Public Service  
Commission

16 Mar 2017

Dear KY Public Service Commission Team,

I hope this little message finds each of you well and enjoying the beauty of this day.

I am writing with the hope that my one voice will join with the concerned voices of many others imploring you to reject LG & E & KU's proposed new rates. These proposals will hurt customers especially people like me who are on a fixed <sup>limited</sup> income where I already attempt to conserve energy. These rates are the wrong direction for our community. Please reject the new rates & use your voice to represent more people, many more.
