

Case No. 2015-00418

PSC

2/10/2016

RECEIVED

FEB 15 2016

Public Service
Commission

Dear Sir

I am writing in objection to the requested water rate increase.

My objection is based on the following:

The primary reason given for the requested increase is to give the stock holders an increase on their investment. The percent increase is unreasonable and will force many people to fall into the Public Assistance category.

Tax payers will not only have to pay the increase but will be paying also for those who are already on Public Assistance as well as the new recipients.

There no anticipated " Value added "to the water service for customers.

The Commission should consider the value to Customers as well as the Company and not be seen as a Rubber Stamp for the Companies.

Residents are already being over charged for the water service they now receive.
