COMMISSION

Memorandum

To: Whom it May Concern:
Fr: Eric Evans Associate State Director Advocacy & Outreach
Re: Public Comment Petitions for LG&E/KU cases 2014-00372 and 2014-00371
Date: May 8, 2015

The enclosed petitions are additional public comment petitions that were sent in to AARP regarding LG&E and KU rate cases 2014-00372 and 2014-00371. The petitions were sent after the settlement negotiations and are based on LG&E and KU's original rate request.

AARP

Affordable **UTILITIES NOW!**

KU AND LG&E ARE ATTEMPTING TO RAISE YOUR RATES

Have you had expensive utility bills lately? Are you tired of your rates increasing?

Right now KU and LGE are asking the Kentucky Public Service Commission to allow them to raise your utility charges. If successful, they will raise your electric meter rates by \$7.25 to \$18 a month and/or your gas meter rate from \$13.50 to \$19 a month, as well as raising your energy usage charge. You can help stop this Rate Hike by simply filling out this petition.

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

Karen Adams
LEXINGTON, KY

This is quite nearly a monopoly as we have little choice in our services.

Henrietta Barker
LOUISVILLE, KY

The proposed increase would make my utility cost go up at least 20%. My income increased less than 3%. This will just allow me less food and other necessities. Please consider denying this request.

I have 800 square feet that I am heating and cooling. It cost \$200 per month and I am still hot in the summer and cool in the winter. It costs \$7000 for a new furnace and I am still not comfortable. How can anyone on a fixed income of \$1,100 per month maintain living with taxes, repairs and minimal food? Look at the salaries at LG&E's upper management. They don't do without anything while the rest of us struggle. It's just one increase after another. Something needs to change. We have to operate on a fixed income why can't you fix it for few years and see what it's like?

Groceries are on the rise. Everything costs more. Try to go to a dentist without insurance and watch what little savings dwindle. People should have worked all their lives now have to worry if they are going to make it thru the month or if they are going to be able to pay their utility bills. Elderly and sick (disabled) individuals need electric to keep their homes comfortable. It is a necessity not a luxury. Families who have worked hard to buy their homes are now under the burden of more and more expense. This has to stop somewhere.

The rate increase that KU wants is 67%!!!! WHO gets a 67% raise?!?!?!? I have sent a letter to the PSC protesting this and I have suggested that they consider a rate comparable to the Consumer Price Index (CPI), which is what we employees receive. This is usually 1%, 2% or 3%. PLEASE SEND A LETTER PROTESTING THIS RATE INCREASE!!!!!!

It seems like the bills just keep getting higher every year. I am a single person 61 years old and can't get social security yet. It places a difficult burden on senior citizens. Gas prices have gone done in recent months but the LG&E still wants to raise the cost. I just want to voice my opinion that this rate increase is not needed by LG&E.

KU AND LG&E ARE ATTEMPTING TO RAISE YOUR RATES

Have you had expensive utility bills lately? Are you tired of your rates increasing?

Right now KU and LGE are asking the Kentucky Public Service Commission to allow them to raise your utility charges. If successful, they will raise your electric meter rates by \$7.25 to \$18 a month and/or your gas meter rate from \$13.50 to \$19 a month, as well as raising your energy usage charge. You can help stop this Rate Hike by simply filling out this petition.

Completed petition submitted by Louisville Gas & Electric or Kentucky Utilities customer in response to cases 2014-00372 or 2014-00371.

Kristen Hughes
LEXINGTON, KY

The rates have already increased so much in the past few years that our bills during the winter months are triple what they once were. Utility costs keep increasing, yet for most of us, our income is not increasing and companies no longer offer cost of living raises to compensate for the massive hikes in bills. Our economy is not such that people can afford another price increase. There will be a lot of people without electricity as a result.

I'm a widow on a small fixed income. I have large copayments on some of my prescriptions and large deductibles on my medical bills. I don't shop for groceries any more, I buy only what I can't do without. Please don't allow my utilities to be increased. Thank you Betty Jacobs

The PSC recently approved a rate increase and this is too big of a jump! You (KU & LGE) ask for a huge unreasonable amount - REALLY!?!?! \$7.25 to \$18.00 a MONTH!!!!!! - I guess your real plan is to get about half that amount and you still have a huge increase but you can act like you didn't get what you "needed." You are providing an essential utility and not a luxury - PSC, do your job and control these rates!!!!

I am with RECC Blue Grass Energy and pay 490.00 per month on the budget. My house is all electric. But there is never more than 3 lights on, the refrigerator, and one TV. The furnace of course when it's cold. 1 AC window unit when it's hot. I don't understand how my bill can be so high. The thermostat is never set higher than 72 no matter how cold it gets outside. I am disable and on a fixed income. The majority of what I have goes to RECC Blue Grass Energy.

LG&E are doing the same thing that Louisville Water is. We already pay over 54 dollars a month in service charges, surcharges. And other charges like home assistance charge, which I did not sign up for. Our water bill use to be in the 35 dollar range every other month. Now we are paying over 112 dollars every other month, all because of service charges and surcharges, when is it going to stop!!!! I live on a fixed income and everything keeps going up. I think it is terrible that they keep trying to service charge and surcharge us to the poorer house. When something breaks we don't have the money to get it fixed. Please stop.

We have participated in a physical audit of our energy systems and a survey conducted by KU and LGE. Neither of these has been effective in helping us reduce our energy use and neither program has convinced us that the utilities are concerned with upgrading their systems and reducing dependency on coal. We'd like to move out of the 19th century.

Living on a fixed income and utilities rate increases are not very compatible. Your dollars don't stretch very far, and you end up having to decide which is more important, food, medicine or your utilities bill.
