# Exhibit #12 Public Notification

UISHICI - System ISH INT TYDOWZTS. alicident was not an emergency, as our customers, you have a right to kis

incruice by manine bound, or water standard, Althour appened and what we did (are doing) to correct this situation.

fe routinely monitor for the presence of drinking water contaminants. Testing results from 1/1/2013 through 3/31/2013 show that our system exceeds the andard, or maximum contaminant level (MCL), for trihatomethanes (THM) and haloscetic acids (HAA). The standard for THM is 0.080 moft, and the anderd for HAA is 0.060 mg/L. These are determined by averaging all samples collected by our system for the tast 12 months. The level of THM everaged our system for 1/1/2013 to 3/31/2013 was 0.093 mg/L and HAA was 0.068 mg/L.

- There is nothing you need to do. You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek ٠ advice from your health care providers about drinking this water,

ome people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central produs system, and may have an increased risk of getting cancer. Some people who drink water containing haloacetic acids in excess of the MCL over any years may have an increased risk of getting cancer.

#### his is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

fe are working to minimize the formation of trihalomethanes and haloacetic acids while ensuring we maintain an adequate level of disinfectant. We have ken additional steps to change disinfectant types/levels, remove natural organic matter, and increased flushing of water lines to determine it our efforts have sen effective. We are also monitoring water storage tank levels and water flow patterns within the distribution system, We enticipate resolving the problem thin the next quarter.

or more information, please contact John Mills at (606) 296-3885 or 387 E Main St, Suite 140, Inez, KY 41224

ease share this information with all the other people who drink this water, especially those who may not have received this notice directly (for exemple, sople in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail

In 2012, Martin County Water District detected 13 contaminants in the drinking water and none of them were above the EPA accepted level for drinking water. Please go to www.krwa.org/2012ccr/martincounty.pdf to view your 2012 annual water quality report and learn more about your drinking water. This report contains important information about the source and quality of your drinking water. To speak with someone about the report, please call (606) 298-3885. If you would like a paper copy of the 2012 Annual Water Quality Report

mailed to your home please check the paper copy box and mail back with your payment or call (606) 298-3885. Mail a copy 🗖

Notice by Martin County Water District - System ID#: KY0800273 ur water system recently violated a drinking water standard, Although this incident was not an emergency, as our customers, you have a right to know what appened and what we did (are doing) to correct this situation.

le routinely monitor for the presence of drinking water conteminants, Testing results from 1/1/2013 through 3/31/2013 show that our system exceeds the andard, or maximum conteminant level (MCL), for trihaiomethanes (THM) and haloacete acide (HAA). The standard for THM is 0.060 mg/L and the andard for HAA is 0.060 mg/L. These are determined by averaging all samples collected by our system for the last 12 months. The level of THM averagod cur system for 1/1/2013 to 3/31/2013 was 0.063 mg/L and HAA was 0.063 mg/L.

- There is nothing you need to do. You do not need to boil your water or take other corrective actions. If a situation erises where the water is no tanger safe to crink, you will be notified within 24 hours,
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

ome people who drink water containing trihalomethanas in excess of the MCL over many years may experience problems with their liver, kidneys, or central since productions which have an increased risk of getting cancer. Some people who drink water containing haloacetic acids in excess of the MCL over any years may have an increased risk of getting cancer.

his is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

#### Notice by Martin County Water District – System ID#: KY0800273

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

\*We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2/1/2013 – 2/28/2013, we did not complete all monitoring or testing for chlorine and turbidity, and therefore cannot be sure of the quality of your drinking water during that time.\*

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.

By the 10<sup>th</sup> of each month we must submit a Monthly Operation Report (MOR) to the Division of Water. The MOR for February 2013 did not arrive by the required deadline and this caused three violations. One violation for not submitting the MOR by the required deadline, another for not submitting daily chlorine results, and another for failing to submit the daily turbidity readings. (The chlorine results and turbidity readings are contained within the MOR.) We have modified our procedures to assure that the MOR arrives by the required deadline.

For more information, please contact John Mills at (606) 298-3885 or 387 E Main St. Suite 140, Inez, KY 41224

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

### Notice by Martin County Water District – System ID#: KY0800273

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Testing results from 7/1/2014 through 9/30/2014 show that our system exceeds the standard, or maximum contaminant level (MCL), for trihalomethanes (THM) and haloacetic acids (HAA). The standard for THM is 0.080 mg/L and the standard for HAA is 0.060 mg/L. These are determined by averaging all samples collected at each sampling location for the last 12 months. The level of THM averaged at one of our system's locations for 7/1/2014 to 9/30/2014 was 0.101 mg/L and HAA was 0.081 mg/L.

- There is nothing you need to do. You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer. Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer.

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

We are working to minimize the formation of trihalomethanes and haloacetic acids while ensuring we maintain an adequate level of disinfectant. We have taken additional steps to change disinfectant levels, remove natural organic matter, and increased flushing of water lines to determine if our efforts have been effective. We are also monitoring water storage tank levels and water flow patterns within the distribution system. We anticipate resolving the problem within the next quarter but the compliance calculation is based upon annual averages and it may be several quarters before compliance is achieved.

For more information, please contact John Mills at 606-298-3885 or 387 E Main St. Suite 140, Inez, KY 41224.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

### Notice by Martin County Water District – System ID#: KY0800273

Our water system recently violated a drinking water requirement. Although this was not an emergency you have a right to know what happened.

We routinely monitor your water for turbidity (cloudiness). This tells us whether we are effectively filtering the water supply. On 2/23/2015 we had a turbidity result of 1.195 NTU. This was above the standard of 1.0 NTU. Water samples for February 2015 showed that 6.58 percent of turbidity measurements were over 0.3 turbidity units – the standard is that no more than 5 percent of samples may exceed 0.3 turbidity units per month. The turbidity levels are relatively low. However, their persistence is a concern. Normal turbidity levels at our plant are 0.12 units. This is not an emergency. If it had been, you would have been notified within 24 hours.

- There is nothing you need to do. You do not need to boil your water or take other actions. We do not know of any contamination, and none of our testing has shown disease-causing organisms in the drinking water.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

\*Turbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may indicate the presence of disease causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.\* These symptoms are not caused only by organisms in drinking water. If you experience any of these symptoms and they persist, you may want to seek medical advice.

High turbidity on top of the filters occurred when a rake motor failed and due to high demand we had to continue operations. The problem was resolved within three days. For more information, please contact John Mills at (606) 298-3885 or 387 E Main St. Suite 140, Inez, KY 41224.

\*Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.\*

This tells us whether we are effectively fillering the water supply. On 2/23/2015 we had turbidity result of 1.195 NTU. This was above the standard of 1.0 NTU. Water samples for February 2015 showed that 6.58 percent of turbidity easurements were over 0.3 turbidity units – the standard is that no more than 5 percent of samples may exceed 0.3 turbidity units per month. the turbidity levels are relatively low. However, their persistence is a concern. Normal turbidity levels at our plant are 0.12 units. This is not an mergency. If it had been, you would have been notified within 24 hours.

- There is nothing you need to do. You do not need to boil your water or take other actions. We do not know of any contamination, and none of our testing has shown disease-causing organisms in the drinking water.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

Furbidity has no health effects. However, turbidity can interfere with disinfection and provide a medium for microbial growth. Turbidity may dicate the presence of disease causing organisms. These organisms include bacteria, viruses, and paresites which can cause symptoms such s nausee, cramps, diarrhee, and associated headaches.\* These symptoms are not caused only by organisms in drinking water. If you operience any of these symptoms and they persist, you may want to seek medical advice.

igh turbidity on top of the filters occurred when a rake motor failed and due to high demand we had to continue operations. The problem was solved within three days. For more information, please contact John Mills at (606) 298-3885 or 387 E Main St. Suite 140, Inez, KY 41224.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for (ample, people in epartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing spies by hand or mail.\*

2014 Martin County Water District annual water quality report is available. This report contains important information about your drinking water. Please go to http://www.krwa.org/2014ccr/martincounty.pdf to view your 2014 annual water quality report or to request a paper copy call (606) 298-3885.

#### Notice by Martin County Water District - System ID#: KY0800273

ur water system recently violated a drinking water requirement. Although this was not an emergency you have a right to know what happened. It routinely monitor your water for turbidity (cloudiness). This tells us whether we are effectively filtering the water supply. On 2/23/2015 we had turbidity result of 1.195 NTU. This was above the standard of 1.0 NTU. Water samples for February 2015 showed that 6.58 percent of turbidity easurements were over 0.3 turbidity units – the standard is that no more than 5 percent of samples may exceed 0.3 turbidity units per month. The turbidity levels are relatively low. However, their persistence is a concern. Normal turbidity levels at our plant ere 0.12 units. This is not an mergency. If it had been, you would have been notified within 24 hours.

- There is nothing you need to do. You do not need to boil your water or take other actions. We do not know of any contamination, and none of our testing has shown disease-causing organisms in the drinking water.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

Furbidity has no health effects. However, turbidity can Interfere with disinfection and provide a medium for microbial growth. Turbidity may dicate the presence of disease causing organisms. These organisms include bacteria, viruses, and parasites which can cause symptoms such s nausea, cramps, diarrhea, and associated headaches.\* These symptoms are not caused only by organisms in drinking water. ## Notice by Martin County Water District – System ID#: KY0800273

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Testing results from 4/1/2015 through 6/30/2015 show that our system exceeds the standard, or maximum contaminant level (MCL), for trihalomethanes (THM) and haloacetic acids (HAA). The standard for THM is 0.080 mg/L and the standard for HAA is 0.060 mg/L. These are determined by averaging all samples collected at each sampling location for the last 12 months. The level of THM averaged at one of our system's locations for 4/1/2015 to 6/30/2015 was 0.088 mg/L and HAA was 0.077 mg/L.

- There is nothing you need to do. You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer. Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer.

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

We are working to minimize the formation of trihalomethanes and haloacetic acids while ensuring we maintain an adequate level of disinfectant. We have taken additional steps to change disinfectant levels, remove natural organic matter, and increased flushing of water lines to determine if our efforts have been effective. We are also monitoring water storage tank levels and water flow patterns within the distribution system. We anticipate resolving the problem within the next quarter but the compliance calculation is based upon annual averages and it may be several quarters before compliance is achieved.

For more information, please contact John Mills at 606-298-3885 or 387 E Main St. Suite 140, Inez, KY 41224.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

Insert water system same and ID# in header, insert compliance period begin date, end date, and average level. Remove brackets. Do not modify mandatory language!

#### Printing Instructions

This template is designed to print the notice on the back of the water bill sheets prior to printing the water bills using procedures the same as printing a letter,

After the notice has been printed to all sheets place the stack of sheets upside down on a flat surface and place a weight on the stack to remove the curl.

When the stock of sheets have cooled and straightened print the water bills as usual.

### Notice by Martin County Water District – System ID#: KY0800273

Our water system recently violated a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We routinely monitor for the presence of drinking water contaminants. Testing results from 7/1/2015 through 9/30/2015 and 10/1/2015 through 12/31/2015 show that our system exceeds the standard, or maximum contaminant level (MCL), for trihalomethanes (THM) and haloacetic acids (HAA). The standard for THM is 0.080 mg/L and the standard for HAA is 0.060 mg/L. These are determined by averaging all samples collected at each sampling location for the last 12 months. The level of THM averaged at one of our system's locations for 7/1/2015 to 9/30/2015 was 0.081 mg/L and HAA was 0.070 mg/L. The level of THM for 10/1/2015 to 12/31/2015 was 0.100 mg/L.

- There is nothing you need to do. You do not need to boil your water or take other corrective actions. If a situation arises where the water is no longer safe to drink, you will be notified within 24 hours.
- If you have a severely compromised immune system, have an infant, are pregnant, or are elderly, you may be at increased risk and should seek advice from your health care providers about drinking this water.

Some people who drink water containing trihalomethanes in excess of the MCL over many years may experience problems with their liver, kidneys, or central nervous system, and may have an increased risk of getting cancer. Some people who drink water containing haloacetic acids in excess of the MCL over many years may have an increased risk of getting cancer.

This is not an emergency. If it had been an emergency, you would have been notified within 24 hours.

We are working to minimize the formation of disinfection by-products while ensuring we maintain an adequate level of disinfectant. We have taken steps to change disinfectant levels, remove natural organic matter, and increased flushing of water lines. We anticipate resolving the problem within the next six months.

For more information, please contact John Mills at 606-298-3885 or 387 E Main St. Suite 140, Inez, KY 41224.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). MATTHEW G. BEVIN

GOVERNOR

RE: Martin Co Water District -- 2987 Permit No.: KY0800273 Martin County, Kentucky Activity ID: CIN20160002

Dear Martin Co Water Dist:

Attached for your information and records is a copy of the DW Comp-Surface performed at Martin Co Water District on February 22, 2016.

The system should continue efforts to leak detect the distribution system and repair any issues as they are found. Measure should be taken to perform a full system flush twice per year while flushing dead ends as often as needed.

If you have any questions or comments concerning this inspection, please contact the Hazard Regional Office at: (606) 435-6022.

Sincerely,

A D.BK

Robert Back Environmental Inspector Hazard Regional Office Division of Water

**III. Record Keeping Requirements** 

#### **Comments:**

III. Compliance Status - No violations observed

Comments: Wolf creek, Coldwater, Inez 1&2 tanks are not in service. The system does not use these tanks at this time. The System has switched from gas chlorine to liquid bleach disinfectant. The system is using a Thornsorb activated carbon system. The water treatment plant has a 100,000 gallon clearwell at the plant and two 500,000 gallon clearwell tanks on the hill above the plant.

The system needs to perform a complete system flush however approximately 50% water loss and low storage due to distribution leaks in the Warfield area make it difficult. Failure to properly flush the system will make meeting future DBP limits a difficult task.

V. Compliance Status - No violations obs-but impending viol trends obs

| VI. Discharge/Emission Compliance                                                                                                                                                                                                    | 3                        |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

R. Bruce Scott Commissioner

**ENERGY & ENVIRONMENT CABINET** DEPARTMENT FOR ENVIRONNIENTAL PROTECTION Division of Water

### NOTICE OF VIOLATION

MARTIN CO WATER DISTRICT #1 287 E MAIN ST SUITE 140 INEZ, KY 41224

PWSID: KY0800273 PWS Name: MARTIN CO WATER DISTRICT Al ID: 2987 County: MARTIN Violation Number: 2016 - 9951 175 Determination Date: 02/10/2016 Compliance Period: 10/01/2015 - 12/31/2015 Violation Type: 02 MCL, LRAA Tier Level: 2 PWS Facility: IDSE9999 IDSE - MARTN CO WATER DIST Contaminant: 2950 TTHM

Public Water Systems are subject to the requirements of 401 KAR Chapter 8. [401 KAR 8:020 Section 1] This is to advise that you are in violation of the provision(s) cited below:

Description of Non Compliance:

401 KAR 8:510 mHM The public water system exceeded the MCL for locational running annual average (LRAA) of samples for the specific contaminant in compliance period 10/01/2015 - 12/31/2015. The reported result of .123 mg/l exceeded the MCL of 0.080 mg/l,

The remedial measure(s) and date(s) to be completed by are as follows: Begin or continue quarterly monitoring for TTHM

Pertörm public notification for the above-mentioned violation in accordance with 401 KAR 8:070. The public notification must not contain language that contradicts or detracts from the standard mandatory language or the purpose of the notice. Submit proof of public notification and its certification within ten (10) days of executing public notification. [401 KAR 8:070] The specific public notification activilies to be performed are listed below.

PW S must give notice to consumers, including other water systems you may provide water to, about a violation by mail delivery or hand delivery. The notice must be executed within thirty (30) days following receipt by the PWS of this Notice of Violation.

If not all consumers can be notified by mail or hand delivery then the PWS must give notice to consumers about a violation by t) publication in a newspaper of general circulation in the area served by the PWS or 2) by continuous posting in conspicuous places within the area served by the PW S. The notice must be executed within thirty (30) days following receipt by the PWS of this Notice of Violation.

Submit proof of public notification and its certification within ten (10) days of executing public notification.

Violations of the above cited statutes and/or regulations are subject to a civil penalty. Violations carry civil penalties of up to \$25,000 per day per violation depending on the statutes/regulations violated. In addition, violations may be concurrently enjoined. Compliance with remedial measures and their deadlines does not provide exemption from liability for violations during the period of remediation, nor prevent additional remedial measures from being required.

Detailed information about your water system's violations & monitoring requirements can be easily accessed on Kentucky Drinking Water Watch at http://deploateway.ky.gov/DWW/

If you have questions or need further information, write or call Kellee Husband at (502)564-3410 ext 4986 or email at kelleem.husband@kv.gov.

ALL DOCUMENTATION MUST BE SUBMITIED TO:

#### THM & HAA Stage 2 **DBPR** Templete 2-19

Insert water system name and IDS in header. Inset compliance period begin date, end date, and average level, Remove brackets, Do not modify mandatory language!

#### **Printing Instructions**

This template is designed to print the notice on the back of the water bill sheets prior to printing the water bills ing procedures the same as printing a letter.

After the notice has been printed to all sheets place the stack of sheets upside down on a flat surface and place a weight on the stack to remove the curl.

When the stack of sheets have cooled and straightened print the water bills as usual.

Copy and paste notice Prior to paste make suce that the cursor is at the highest point in the text box.

Earl Alley Martin County Water District #1 387 East Main St Suite 140 Inez, KY 41224 Re: Repeat Public Notice Extension AI ID: 2987 PWSID: KY0800273 PWS NAME: Martin County Water District #1 COUNTY: Greenup

Charles G. Snavely

Secretary

R. Bruce Scott

Commissioner

Dear Mr. Alley,

The Division of Water has considered your request and will grant an extension to the required repeat public notice for the ongoing disinfection byproduct MCL exceedance *or* a reduction in frequency of the repeat public notice. This will depend on the Locational Running Annual Average that is calculated for the 4<sup>th</sup> quarter of 2015.

If the water system continues to exceed the MCL for disinfection byproducts for the 4<sup>th</sup> quarter, the water system will use the 4<sup>th</sup> quarter results in the repeat public notice. If the water system comes back into compliance in the 4<sup>th</sup> quarter, the water system will be required to perform a public notice using the 3<sup>rd</sup> quarter results.

The public notice shall be performed no later than February 10th, 2016.

It is not required for the water system to receive a 4<sup>th</sup> quarter Notice of Violation before issuing the public notice. The water system may issue the notice as soon as they receive 4<sup>th</sup> quarter TTHM analysis results and can make a determination whether or not they are in compliance for the 4<sup>th</sup> quarter.

Please note all violations shall be listed in the 2015 Consumer Confidence Report.

If you have any questions or concerns, please contact Brook Overbay at (502) 564–3410, extension 4958. Or ashlee.overbay@ky.gov

Sincerely,

Brook Overbay Compliance Section Division of Water

#### NOTICE OF VIOLATION

To: MARTIN CO WATER DISTRICT #1 287 E MAIN ST SUITE 140 INEZ, KY 41224

PWSID: KY0800273 PWS Name: MARTIN CO WATER DISTRICT #1 AI ID: 2987 County: MARTIN Violation Number: 2016 - 9951173 Determination Date: 11/09/2015 Compliance Period: 07/01/2015 - 09/30/2015 Violation Type: 02 MCL, LRAA Ticr Level: 2 PWS Facility: IDSE9999 IDSE - MARTN CO WATER DIST Contaminaut: 2456 TOTAL HALOACETIC ACIDS (HAA5)

Public Water Systems are subject to the requirements of 401 KAR Chapter 8. [401 KAR 8:020 Section 1] This is to advise that you are in violation of the provision(s) cited below:

#### **Description of Non Compliance:**

401 KÅR 8:510 TOTAL HALOACETIC ACIDS (HAA5) The public water system exceeded the MCL for locational running annual average (LRAA) of samples for the specific contaminant in compliance period 07/01/2015 - 09/30/2015. The reported result of .07 mg/l exceeded the MCL of 0.060 mg/l.

### The remedial measure(s) and date(s) to be completed by are as follows:

Begin or continue quarterly monitoring for TOTAL HALOACETIC ACIDS (HAA5)

Perform public notification for the above-mentioned violation in accordance with 401 KAR 8:070. The public notification must not contain language that contradicts or detracts from the standard mandatory language or the purpose of the notice. Submit proof of public notification and its certification within ten (10) days of executing public notification. [401 KAR 8:070] The specific public notification activities to be performed are listed below.

PWS must give notice to consumers, including other water systems you may provide water to, about a violation by mail delivery or hand delivery. The notice must be executed within thirty (30) days following receipt by the PWS of this Notice of Violation.

If not all consumers can be notified by mail or hand delivery then the PWS must give notice to consumers about a violation by 1) publication in a newspaper of general circulation in the area served by the PWS or 2) by continuous posting in conspicuous places within the area served by the PWS. The notice must be executed within thirty (30) days following receipt by the PWS of this Notice of Violation.

Submit proof of public notification and its certification within ten (10) days of executing public notification.

Violations of the above cited statutes and/or regulations are subject to a civil penalty. Violations carry civil penalties of up to \$25,000 per day per violation depending on the statutes/regulations violated. In addition, violations may be concurrently enjoined. Compliance with remedial measures and their deadlines does not provide exemption from liability for violations during the period of remediation, nor prevent additional remedial measures from being required.

Detailed information about your water system's violations & monitoring requirements can be easily accessed on Kentucky Drinking Water Watch at <u>http://dep.gateway.ky.gov/DWW/</u>
