

1-2-2015

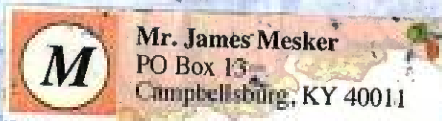

Public Per. Comm.

2014-00392

Why is B&E charging for gas  
& electric when K&U is **RECEIVED**  
for electric plus utilities. **JAN 28 2015**  
it because of county and **PUBLIC SERVICE**  
in the city **COMMISSION**

How is a customer supposed  
to read the chart for gas &  
electric. Can anyone make any  
sense of it. B&E shows an  
increase of 2.73 & 2.75% in two  
columns for residential & K&U  
shows and increase 9.59 to 11.01%  
in two columns. This does not  
make any sense. What are  
people on low to middle income  
have to do, to get by after the  
rates go into effect. I, myself  
cannot make any sense of the  
charts rec'd.

If you can answer this  
letter ASAP, will be grateful  
for your comments.

Thanks  
James Mesker
