Case #: 2016-00371

To whom it may concern,

I am writing against the increase in gas & electric rates at LG&E. This increase would have a profoundly negative effect on my family. At the current rate, we struggle to pay our bill every month. We own a 2,000 sq. ft home built in the 90's. We have to leave the heat at 60° and our bill is still \$250+ a month. We have a new HVAC, so this is not the issue. We have to wear layers of clothes & struggle to stay warm. I have 3 young children that complain of the cold, but we can not afford to keep the house at a comfortable level. It should not cost me an arm & a leg to keep us warm in the winter & cool in the summer. Please consider my request to stop<sup>me</sup> increase in gas & electric prices along with the inclusion of the gas line tracker projects. I don't feel that it is my responsibility to fund such projects.

Thank You for your consideration,

Barry & Brittney Pickett
