 Concerning Kentucky Power Bills.

RECEIVED

PUBLIC SERVICE
COMMISSION

Why should we have to take this 12.5 percent raise on our power bills ??

Our Coal has been taken away from us here in Eastern Kentucky and our Louisa Ky Power Plant to be shut down. This was our livelihood here! Now Kentucky Power wants us to pay 12.5% more for our electricity to pay for the mismanagement of our government to reduce us to poverty.

Yet the U.S. will export our coal to China + elsewhere to burn and pollute our air. What's the difference with their burning our coal or we can burn it here in the U.S. ??? Its still pollation. ~~Isn't it?~~ Isn't it??

2

Our government is wanting to control everything in our lives! Are we becoming a Communist country like Russia?? They also want us to convert to Muslim religion, according to what's going on. What has happened to our FREE Country??

We are protesting this Electricity raise. We can hardly make ends meet as it is right now. We are having more people living in poverty, becoming Homeless, on food stamps and this will only promote more lawlessness! People have to eat!

I'm praying that you can stop this 12.5% raise. We don't need any raise, because we can't survive as it is.

Sincerely,
Jesse Banks
