I have an electric dishwasher. Laundry is 1-2 loads a week. Only one light on in the house at a time and that's where I sit! I conserve to live in all practicality. I'm in a better place than others but I work at it. Don't raise my taxes!!!

We are concerned for two reasons: (1) Any rate increase by KU and LG&E most likely will be followed by similar rate increases by other KY utilities, and (2) What is the analysis that justifies such a rate increase? This is the first we've heard of this kind of a rate increase. To be credible, it must be soundly justified.

KU AND LG&E ARE ATTEMPTING TO RAISE YOUR RATES

Say "NO" to Unfair Utility Bill Increases!

Right now, in your area KU and LG&E is asking the Kentucky Public Service Commission to allow them to raise your utility bills by more than \$216 for your electric meter rate or \$228 a year for your gas meter rate. If successful, KU and LG&E will raise your electric meter rates by \$18 a month or your gas meter rate \$19 a month. **You can help stop this Rate Hike by simply filling out this online petition.**

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

She Jolly

I am on a fixed income and my monies are stretched to the breaking point. The rates are so high now that it is hard to pay the bills that come in each month. My social security check goes up a little each year but the premium for my Medicare rises to take more of my money. Kentucky retirement systems raises the premium on my Medicare advantage but we have not had a raise in 3 years. My check from the pension actually went down this year.

There are a number of ways LG&E could cut expenses. Two ways that immediately come to mind are: Discontinue supplying free light bulbs to customers and the postage on power usage survey letters sent to customers plus the cost of producing the letters. Trim all nonessential items from your budgets which is what those individuals who live on fixed incomes have to do all the time.

Phyllis Mitchell

It hasn't been that long ago, a rate increase was given. The utility companies, gas companies and the Mayor of this State has literally taken the people of Louisville, KY to the cleaners. Metro Louisville is charged higher gasoline prices than surrounding areas, our property tax is ridiculous because of JCPS and between LG&E and the Water Company, any person or family that is not RICH or living on a fixed income has no means of being able to continually pay their bills. Between politicians and utilities, every resident in Louisville KY may end up in bankruptcy court. This is nothing more than making some administrators a fatter pocket!!!!!! You people stink.

I oppose this rate increase as I am on a fixed income. The LG&E utility bill was somewhat high this past winter, but I was able to manage, but feel that another rate increase will cause a concern for the future. The other utilities are periodically asking for increases and soon it will be a challenge for those of us on a fixed income to make payments in fear of services being cut off. I understand that situations may arise for increases, but it is unfair to have rate increases when those rate increases take away any cost of living increases we may incur. Please reconsider the proposal for the rate increase. Thank You!!!

I've made changes to my home to be more energy efficient. I've added solar panels, LED lights, extra insulation, and triple-e windows. I've lowered thermostats, powered off TV and computers when not in use, and bought Energy Star appliances. The added meter charge negates some of the changes that I've made and is just an excuse to increase profits.

I am retired and on a fixed income, so I cannot afford to pay more for my utilities. My wife and I do everything we can to keep our bills as low as possible, keeping our thermostat as low as we can stand it and bundling up with layers in the winter and cutting off our air conditioning in the summer ... to the point of being uncomfortable most of the year. We keep as few lights on as possible and bake several meals at once in the oven and then eat them as leftovers for a week or more. We simply cannot afford a rate increase. We are barely able to pay our bills now.

I live in an apartment with my disabled fiance. As sole breadwinner for the family, an increase in utilities will sorely affect our ability to maintain ourselves on a limited income. I understand that the cost of producing energy is going up, but it is more important to provide this needed service to people than it is to increase your profits.

Right now, in your area KU and LG&E is asking the Kentucky Public Service Commission to allow them to raise your utility bills by more than \$216 for your electric meter rate or \$228 a year for your gas meter rate. If successful, KU and LG&E will raise your electric meter rates by \$18 a month or your gas meter rate \$19 a month. **You can help stop this Rate Hike by simply filling out this online petition.**

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

Triza Wilkinson

Ky is one of the 5 states with the highest taxes on everything! They are looking to increase taxes in Jefferson Cty again next year but we have one of the poorest school systems. Enough!

Diana Williams

As a senior citizen....you get a \$20-\$25 increase per month, not weeklyand it goes for increase to LGE & Louisville Water Co. They know we don't have a choice...so they can go after or money for no one else to go to....Keep in mind LGE, that the only phone company did the same thing and lots of other companies now offer services and I hope one day this will happen to LGE & Louisville Water.

Douglas Wilson

I feel the rates have far exceeded the usage, I am on a fixed income that doesn't go up with the demand of cooperation's greed.
