Frankfort, KY 40601

To Whom it May Concern:

It was brought to my attention recently that LG& E is seriously proposing a 6.7% rate increase in the monthly electricity service charge as well as an increase in the kwh usage charge. Someone paying \$10.75 now would be paying \$18.00 under their proposal. I am asking that you deny this proposal for many reasons. For those of us who are trying to keep our bills down by being energy efficient, this increase will just wipe it out. For those on a fixed income, it becomes an even more of a challenge on how to stretch the dollar with this proposal.

Please think about the consumer and not the stockholder or the CEOs when I urgently ask that you help keep our LG & E payments down by not increasing our service charges. Our heating bills, whether it is by electricity or gas, has been astronomical these past two months, due to what Mother Nature has dealt us. Please don't allow LG & E to increase our bills needlessly any further.

Thank you for your consideration.

Sincerely,

Jo Ann Lockhart
