Name: John Cullen

Address: 1818 Fleming Rd, Louisville KY 40205

Case: 2014-00372

COMMENTS: I do not support rate increases  
that increased the fixed meter charge.

I would prefer that rate increases that are  
necessary be applied to usage.

Increases focused on fixed meter charges  
disincentivize efforts to reduce energy  
usage ~~and~~ compared to a structure where a  
larger portion of costs is tied to usage.

Not only is this a negative impact on  
conservation and efficiency efforts for  
environmental benefit, but it also

reduces the rate payer's ability to influence  
this bill through more efficient power usage.

The negative impact on rate payer's control  
disproportionally impacts smaller, more efficient  
households, as well as families living in  
poverty since those costs are a higher  
proportion of their household income.

Please deny this rate increase request and direct  
utilities to focus rate changes on usage.

Also, emailing comments on the web site did not work  
with my gmail. Andrew Melnykovych was very responsive  
& helpful in providing the email address to use, but perhaps  
that could be included on web site now clearly.
