KENTUCKY POWER RATE INCREASE

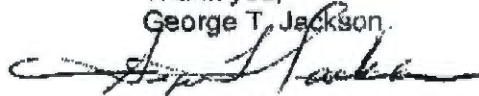

OPPOSITION!

Dear Sirs or Mam,

1/08/15

I am writing to express my strong opposition to the current request of Kentucky Powers rate increase. When will this nonsense ever end, it sounds as if it's a broken record year after year we need more money. I am telling you the people of eastern Kentucky are fed up! My bill has went up 100% in the past seven years, how will working people be able to pay these rates? It's absolutely ridiculous. The increases they are speaking of will raise my bill another \$40.00 dollars a month, that's \$500.00 a year I don't know about you but in my budget, and a lot of other people that live in this area that's quite a bit of money! They talk about having to buy the electric from Moundsville why can't they buy it from the natural gas power plant that sets right next to the big sandy plant? Has that ever been discussed as a option? I try to be energy conscious, fortunately I have been able to add insulation, replace doors, windows and replace those old incandescent bulbs but still they just keep raising those rates so it really doesn't matter, because people are not going to be able to afford electric anyhow! So I am asking you to consider the PEOPLE that live in eastern Kentucky in your decision.

Thank you,
George T. Jackson.
