To Whom It May Concern:

Where will it stop? You are again allowing our electric company to raise rates when we can barely afford to stay warm now. I am 85 and draw a small Social Security check to live on. We get a minimal raise, yet our bills go UP, UP, UP. How are we going to keep up? I keep my thermostat set low enough that I'm not comfortable now. Please put a lid on these rising rates!

And just so you know, my friend is putting this letter together as I translate. Computers are another thing old folks can't afford.

Thank you.
