COMMENTS: The rate structure of MSD should serve  
as an instructive example: water provision rates are minimally  
dependant on actual usage, and in consequence water conservation  
does not become a priority for the people of Louisville.  
While our ample water may render this fee structure  
adequate for LWC/MSD, it is wholly out of sync  
with LG&E's claimed emphasis on conservation. A  
restructuring along the proposed lines would lead to  
increased indifference to usage, and increased consumption.  
If we are truly committed to conservation, this retrogressive  
restructuring of the fee schedule should be denied.
