

I am writing concerning the proposed 9.25% increase that Ky. Power Co. is asking for.

They have had several increases over the past year or so. The power Co. already collects money from customers monthly from the Asset transfer rider. The average is 14<sup>00</sup> to 18<sup>00</sup> monthly.

Customers like myself on a fixed income, the increase will be a burden.

Where I live we lose power 6 to 8 times per month.

Please consider this increase a burden on all.

Thank you  
Lance D. Lewis
