COMMISSION

Jon Coker ,

COMPLAINANT

VS.

CONSUMER COMPLAINT re Case 2016-00152

Duke Energy also known as Duke Energy Kentucky and many other names,

DEFENDANT

\*\*\*\*

Notice to Kentucky PSC and all other parties: This Letter of complaint is in reference to the wireless utility meters that the utility companies and the Kentucky PSC are trying to force on our homes, schools and businesses.

The Complaint of Jon Coker respectfully shows:

- (a) Jon Coker, 800 Cannonside Drive, Louisville, Kentucky 40207
- (b) Duke Energy Kentucky 139 East Fourth Street P.O. Box 960 Cincinnati, Ohio 45201 also addressed as LG&E and KU Energy LLC 220 West Main Street P.O. Box 32010 Louisville, Kentucky 40232
- (c) Kentucky Public Service Commission P.O. Box 615, 211 Sower Boulevard, Frankfort, Kentucky 40602-0615

**(d)**

**(e)** That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky and all its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC

making it very clear that these Smart Meters, AMS Meters, AMR Meters, AMI Meters, ERT Meters, ie...wireless meters

on their homes and businesses. These illnesses include but are not limited to watering eyes, blurred vision, headaches, dementia, heart palpitations, heart attacks, strokes, difficulty breathing, joint pain, involuntary sterilization, sudden graying and aging, thyroid deficiency, electricity poisoning, cancer, vomiting, dizziness, and just overall a lousy feeling with cloudy thinking and severe fatigue;

**(f)** That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky and all its Utility Companies; as well as the Ky PSC, OH PSC, NC PSC, and SC PSC are aware and

- (g) That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky, all of its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC know and are aware that these wireless frequencies were tested on a plastic head and that the FCC and Safety standards are outdated and focus on thermal RF (i.e. heated tissue). Scientists have identified non-thermal biological effects well below these guidelines and state that these
- . Also worth noting: while utilities state that smart meters are “not expected to cause harmful interference” with vital medical equipment, this has not been the experience of individuals living with wireless meters, particularly those with a pacemaker. **Wireless meters were designed based on outdated guidelines and biased research.**
- (h) That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky, all of its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC know and are aware that switching from analog meters to wireless meters consists of 2-way communications capabilities which violate our privacy and **does not address the critical issues of the core infrastructure of the electricity grid.** In other words, we still have the same above-ground wires that require the same infrastructure maintenance and upgrading requirements with the same vulnerabilities, plus some additional vulnerabilities that this 2-way communication system exposes us to, such as
- ; ; ;
- (i) That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky, all of its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC are well aware of the privacy violations , increased costs, financial losses, and dangers of these wireless meters.
- (j) That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky, all of its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC are well aware that

(k) That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky, all of its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC are well aware of the electrical shorts, explosions, and fires caused by these wireless meters. They are aware that these wireless frequencies are causing a problem to homes wiring due to harmonics on the lines.

(l) That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky, all of its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC are well aware that according to research

See Case Files listed below and documentation here:

(m) That Kentucky Utilities, Kenergy, Duke Energy, Duke Energy Kentucky, all of its Utility Companies, as well as the Ky PSC, OH PSC, NC PSC, and SC PSC are well aware that the **cost of paying “meter readers” and providing jobs is much more efficient than all the detrimental consequences associated with the installation of these wireless meters.**

(n) That doctors, scientists, and the public are reporting illnesses (and some died) after being exposed to various Wireless Meters that had been placed on their homes without their permission as well as on businesses they worked for. Their trees, shrubs, flowers and a variety of wildlife that inhabited their homes yards suddenly became diseased, and/ or died, and disappeared. Their homes also started experiencing a variety of electrical interruptions, shortages, and electrical equipment catching fire after the installation of these wireless meters.

(o) That millions of people, animals, plants, and trees are already dying from long term and accumulation exposure to these wireless frequencies which can be easily verified by reading the public comments from utility customers as well as the case files mentioned above.

(p) That lawsuits are being filed (and won) and the costs associated with utility bills, continual wireless meter replacement (no longevity like the safe analog meters), loss of privacy, quality of life, life itself, and personal

(q) property

(r) have utilized deceptive practices regarding notifying the public of the detrimental effects of these wireless meters as well as untimely notification and vague references to applications made by Duke Energy and other utility companies in regards to the installation of these wireless meters.

(s) That providing opt-outs is not a solution to stopping the exposure levels because many of the population are still uneducated as to the dangerous effects of these wireless meters.

(t) That opt-outs are extortion fees because the precedence has always been set for analog meters to be read by meter readers and customers have only agreed to having analog meters. Therefore charging a fee to continue using an analog meter is extortion.

(u) That the excuse "it is costing too much for having employees to read the analog meters" is not valid, because the utility companies have always used meter readers. If they do not wish to support the economy by retaining their employees, then an easy solution is for the customer to take a picture of the analog meter on the required "Read Date" and the camera used would have the date stamp as well as the ID of the meter. These could be faxed or mailed in! A precedence has also already been set for this as many customers costs were estimated and then customers mailed in cards with their actual meter read written on them.

WHEREFORE, COMPLAINANT asks that:

**1. Case No: 2016-00152**

**Application of Duke Energy Kentucky, (INC) For (1) A Certificate of Public Convenience and Necessity Authorizing the Construction of an Advanced Metering Infrastructure; (2) Request for Accounting Treatment; And (3) All other Necessary Waivers, Approvals, and Relief**

2. That no wireless devices of any kind be permitted to be installed by any utility companies due to their numerous violations, unaffordable costs, and the health damages they cause to people, animals, plants, trees, and the environment.

Dated: December 26, 2016, in Louisville, Kentucky

Respectfully Submitted without permission to post personal information on the internet:
