COMMONWEALTH OF KENTUCKY
BEFORE THE PUBLIC SERVICE COMMISSION

IN THE MATTER OF:

APPLICATION OF BIG RIVERS ELECTRIC CORPORATION FOR A DECLARATORY ORDER ) CASE NO. 2016-00278

CITY OF HENDERSON, KENTUCKY, AND HENDERSON UTILITY COMMISSION d/b/a HENDERSON MUNICIPAL POWER & LIGHT'S RESPONSES TO COMMISSION STAFF'S FIRST REQUEST FOR INFORMATION
BIG RIVERS ELECTRIC CORPORATION

APPLICATION OF BIG RIVERS ELECTRIC CORPORATION
FOR A DECLARATORY ORDER
CASE NO. 2016-00278

VERIFICATION

I, Gary Quick, General Manager of Henderson Municipal Power & Light, verify, state, and affirm that the data request responses filed with this verification for which I am listed as a witness are true and accurate to the best of my knowledge, information, and belief formed after a reasonable inquiry.

Gary Quick

COMMONWEALTH OF KENTUCKY
COUNTY OF HENDERSON

SUBSCRIBED AND SWORN TO before me by Gary Quick on this the 17th day of November, 2016.

Notary Public, Kentucky State at Large #559438
My Commission Expires July 18, 2020
REQUEST NO. 1: Refer to the Direct Testimony of Gary Quick ("Quick Testimony"), page 4, lines 23-25, which state that "[e]ach party is responsible for its proportionate share of the annual net rated generating capacity expense associated with Station Two." Confirm that this statement indicates that Henderson acknowledges it is responsible for the expenses associated with the energy produced by its reserved capacity of Station Two. If this cannot be confirmed, explain.

RESPONSE: An appropriate response to this request requires an explanation of the distinction between expenses associated with reserved capacity, and expenses associated with the actual generation of energy. Expenses associated with reserved capacity are those expenses which are incurred whether or not capacity is used to generate energy. As explained in my testimony, Henderson acknowledges that each party is responsible for its proportionate share of these "capacity" expenses. The net rated generating capacity of Station Two is 312 MW. Under the current capacity split, Henderson is therefore responsible for capacity expenses associated with its current annual reserved capacity of 115 MW (36.86 percent of total net rated generating capacity), while Big Rivers is responsible for capacity expenses associated with the 197 MW of capacity (63.14 percent of total net rated generating capacity) currently allocated to Big Rivers. The actual use of capacity to generate energy results in additional "variable" expenses, i.e. the cost of coal and lime used in the generation process, which are the responsibility of the party that either takes the energy for its own use, or schedules the energy for sale to third parties. Henderson thus is responsible for capacity expenses associated with its reserved capacity, but is not responsible for variable expenses associated with the generation of energy from its reserved capacity, unless Henderson elects to take or schedule the energy.

WITNESS: Gary Quick
REQUEST NO. 2: Refer to the Quick Testimony, page 5, lines 14-18.

a. Provide details of each instance in which “Big Rivers refused to allow
Henderson to schedule or take its energy for sale to third parties.”

b. Explain in detail how Big Rivers “continues to deprive Henderson of energy
associated with its reserved capacity....”

c. Explain in detail how Henderson notifies Big Rivers of its intention to “take
its energy for sale to third parties,” and when that notice is provided.

RESPONSE:

a. As evidenced by the correspondence attached hereto as Exhibit 1, Henderson has
notified Big Rivers on multiple occasions that it wished to schedule its excess energy for sale to
third parties, and has submitted on more than one occasion a proposed protocol for doing so. Big
Rivers has repeatedly rejected Henderson’s requests. Big Rivers’ refusal to approve a scheduling
protocol effectively has prevented Henderson from scheduling its energy for sale to third parties
in every hour of every day since July 16, 2009, the date of the Unwind Transaction in which Big
Rivers regained functional control of its electrical system from Western Kentucky Energy Corp.,
a subsidiary of E.On LLC.

b. Big Rivers to date continues to refuse to approve a scheduling protocol that would
allow Henderson to offer its excess energy associated with its reserved capacity for sale to third
parties. Rather, Big Rivers takes and sells this energy for its own benefit when it is profitable to
do so, or, under its new practice effective June 1, 2016, purports to sell the energy into the
currently unprofitable MISO market on Henderson’s behalf, and attempts to pass the resulting
losses along to Henderson. Under either scenario, Henderson is prevented from deciding whether
energy associated with its reserved capacity will be generated, and, if so, how to dispose of that energy.

c. Big Rivers has refused, and continues to refuse, to accept Henderson’s scheduling proposal setting forth notice requirements and other procedures for the sale of Henderson’s excess energy to third parties. Because no procedures are in place that would allow Henderson to solicit firm or bona fide third-party offers for its excess energy, or to notify Big Rivers that it had received such an offer, Henderson is effectively precluded from providing such notice to Big Rivers.

WITNESS: Gary Quick
REQUEST NO. 3: Refer to the Quick Testimony, page 6, lines 22-23, through page 7, lines 1-3, which state as follows: “In the event that Henderson’s reserved capacity is used to generate energy above Henderson’s native load, the energy above native load does not become ‘Excess Henderson Energy’ until and unless Henderson elects to either not schedule or not take the energy for its own use, or offer the energy for sale to third parties.”

a. Provide a detailed explanation regarding the process by which Henderson elects to either not schedule or not take for Henderson’s own use, the Station Two energy that is generated above Henderson’s native load. Include in this explanation in both words and numbers the distinction between Excess Henderson Energy, as that term in defined in the Power Sales Contract, as compared to “mere ‘excess’ or ‘surplus’ energy, which is that energy which exceeds the amount Henderson needs to serve its native load in a given period of time, but is equal to or less than the amount of energy associated with Henderson’s capacity reservation for that given period of time.”

b. Explain why any energy is generated above Henderson’s native load if Henderson elects to either not schedule or not take the Station Two energy above Henderson’s native load.

RESPONSE:

a. Section 3.8 of the Power Sales Contract defines “Excess Henderson Energy” as energy within Henderson’s reserved capacity that is “not scheduled or taken by City [Henderson].” Accordingly, energy which Henderson either takes for its own use, or schedules for sale to third parties, does not meet the contractual definition of “Excess Henderson Energy.” This energy is merely that energy which exceeds Henderson’s native load in a given time period,
but is within Henderson’s reserved capacity for that time period, and is therefore available for
Henderson to either schedule or take.

The amount of energy Henderson takes in a given time period is an amount equal
to its native load, i.e. the amount of energy required to serve the electrical needs of the city and
its inhabitants for that time period, plus any other energy within its reserved capacity that
Henderson may take or schedule for sale to third parties. For example, Henderson currently
reserves 115 megawatts of Station Two capacity, with the remaining 197 megawatts allocated to
Big Rivers. If Henderson’s native load in a given time period is 70 megawatt hours, then
Henderson takes 70 megawatt hours of energy during that time period. If the remaining 45
megawatt hours of energy that are within Henderson’s reserved capacity are generated, then
Henderson has the option of taking or scheduling that energy for sale to third parties, subject
only to Big Rivers’ first right to match a firm or bona fide third-party offer. As stated previously,
Henderson has submitted a proposed protocol for scheduling such third-party sales, and Big
Rivers has repeatedly rejected the proposal. There currently exists no process whereby
Henderson decides whether to schedule or not schedule its energy which exceeds its native load,
but is within its reserved capacity. This is because, under the existing scenario, there is no
decision to make; Henderson has been denied the opportunity to exercise its option to schedule
or take its energy for sale to third parties. Such energy thus is not being scheduled by default.

b. Big Rivers is the party who has physical control of the Station Two generation
facilities, and, as such, is ultimately the party in control of what energy is and is not generated.
Henderson is unable to provide an explanation for Big Rivers’ decision to generate and take
“Excess Henderson Energy,” i.e. energy which is above Henderson’s native load and within
Henderson’s reserved capacity, but which Henderson does not schedule and does not take.
WITNESS: Gary Quick
REQUEST NO. 4: Refer to the Quick Testimony, page 7, lines 22-24. Explain whether
Henderson agrees with Big Rivers’ position that Station Two Units 1 and 2 must run at a
minimum of 115 MW and 120 MW, respectively, in order to maintain safe and reliable
operation.

RESPONSE: Henderson has not been provided, nor is it aware of the existence of, any
empirical data that would support Big Rivers’ position concerning the minimum generation
levels necessary for the Station Two Units to remain in safe and reliable operation. Therefore,
Henderson is unable to state whether it agrees or disagrees with Big Rivers’ assertion.

WITNESS: Gary Quick
REQUEST NO. 5: Refer to the Quick Testimony, page 9, lines 1-9. Provide an update of the meeting that was to take place on October 26, 2016.

RESPONSE: Representatives of both parties met as scheduled on October 26, 2016, for the purpose of exploring potential options that would allow Big Rivers to idle one or both of the Station Two Units. The parties were unable to reach an agreement.

WITNESS: Gary Quick
REQUEST NO. 6: Refer to the Quick Testimony, page 10, lines 1-3. Provide a detailed explanation for Henderson's assertion that an issue exists as to whether Big Rivers has raised an issue that falls within the Commission's jurisdiction over rates and service.

RESPONSE: Although Big Rivers has characterized its application as a request for enforcement of a contract, the request is better characterized as a request for the Commission to improperly engage in contractual interpretation, and alter the rights and responsibilities of the parties under a privately negotiated contract. Neither KRS 278.200 nor KRS 278.030, the statutes Big Rivers cites in its request for relief, provide the Commission with authority to grant the request.

The question Big Rivers presents in no way involves the regulation of utility rates or service within the meaning of KRS Chapter 278, and thus is insufficient to invoke exclusive Commission jurisdiction, or to trigger the inevitable and otherwise impermissible infringement of Henderson's contract rights. Henderson is not a "utility" as defined in KRS 278.010(3)(a), and thus is generally exempt from Commission regulation.

Big Rivers and Henderson are parties to a contract governing the operation of the Station Two facility for the production of power. The Power Sales Contract, as amended, sets forth the process for reserving and allocating capacity and the related energy to each party, and establishes the procedure to be followed by each party in taking its respective share of capacity and energy either for the provision of utility service to its own customers, or to offer for sale to third parties. Nothing in the Power Sales Contract establishes rates for utility service, or parameters for the delivery of such service. Nothing in the Contract calls for either party to furnish utility service to the other, or to pay or collect a rate in compensation for such service. The Contract embodies the unique relationship between the parties and the peculiar rights and obligations arising from it.
The Contract bears no relation to rates or service at all, much less usual service to the public generally. Even were Big Rivers to argue that an interpretation of certain contractual provisions in Henderson’s favor would potentially impact the rates and/or quantity or quality of utility service to its customers, such an argument would be premature, and the impact would be no more than speculative. A request to interpret a contract for fear of uncertain collateral effects is still a request for contractual interpretation, and, absent involvement of rates or service, exceeds the scope of the Commission’s jurisdiction.

The jurisdiction of the Commission is strictly limited by statute to the regulation of rates and service, and was not intended to usurp functions properly left to the courts, or to impede the contract rights of municipalities where rates or service are not impacted.

For all of these reasons, there exist significant issues related to the Commission’s jurisdiction over this dispute, and counsel should be afforded an opportunity to address those issues.

WITNESS: Gary Quick
REQUEST NO. 7: Will Henderson allow Big Rivers to idle or place in standby service one or both units of Station Two when it is uneconomical to operate the units? If not, explain why not.

RESPONSE: Henderson has advised Big Rivers that Henderson is unaware of any contractual provision that would permit Big Rivers to idle one or both of the Station Two Units for economic or market reasons. Henderson has not advised Big Rivers that there exist no set of circumstances under which Henderson would agree for one or both units to be idled or placed into standby service. However, Henderson is unable to entertain Big Rivers’ proposal in its current form, as the proposal provides no assurance to Henderson that energy associated with its reserved capacity would continue to be available at no increased cost to Henderson. Furthermore, Henderson remains concerned that a plan to cycle the Station Two Units on and off in accordance with market conditions would ultimately have a catastrophic impact on the aged units. Henderson would support the hiring, at Big Rivers’ expense, of a qualified, independent, third party to conduct an engineering study for the purpose of addressing this concern.

Dear Jim:

My client is in receipt of the July 8, 2016, correspondence and attachment referenced in your email of July 12, 2016, and is compelled to point out that Big Rivers is simply incorrect when it asserts that Henderson has been unwilling to extend a proposal for scheduling sales of its energy. To the contrary, Henderson has provided detailed proposals both during and after the arbitration proceeding and the subsequent legal challenges to the Arbitration Award. Furthermore, Henderson paid the expense to bring representatives of The Energy Authority (TEA) from Jacksonville, Florida, to Henderson for a meeting with Big Rivers. The TEA representatives explained in detail how Henderson would schedule its energy. Subsequent to the meeting, TEA responded to additional questions Big Rivers presented. Unfortunately, after all of the expense and time Henderson put forward, Big Rivers merely rejected the proposal out of hand. Big Rivers’ most recent rejection is consistent with its prior rejections of Henderson’s proposals. Big Rivers has in fact been on notice since before the closing of the 2009 Unwind Transaction that Henderson wished to establish a procedure for scheduling its energy.

On July 13, 2012, Henderson submitted to Big Rivers a proposal detailing the process whereby Henderson would schedule its energy for sale to third parties. Big Rivers rejected the proposal, arguing in part that the proposal was based upon a flawed Arbitration Award that Big Rivers was seeking to vacate. On October 27, 2015, Henderson resubmitted the proposal. Big Rivers again rejected Henderson’s proposal, this time raising numerous logistical and operational objections. Henderson pointed out that Big Rivers’ position had been rejected by the courts, and that the objections it continued to raise are addressed in the parties’ contracts, and in MISO procedural rules.

Henderson stands by the specific scheduling proposal it has now advanced on two separate occasions: in July 2012, shortly after the arbitration panel issued its award, and in October 2015, roughly two months after the Kentucky Supreme Court put to rest any further legal contest as to the validity of the Arbitration Award. Please respond at your earliest convenience with either an acceptance or a rejection of that proposal.

Sincerely,

H. RANDALL REDDING

RE: Scheduling of Excess Henderson Energy

Dear Gary:

I wrote you and The Energy Authority ("TEA") on March 28, 2016, suggesting that the best path to establishing an agreed protocol by which HMP&L may schedule, take and market Excess Henderson Energy through TEA would be for HMP&L or TEA to draft a proposed procedure that the parties could follow through each step of the process. TEA had provided details about the principal scheduling steps it anticipates, and we did not believe the remaining commercial and contractual requirements for such a transaction would be difficult to resolve. We renewed this request in my letters to you of May 25, 2016, and June 3, 2016. We never received a draft procedure in response.

We do not know why HMP&L has been unwilling to provide Big Rivers with a proposed comprehensive protocol, but we remain very interested in putting a procedure in place. Big Rivers understands and accepts that HMP&L has the right to propose a firm and bona fide offer for Excess Henderson Energy, and when HMP&L eventually does so Big Rivers wants to have the commercial arrangements in place so the transaction can proceed smoothly.

As you know, Big Rivers has ongoing concerns regarding whether the scheduling process previously offered by TEA or any use of the financial scheduling process meets the requirements of the arbitration award. But despite these reservations, and without waiving them, Big Rivers attaches to this letter for HMP&L's consideration a draft, comprehensive protocol for handling of Excess Henderson Energy transactions based upon the TEA proposal. This is proposed in an effort to resolve the commercial issues surrounding future Excess Henderson Energy transactions, and is not an admission of any kind by Big Rivers.
We look forward to hearing from you about the attached protocol. When agreement to a protocol is reached, we would anticipate attaching it to a simple letter agreement signed by both parties that would promptly be submitted by Big Rivers for any approvals that may be necessary.

Respectfully,

Procedure for Administering Excess Henderson Energy

July 8, 2016

Preliminary

1. Henderson Municipal Power and Light ("HMPL") will be registered as a MISO Asset Owner ("AO") under the Energy Authority ("TEA") as a market participant.
2. TEA will post Contracts 1 and 2 as described below in the MISO Portal with HMPL as the Buyer and BREC as the Seller. One contract will specify Unit 1 as the source and the other will specify Unit 2 as the source.
3. TEA will post Contracts 3 and 4 as described below in the MISO Portal with TEA as the Buyer and HMPL as the Seller. One contract will specify Unit 1 as the source and the other will specify Unit 2 as the source.
4. The term "Excess Energy" used in this procedure has the meaning given to "excess energy" and "Excess Henderson Energy" in the May 30, 2012 award in the arbitration between BREC and the City of Henderson and HMPL.

Hi Pat:

I don't know how this ended up being sent to the City of Henderson, but obviously that should not have been done. I don't have the Services Agreement in front of me, perhaps someone misread the language. You should not send any billing or include any reference on your billing to the City of Henderson. Perhaps the confusion is the “City of Henderson Utility Commission” is HMP&L. We are indeed a separate entity from the City. Send all TEA billings to:

Henderson Municipal Power & Light
100 Fifth Street
PO Box 8
Henderson, Kentucky 42419-0008

I'm just not sure how you ended up sending a bill to the City. We (HMP&L) have always received your prior billings and paid them. Someone must have changed something in your accounting department. Again, just send the bill to us and let me know if you find out what has taken place. We will pay the billing statements as soon as we receive them.

Thanks, Gary

Gary

Good afternoon.

Has there been a change in billing policy at HMP&L?

Thanks

Pat

Subject: FW: TEA Risk Advisor Services Agreement for June
Hi Pat,

Can you help clarify this discrepancy with me? I have been sending the invoices to the same address since January and they are being paid. Should they have been going to a different contact? If so, please let me know who to direct this invoice to and invoices going forward. The Risk Advisor Agreement is with the City of Henderson, but the contact information references HMPL.

I apologize for any confusion.

Thank you for our help,
Daina

Operating Day Minus One (OD-1) Option 1

1. When authorized by HMPL, TEA will communicate a bid ("firm bona fide offer") to BREC in writing by 0800 EST MISO Market Time or in any event no later than three hours before the MISO Day-Ahead Market Submittal Deadline for the next day or days.
   a. The quantity of the firm bona fide offer would be calculated by TEA using a TEA hourly forecast of HMPL load and the HMPL Station 2 Reservation Quantity.
   b. It is not required that the firm bona fide offer be for all hours for which Excess Energy is expected.
   c. A firm bona fide offer for any hour would include a fixed quantity and fixed price.
   d. If no firm bona fide offer is received by 0800 EST or in any event no later than three hours before the MISO Day-Ahead Market Submittal Deadline, it will be assumed that there is no such offer.

2. BREC would notify TEA by 1000 EST MISO Market Time or in any event no later than one hour before the MISO Day-Ahead Market Submittal Deadline as to whether it was exercising Option 1, the right to purchase the Excess Energy at the same terms as indicated in the firm bona fide offer. HMPL would be responsible for the fixed and variable costs of generating the energy in accordance with existing contractual obligations.
   a. If BREC does not respond by 1000 EST or in any event no later than one hour before the MISO Day-Ahead Market Submittal Deadline, it would be assumed that BREC was declining to exercise its Option 1.
   b. BREC Option 1 would require acceptance of all terms of the firm bona fide offer; that is, BREC could not select some hours and not others.
   c. If BREC does not exercise its Option 1, HMPL will accept the firm bona fide offer.

Operating Day Minus One Option 2

1. If no firm bona fide offer were submitted to BREC for consideration, BREC may exercise its right to purchase Excess Energy by paying $1.50/MWh and its existing contractual obligation for the variable cost of generating the Excess Energy taken by BREC. In the event BREC exercises this right, it will provide HMPL with notice at the end of each calendar month of the amount of Excess Energy, if any, purchased by it during the previous month.

2. HMPL will retain the Excess Energy and remain responsible for the fixed and variable costs attributable to generating the Excess Energy except as otherwise expressly provided in this procedure.

Operating Day (OD)

1. TEA will submit a series of FinScheds by 1200 MISO Market Time on the OD, with the Source, Sink, and Delivery Point designated as BREC HMP1 or BREC HMP2 (whichever is appropriate)
   a. FinSched 1 under Contract 1 or 2 will be for all Excess Energy in each hour, with HMPL as the Buyer and BREC as the Seller.
      i. If BREC exercises its Option 1, the FinSched 1 quantity for any hour for which BREC was exercising its Option 1 would be reduced by the Excess Energy quantity.
      ii. If BREC exercises its Option 2, the FinSched 1 quantity for any hour for which BREC was exercising its Option 2 would be reduced by the Excess Energy quantity.
b. FinSched 2 under Contract 3 or 4 will be for all Excess Energy sold through the firm bona fide offer, with
TEA as the Buyer and HMPL as the Seller
2. BREC will confirm FinSched 1 before the MISO FinSched Deadline for the appropriate Operating Day.
3. TEA will confirm FinSched 2 before the MISO FinSched Deadline for the appropriate Operating Day.

Monthly MISO Settlements

1. Monthly MISO settlements would include the following
   a. HMPL would receive all of the MISO Day-Ahead (DA) Energy revenues associated with the Excess Energy
      for those hours for which there was no firm bona fide offer, BREC did not exercise its Option 1, and BREC
      did not exercise its Option 2. These revenues would appear in the TEA settlement statements under the
      HMPL asset owner.
   b. TEA would receive the MISO DA Energy revenues associated with the hours and quantities in the bona
      fide offer for which BREC did not exercise its Option 1,
   c. BREC would receive the MISO DA Energy revenue associated with the hours and quantities of its
      exercise of Option 1 or its exercise of Option 2.
   d. MISO Administrative Charges applicable to the FinScheds would flow to the Buyers and Sellers
      designated in the FinScheds.

Monthly Invoicing

1. HMPL will invoice TEA under the terms of any firm bona fide offer for which BREC did not exercise its Option 1
   based upon the quantities and prices for each hour.
2. HMPL will invoice BREC under the terms of any firm bona fide offer for which BREC did exercise its Option 1,
   based upon the quantities and prices for each hour.
3. If BREC exercises its Option 2, BREC will be responsible to HMPL in accordance with its existing contractual
   obligations for $1.50/MWh times the number of MWh purchased under Option 2 and the associated variable
   costs of generating that energy.
4. HMPL will be obligated to BREC for Station 2 variable costs as follows:
   a. For any hour in which actual Station 2 net generation is greater than the HMPL Station 2 Reservation
      Quantity, HMPL will be responsible in accordance with its existing contractual arrangements for the
      variable costs of the amount of energy associated with the HMPL Station 2 Reservation Quantity,
      reduced by any MWhs sold to BREC under Option 2.
      i. Additionally, if the sum of HMPL actual load and Excess Energy sold under a firm bona fide offer
         or BREC Option 1 is greater than the amount of energy associated with the HMPL Station 2
         Reservation Quantity, BREC will charge and invoice HMPL at the Station 2 MISO Real-Time
         Locational Marginal Price for the amount of that energy that exceeds the amount of energy
         associated with the HMPL Station 2 Reservation Quantity.
   b. For any hour in which actual Station 2 net generation is less than the HMPL Station Two Reservation
      Quantity, HMPL will pay variable costs based upon actual Station 2 generation, reduced by any MWhs
      sold to BREC under Option 2.
      i. Additionally, if the sum of HMPL actual Load and Excess Energy sold under a firm bona fide offer
         or BREC Option 1 is greater than Station 2 net generation, BREC will charge and invoice HMPL
         at the Station 2 MISO Real-Time Locational Marginal Price for the amount of that energy that
         exceeds the actual Station 2 net generation.
It was great meeting you and Bob. This email is a follow up to our January 27 meeting and is subject to the same agreed terms and conditions set out in the January 15, 2016, Letter Agreement signed by Gary Quick and Robert Berry. We’re glad you asked for clarification because neither of the “Approaches” outlined in your January 28 email accurately reflects the process that Matt and I described during our January 27 Meeting. Here is a summary of our proposed process including additional scheduling details for your consideration. As stated, we will do our best to accommodate any timeline changes to meet BREC scheduling needs. In addition, it probably goes without saying, but please note that although TEA’s name is used throughout the below, our relationship with Henderson is strictly contractual, and subject to change without any adverse impact to the below. Please let us know if you have any questions.

- TEA would register HPL an Asset Owner with MISO under the TEA Market Participant
- When authorized by HPL, TEA would communicate a bona fide firm offer to BREC via email by 0800 EST/EDT for the next day, weekends; and/or holidays
- The firm offer would be predicated on hourly volumes within HPL’s Annual Reserved Capacity
- The firm offer may not be explicit to every hour (i.e. Bid may only be for hours ending 5 through hours ending 23 EST/EDT)
- BREC will assess the offer with ACES and notify TEA by 0900 EST/EDT via recorded phone call as to whether or not it intends to exercise its first right of refusal and TEA will confirm the phone call
- If BREC has not notified TEA of a decision concerning the exercise of its first right of refusal by 0900 EST/EDT then TEA and Henderson will proceed as if BREC had affirmatively declined to exercise its first right of refusal
- BREC’s decision to exercise or to not exercise its first right of refusal will be for the entire schedule (i.e. No “cherry picking” hours)
- If BREC chooses to exercise its first right of refusal, the existing billing process with HPL will be maintained and BREC will pay the offer price
- If BREC decides not to exercise its first right of refusal, (or if it fails to exercise the right before 0900 EST/EDT) TEA will populate a Day Ahead (DA) MISO Finsched in the MISO portal with the schedule volumes by 1200 EST/EDT of transaction date
- The MISO Finsched will be predicated on a long-term MISO Finsched Contract with the defined “Source”, “Sink”, & “Delivery Point” designated as the resource bus
- BREC would agree to confirm the Finsched volumes by 1600 EST/EDT on the transaction date
- Both parties agree that all times will be flexible to accommodate all parties and potential FERC 809 implications
June 17, 2016

Mr. Bob Berry
Big Rivers Electric Corporation
PO Box 24
Henderson, KY 42419-0024

Dear Bob:

I am writing in response to your letter of June 3, 2016. My letter dated May 31 was clear, and I have nothing to add except to say that in your June 3 letter you once again misstate the facts. Consequently, I do not believe that there is any need for us to meet to discuss Henderson's and Big Rivers' respective positions. We would encourage you to consult with your attorneys.

Sincerely,

Gary Quick
General Manager
Henderson Municipal Power & Light
June 3, 2016

Mr. Gary Quick  
Henderson Municipal Power and Light  
P. O. Box 8  
Henderson, KY 42419

Dear Gary:

I have your response of May 31, 2016, to my letter to you of May 25, 2016. If I correctly understand your response, you disagree generally with everything in my letter, but provide no specifics about why you believe I am wrong on any individual point. You also said nothing directly about my statement that we had received no response to my letter dated March 28, 2016, to you and TEA. Do you plan to respond to that letter?

I certainly intend to state facts correctly, and do not understand how the Station Two Contracts can be interpreted differently. You must be seeing something in the Station Two Contracts that I do not. We need to meet immediately so you can help me understand your reasoning and why you believe Big Rivers should be required to purchase excess energy owned by HMP&L when Big Rivers does not want it. Please give me some dates in the next two weeks when we can meet, wherever you want, to talk about these issues. In the meantime, Big Rivers intends to proceed as outlined in my May 25 letter.

Sincerely yours,

Robert W. Berry  
President and CEO  
Big Rivers Electric Corporation

Re: Power Sales Contract between the City of Henderson, Kentucky and Big Rivers Rural Electric Cooperative Corporation dated August 1, 1970, as amended — Section 3.8

Dear Gary:

As you are aware, Big Rivers Electric Corporation (hereinafter “Big Rivers”) has for some time now been in discussions with the City of Henderson, Kentucky (hereinafter “City”) regarding the ongoing costs associated with generating power from Station Two. On multiple occasions over the last year, Big Rivers has advised the City that power often can be purchased on the wholesale market for less than the variable costs associated with producing power at Station Two. Because the power generated from Station Two during these time periods is not economically competitive, Big Rivers has recommended various alternatives to the City regarding modifications that should be made to the ongoing operations of Station Two to help maintain the economic competitiveness of the power being produced from Station Two and lower the costs of serving the load of both Big Rivers and the City. In particular, Big Rivers recommended to the City that at least one of the Station Two units be idled until such time as it becomes economically competitive to resume generation of electricity from both units on a full time basis. Up to this point, however, the City has not been interested in this approach, or any other approach recommended by Big Rivers to address the reliability issues associated with the generation of power from Station Two when it is not needed to serve either party’s existing load by selling the Excess Henderson Energy into the market at a loss.

As a general matter, Big Rivers has historically exercised its rights under Section 3.8(a) of the Power Sales Contract between the City and Big Rivers dated August 1, 1970, as amended (hereinafter “Contract”) by purchasing energy associated with the City’s reserved capacity from Station Two that has not been scheduled or taken by the City (such energy being referred to hereinafter as “Excess Henderson Energy”). In addition, Big Rivers has compensated the City in accordance with the terms of Section 3.8(c) of the Contract when it has exercised this right to purchase and utilize the Excess Henderson Energy, including providing, at its own cost, the full replacement of all fuels and reagents consumed from Station Two fuel and reagent reserves for the production of the Excess Henderson Energy and paying the portion of the sludge disposal costs attributable to the Excess Henderson Energy (hereinafter collectively referred to as...
“Variable Costs”). Given changes in the marketplace, particularly the low price of natural gas, there have been an increasing number of hours when Big Rivers has purchased Excess Henderson Energy even when the Variable Costs of producing it have exceeded the prevailing market price for energy, resulting in Big Rivers assuming responsibility for the Excess Henderson Energy at a financial loss to itself.

While it has historically been Big Rivers' practice to take and utilize the Excess Henderson Energy each month, thereby allowing the City to avoid the Variable Costs noted above, and Big Rivers has compensated the City accordingly, there is nothing in Section 3.8(a) that imposes upon Big Rivers any obligation to take and pay for the Excess Henderson Energy and associated Variable Costs. To the contrary, Section 3.8(a) provides that in the event that the City does not take the full amount of energy associated with its reserved capacity from Station Two, Big Rivers may, at its discretion, take and utilize all such energy (or any portion thereof designated by Big Rivers) not scheduled or taken by the City. The purpose of this letter is to provide you with notice that beginning no later than June 1, 2016, from time to time Big Rivers may not take and utilize the Excess Henderson Energy generated from Station Two as it has voluntarily done in the past, especially in light of the fact that the Excess Henderson Energy being produced is often not economically competitive. Please understand that this does not mean that Big Rivers will never exercise its rights under Section 3.8(a) to take and utilize all, or a portion of, such energy not scheduled or taken by the City as permitted under the Contract. Indeed, at times, Big Rivers fully intends to take and utilize the Excess Henderson Energy. But, in the spirit of cooperation and in consideration of the longstanding relationship of the parties, Big Rivers deems it advisable to provide you with advance notice of its change in practice concerning the Excess Henderson Energy described above. Hopefully, this notice will allow the City to plan accordingly for this change as it deems necessary or advisable.

Going forward, Big Rivers will continue to provide the City with notice at the end of each calendar month of the amount of Excess Henderson Energy, if any, taken by Big Rivers during the previous month as set forth in Section 3.8(c) of the Contract. In addition, Big Rivers will continue to pay the City for such Excess Henderson Energy, and will continue to be responsible for the associated Variable Costs, in the manner set forth in the Contract for that portion of the Excess Henderson Energy, if any, taken by Big Rivers during the previous month. In the event that there is Excess Henderson Energy generated that Big Rivers has not taken pursuant to Section 3.8(a), the City will remain responsible for the Variable Costs attributable to the Excess Henderson Energy in accordance with the terms of the various agreements between the parties. Additionally, the City will no longer receive the $1.50 per MWh for that portion of the Excess Henderson Energy not taken by Big Rivers during the previous calendar month.

As you know from my letter dated March 28, 2016, Big Rivers and the City are continuing to make progress toward reaching a mutually acceptable agreement whereby The Energy Authority (hereinafter “TEA”) will act as a Market Participant on behalf of the City related to Excess Henderson Energy. To date, however, the City has not responded to that letter. Therefore, until such time as Big Rivers and the City are able to reach an agreement on the manner in which TEA will assist the City with the sale of the Excess Henderson
Energy into the market, Big Rivers will continue to assist the City in delivery of the Excess Henderson Energy which is generated yet not taken by Big Rivers and will allocate to the City the revenues, if any, from the Excess Henderson Energy not taken by Big Rivers less any associated costs of delivery incurred by Big Rivers.

In the event this letter generates any questions or warrants further discussion, please do not hesitate to contact me.

Sincerely yours,

Hi Pat:

Here you go; the authorization was dated in October 2010. Please note that I apparently sent copies of the email authorization to BREC and MISO. Let me know if you need any additional information. If you need a recent approval, just drop me a note and I will respond.

Thanks, Gary
Good Afternoon:

Thank you for taking the time to visit with us. Please accept this email as formal authorization for The Energy Authority to represent Henderson Municipal Power & Light in discussions with the Midwest ISO and the Big Rivers Electric Corporation regarding MISO membership, market participation, and registration of the Henderson Station Two Generation Facilities.

Please note that I have sent copies of this authorization to representatives of the Midwest ISO and the Big Rivers Electric Corporation.

Thank you, Gary
Gary Quick

Re: Scheduling Excess Henderson Energy through TEA

Dear Pat and Gary:

In letters dated October 27, 2015, and November 13, 2015, Gary expressed HMPL’s desire to schedule Excess Henderson Energy (“EHE”) through TEA (“Proposed TEA Scheduling”). In the spirit of cooperation and as a means of engaging in the dialogue necessary to arriving at an approach acceptable to the parties, Big Rivers remains interested in gaining a better understanding as to how the Proposed TEA Scheduling would work in practice and is hopeful you are willing to provide that information.

First, seemingly the best way to gain a better understanding of the Proposed TEA Scheduling would be for HMPL or TEA to draft a proposed procedure the parties would follow, which would detail the process from submission of the offer by TEA through MISO settlement and invoicing. Please include a sample proposal in written form in the format that TEA expects it would use to present a third party firm, bona fide offer to Big Rivers for purchase of EHE in the future. We would appreciate your providing that as soon as possible.

Second, although Big Rivers has not yet concluded its analysis of the Proposed TEA Scheduling and therefore has not necessarily identified all the potential issues that would be involved in such an approach, it would be helpful to our analysis if you could confirm that the following terms would apply to the Proposed TEA Scheduling:
1. HMPL would bear the variable expenses/costs for EHE that is sold to TEA or Big Rivers at the offer price from a third party.

2. HMPL would bear the risk of any change in the volume of EHE due to load forecast error or variance in Station Two generation.

3. As to any EHE not purchased by TEA pursuant to a bona fide, firm offer, or by Big Rivers by matching that offer, Big Rivers will have the right but not the obligation to purchase that EHE pursuant to Section 3.8(c) of the Power Sales Contract, i.e., $1.50 per MWh plus variable costs associated with this energy.

4. Relatedly, if TEA does not submit a bid for EHE, Big Rivers does not exercise its right to purchase EHE at $1.50/MWh, and Station Two cannot be backed down low enough to eliminate EHE, HMPL would bear the financial responsibility for EHE.

We remain hopeful the parties can productively discuss the Proposed TEA Scheduling. Nonetheless, in sending this letter Big Rivers does not concede that the Proposed TEA Scheduling is consistent with the arbitration award and reserves its rights on the issue.

We look forward to your response.

Regards,

Robert W. Berry
March 17, 2011

Mr. Gary Quick
General Manager
Henderson Municipal Power & Light
P. O. Box 8
Henderson, KY 42420

Dear Gary:

I am writing in regard to your letter of February 10, 2011 and March 9, 2011 follow-up telephone conference among representatives of Big Rivers Electric Corporation ("Big Rivers"), Henderson Municipal Power & Light ("HMPL"), and The Energy Authority ("TEA"). As I understand it, the purpose of the February 10 letter and March 19 telephone conference was to inform Big Rivers of HMPL's desire for TEA to assist HMPL in selling the energy output associated with HMPL's capacity reservation from Station II into the Midwest ISO market, and to request Big Rivers' consent and cooperation in facilitating those efforts. Your February 10 letter asks that Big Rivers "let [you] know [its] reaction to using the proposed Finsched process."

Big Rivers cannot consent or otherwise agree to the arrangement you have proposed. As you are well aware, Big Rivers and HMPL are currently in arbitration before a AAA panel concerning this very issue – i.e., whether HMPL has the right under the Power Sales Contract, as amended, to market and sell energy associated with its capacity reservation that is in excess of the hour-to-hour needs of the City of Henderson and its inhabitants, without first giving Big Rivers the opportunity to purchase such energy at the contractually-specified price of $1.50/MWh (with Big Rivers providing fuel and other variable costs). Big Rivers has consistently and vigorously denied that HMPL possesses any such right under the terms of the Power Sales Contract. The primary relief sought by Big Rivers in the pending arbitration is an award declaring that HMPL has no right to sell energy associated with its capacity reservation to third parties without first making that energy available to Big Rivers at $1.50/MWh, as expressly provided in Section 3.8 of the parties' Power Sales Contract. For Big Rivers to agree to the process you now propose would be tantamount to surrendering the very issue we are currently litigating. Big Rivers cannot agree to that.

Big Rivers has reviewed the Power Sales Contract, and is aware of no provision in that agreement (or any other agreement between Big Rivers and HMPL) that would obligate Big Rivers to assist or consent to the type of arrangement you have proposed. Indeed, any such arrangement would be in direct contravention of the express terms of the Power Sales Contract. If you disagree, I would ask that you please identify, in writing, the contractual provisions that you contend impose such an obligation on Big Rivers.

Sincerely yours,

Re: Communications between TEA and Big Rivers

Gentlemen:

In January of this year, at the insistence of Henderson, Big Rivers and Henderson executed an agreement designating the meeting(s) between TEA and Big Rivers confidential and not to be used in litigation.

On February 12, 2015, Henderson filed a “Petition for an Award of Damages” in Henderson Circuit Court. In its petition, Henderson accuses Big Rivers of “the wrongful seizure and utilization of Henderson’s Excess Energy and generating capacity” and that this “continue(s) to cause Henderson to suffer monetary loss.” Such an allegation is belied by the ongoing discussions between TEA and Big Rivers, where the parties are endeavoring to develop a mutually-acceptable resolution that would enable Henderson to sell the Excess Energy to third parties.

Big Rivers remains committed to arriving at an acceptable protocol for the sale of Excess Energy with TEA. Nonetheless, in light of the ongoing litigation brought by Henderson and the contentions made by Henderson, it would be unnecessarily confusing and misleading to continue communications between TEA and Big Rivers in secret. Accordingly, Big Rivers places Henderson on notice pursuant to this letter that Big Rivers does not intend for any future communications between any party on the subject of the sale of Excess Energy to be confidential.
Very truly yours,

C. Scott

RE: Excess Henderson Energy

Dear Bob:

This is to memorialize the terms and conditions upon which HMP&L will agree to a meeting proposed in your letter to me of December 11, 2015. If BREC still wants to have a meeting please and return a copy of this letter to me.

HMP&L expressly denies that the questions posed in your November 5, 2015, letter invoke any genuine obstacles to HMP&L’s sales of Excess Henderson Energy. The purpose of this meeting, an effort, on HMP&L’s part, to resolve and compromise a disputed claim. It is agreed, therefore, that the occurrence of the meeting, all discussions that take place during the course of the meeting, any follow up conferences, and any minutes or other records prepared in connection with the meeting shall be kept strictly confidential, and shall not be offered as evidence, or admitted in evidence, in any judicial or arbitral forum at any time. BREC and HMP&L further agree that there will be no tape or other voice recording of the meeting’s discussions.

The meeting will take place at HMP&L’s office on January 22, 2016, at 9:30 a.m. local time. BREC and HMP&L will each send no more than two representatives to the meeting. These representatives will be either members of BREC’s and HMP&L’s respective operational staffs, or employees, of ACES or TEA who participate as subject matter consultants to BREC or HMP&L, respectively. No attorneys will attend or participate in the meeting.

Sincerely yours,

Gary Quick

On behalf of Big Rivers Electric Corporation, the above terms and conditions are accepted:

Cc: Theresa
Subject: Meeting

Greg,

Bob Berry and Mark Eacret at BREC do not understand why Gary wishes to limit attendance to two representatives total from among Big Rivers. For the meeting to have the best chance of success, there should be at least one operational representative from each of
those organizations. Otherwise, since they all need to be consulted, the danger of missing key input at the meeting – along with the danger of miscommunication after the meeting – is high and would needlessly delay progress. Big Rivers would welcome others from Gary’s organization to attend, but we request that there not be an artificial limitation to the number of attendees. Nonetheless, if Gary refuses to permit more than two representatives from our side, Bob and Mark will participate. They have a strong preference for January 22.

We also request one slight change to the confidentiality agreement. In the interest of all parties, if the meeting is unsuccessful and litigation cannot be avoided, the parties should be able to inform the court that in response to the exchange of letters late last year a meeting did in fact occur, but did not result in a resolution of the dispute. That would place those (admissible) letters in their proper context. Of course, we fully agree that nothing from the meeting can be disclosed to others, whether or not in a litigation context. Please let us know if you agree with this change.

I look forward to hearing back from you as soon as possible.

Scott

Hi Pat:

I will run the dates by Big Rivers and get back to you. I thought you would need a travel day coming in to Henderson, a day for the meeting (even if the meeting only takes a couple of hours), and a travel day going back to Jacksonville. Anyway, we can talk about this. Also, we can schedule a one hour call anything that works for you and Matt prior to the meeting.

I can call you now, but let me know if you want me to call your cell phone or office number.

Gary

Gary,

Happy New Year!

Would either of the following dates work?

- 1/21-1/22
- 1/25-1/26

Also, Matt and I would like to schedule a one hour conference call with you prior to our trip so I can get Matt up to speed on the history of the Big Rivers/ Henderson dispute as well as the current state of the plant from an operational perspective.

Would you have five minutes to speak today?

Thanks

Pat

Hi Pat:

Would you check with Matt Johnson and let me know when you and Matt could come to Henderson for a meeting with Big Rivers concerning the scheduling of Excess Henderson Energy?? It would help if you could give me a couple of schedule options.

After you respond, I will visit with Big Rivers and get back to you. I hope we can find a time and date that works for everyone; in advance, thanks for helping us.

Gary
Hi Mark:

The TEA representative sent me a note a few minutes ago and said that they could be available for a meeting on Thursday, January 21 or Friday, January 22. The other option is Monday January 25 or Tuesday January 26.

Let me know your reaction. Thanks, Gary

Gary,

I hope that your new year is off to a good start.

We spoke in mid-December about scheduling a meeting with TEA on Excess Energy. Have you been able to identify any dates that work for them yet? I can be available just about any time over the next few weeks except for 1/12 and 1/14 and, if necessary, I could move some things around and 1/12 would be possible.

Regards,

Mark Eacret

Hi Mark,

I am checking with our representative at TEA to see when he could make the trip to Henderson. Our representative is Patrick McGarry and he would bring Mr. Matt [redacted] (also with TEA) with him to attend the meeting. I will contact you as soon as I hear back from Mr. McGarry.

As I discussed with you during our previous phone call, Henderson will have only two representatives attending the meeting. Attached is a proposed draft of a Letter of Understanding for the meeting; it is addressed to Bob Berry since he is the individual who signed the December 11 letter. Please share the draft letter with Bob and see if it is acceptable.

Please don’t hesitate to call if you have questions. Thank you, Gary

RE: Excess Henderson Energy

Dear Bob:

This is to memorialize the terms and conditions upon which HMP&L will agree to a meeting as proposed in your letter to me of December 11, 2015. If BREC still wants to have a meeting please sign and return a copy of this letter to me.

HMP&L expressly denies that the questions posed in your November 5, 2015, letter involve any genuine obstacles to HMP&L’s sales of Excess Henderson Energy. The purpose of this meeting is an effort, on HMP&L’s part, to resolve and compromise a disputed claim. It is agreed, therefore, that the occurrence of the meeting, all discussions that take place during the course of the meeting, any follow up conferences, and any minutes or other records prepared in connection with the meeting shall be kept strictly confidential, shall be disclosed only to legal counsel for BREC and HMP&L, and shall not be offered as evidence, or admitted in evidence, in any judicial or arbitral forum at any time. BREC and HMP&L further agree that there will be no tape or other voice recording of the meeting’s discussions.

The meeting will take place on January ___, 2016, at __________ a.m./p.m. BREC and HMP&L will each send no more than two representatives to the meeting. These representatives will be either members of BREC’s and HMP&L’s respective operational staffs, or employees of ACES or TEA who participate as subject matter consultants to BREC or HMP&L, respectively. No attorneys will attend or participate in the meeting.

Sincerely yours,

Gary Quick

On behalf of Big Rivers Electric Corporation, the above terms and conditions are accepted:

Re: Excess Henderson Energy – Request for Meeting

Dear Gary:

I am in receipt of your November 13, 2015 letter, which I received via mail on November 18, 2015.

You asked me to identify the point of contact at Big Rivers for scheduling power. That person is
Mark Barret, Vice President of Energy Services at Big Rivers. His direct dial number is [REDACTED].

If HMP&L has a firm, bonafide third party offer to present to Big Rivers, we encourage
you to provide the required notice to Mr. Barret. He will be prepared to take your call.

In response to your October 27 letter we went to the MISO portal where you said a MISO contract
was awaiting our approval, and were unable to find any such contract. In addition, the MISO
RinSched mechanism is complicated, it operates under multiple constructs, and certain constructs
may not necessarily comply with the arbitration award. It is very important that Big Rivers
understand the details of your plans in advance, and identify and resolve in advance any issues
with those plans. The questions posed in my November 5, 2015, letter are important, real
questions, which are not answered by the Power Sales Contract, as amended (the “Contract”), the
arbitration award or the related judicial opinions. As you know, the Contract and 1998
Amendments were executed before the centralized MISO energy market was even created. Indeed,
Chairman Pemberton’s separate concurring opinion specifically stated that the arbitration award
does not take into account the operation of the MISO market.

I am concerned you read my November 5 request for a meeting as mere posturing. It was not. Big
Rivers and HMP&L are by necessity parties to a long-term relationship due to the Contract. The
only way our relationship can function well is if the parties are able to have periodic discussions.
Big Rivers genuinely desires to work with HMP&L on this issue. We acknowledge that the
arbitration award provides for HMP&L’s ownership rights with regard to Excess Henderson
Energy, subject to Big Rivers’ right of first refusal. It is simply our view that it is imperative for
the parties to meet to discuss in good faith the operational details governing how any third party

Your Touchstone Energy Cooperative
sales of Excess Henderson Energy are to be handled. It is our sincere hope that through these discussions the parties could resolve any open questions and avoid further costly litigation.

We continue to reserve our rights on this dispute, but we are earnest about wanting a meeting and hope you will reconsider. If you are willing to sit down with us, please provide us dates that may work for you.

Sincerely,

Re: Excess Henderson Energy

Dear Bob:

This responds to your letter dated November 5, 2015.

My letter to you of October 27, 2015, sets out in detail HMPL’s plan to market Excess Henderson Energy in accordance with the terms of the Power Sales Contract as amended, and requests that you identify the point of contact at BREC with whom HMPL may work to schedule its energy. Your November 5 response does nothing more than raise the same obstacles that were rejected by the Arbitration Panel and three levels of Kentucky trial and appellate courts. I disagree that we need to negotiate further protocols or agreements. That is the same argument rejected by the Panel and the Courts. BREC is thoroughly familiar with the terms of the Power Sales Contract and the now final judgment interpreting it. Moreover BREC is a MISO Market Participant and well aware that the questions posed in your letter are all answered by the terms of the Power Sales Contract and by the manner in which energy sales are conducted through MISO, including long term capacity sales to entities outside the MISO footprint.

Please let me know by December 14, 2015, if BREC is going to comply with its contractual obligations and cooperate with implementation of HMPL’s plan as set out in my October 27 letter, and designate the point of contact at BREC with whom HMPL may work to schedule its energy. If you will not provide this confirmation and information by that date then we will initiate legal action to enforce Henderson’s rights as defined by the Arbitration and Court decisions.

I look forward to hearing from you.

Sincerely,

Gary Quick

Re: Scheduling of Excess Henderson Energy

Dear Gary:

This will acknowledge receipt of your letter dated October 27, 2015, which I received on November 2.

The proposal you outlined in your October 27, 2015 letter is identical to the proposal you made in July 2012. Big Rivers' response to that proposal in July 2012 — in addition to questioning whether the type of purely financial transactions embodied in MISO FinScheds are compatible with the Power Sales Contract, as interpreted in the Arbitration Award — identified a number of logistical and operational details that your proposal failed to address, and which would need to be resolved before it could be put into practice. As HMPL never provided a response to our inquiries, the issues raised in that response remain unanswered.

We continue to have questions about whether the proposed FinSched process is compatible with the Power Sales Contract, as amended, and the Arbitration Award. Nonetheless, we want to be responsive to your proposal for scheduling Excess Henderson Energy with the hope that, through open discussion among us, the parties could potentially move toward an agreed-upon approach to Excess Henderson Energy which complies fully with the Arbitration Award.

In order to do that, however, a number of issues must be discussed and addressed, as indicated in Big Rivers' July 2012 letter. For example (and this list is by no means exhaustive) agreement would need to be reached about the following:

1. What priority would be given to HMPL's sales of Excess Henderson Energy, particularly in relationship to Big Rivers' rights to receive energy from the Station II capacity that it has paid for?

2. What are the characteristics of a "firm" and "bonafide" offer under the award that Big Rivers would be obligated to match if it desires to purchase the Excess Henderson Energy? How can Big Rivers verify the terms of any third party offer?

3. Which party is responsible for providing HMPL's day-ahead forecast each day used to determine the amount of Excess Henderson Energy to be offered to third parties, and who bears the risk of errors in the forecast?
4. What happens if the Excess Henderson Energy committed to third parties becomes unavailable in real time due to outage, derate, HMPL’s underestimation of its native load needs, or MISO’s decision not to dispatch the units at sufficient levels to cover a third party sale?

5. What are Big Rivers’ remedies if it agrees to purchase the Excess Energy and that energy is not available?

6. What is Big Rivers’ backup obligation for any proposed third-party transactions?

7. How would settlement be handled between Big Rivers and HMPL for third party sales?

8. How are MISO administrative and other expenses to be handled? What about transmission and congestion-related charges?

To move us closer to a possible resolution, we suggest representatives from HMPL and Big Rivers find a convenient day and time to meet to discuss your proposal and, if possible, memorialize in writing any consensus we may reach on how these issues are to be handled. It is our hope that this meeting will permit the parties to execute an agreed-upon protocol. Given interest in this matter, I have advised them of your proposal and representatives would like to join our discussions. Could you please provide some dates that would work for this meeting.

I look forward to hearing from you soon.

Sincerely yours,

[Signature]

Robert W. Berry
President and CEO
Big Rivers Electric Corporation
October 27, 2015

Mr. Bob Berry  
President  
Big Rivers Electric Corporation  
201 Third Street  
Henderson, KY 42420

Dear Bob:

Henderson ("HMPL") is proposing the following process to begin scheduling our Excess Energy from our Henderson Station Two Facility (CP node BRBC.HMP2). Initially, HMPL will pursue day-ahead sales of its Excess Energy using MISO Financial Schedules ("FinSched"). Over a period of time HMPL may change its process for selling its Excess Energy, but currently HMPL will use the process described herein. To achieve this, HMPL proposes the attached MISO Contract defining terms with which Henderson and Big Rivers Electric Corporation (BREC) could use to create MISO FinScheds for energy. Our expectation is that this process would begin shortly after October 27, 2015, and could be a daily exercise, performed on business days before the next day, weekend, and holiday schedules ("Day-ahead Schedules"). In order to begin this MISO FinSched process, the first step would be for BREC, as Market Participant for Henderson Station Two, to approve the attached underlying MISO Contract. The proposed MISO Contract for FinScheds would not change BREC’s current scheduling process for Henderson’s native load and resources under the carve out status. The FinSched would involve the scheduling of Excess Energy between Henderson’s native load and its Annual Reserved Capacity.

HMPL proposes that the following processes be executed by our respective scheduling agents.

- The amount of HMPL’s available hourly Excess Energy will be an amount up to its Annual Reserved Capacity minus its hourly native forecasted loads. From the resulting amount of energy, HMPL will develop an hourly schedule of Excess Energy that it desires to offer for third party sales.

- Firm third party bids to purchase HMPL’s desired sale schedule, with pricing, will be provided to BREC no later than 8:00 a.m. EPT on the business day before the transaction.

- BREC will provide HMPL notice of its intent to accept or reject the purchase no later than 10:30 a.m. EPT on the business day before the transaction. BREC’s failure to respond by 10:30 a.m. EPT will be an assumed rejection of the purchase. An accepted transaction by BREC must match the firm third party purchaser’s hourly megawatt hours scheduled and prices.

- Please note that all times may be subject to change pending approval of MISO’s response to Order No. 809.
As opportunities for physical bilateral transactions occur, HMP&L’s scheduling agent will manage the acquisition of the necessary transmission services, tagging, and will be responsible for managing real-time changes. Please let me know who we should contact at Big Rivers to begin the process of scheduling Henderson’s Excess Energy.

Sincerely,

Gary Quick

Hi Pat:

I have a question concerning the MISO Contract document that will be attached to the letter we are sending to BREC. The document shows "Effective Start (Est) 7/1/2012" and "Effective End (Est) 1/1/2016." I'm merely wondering if the two dates are correct. I'm not saying the dates are wrong; I just want to make sure the dates are correct before we send the letter.

Again, we appreciate all of the help you have provided to Henderson.

Thanks, Gary

Re: Big Rivers Electric Corp v. City of Henderson, Kentucky, et al

Dear Mr. Redding:

Thank you for your letter of September 14, 2015, and your follow up letter of September 28, 2015. We have discussed these with Big Rivers. As an initial matter, please be assured that Big Rivers fully intends to comply with the terms of the Power Sales Contract as clarified by the May 31, 2012 arbitration award.

Big Rivers does not agree that the award entitles Henderson in any way to the damages sought in your demand. Your September 14 letter states — and your September 28 letter confirms — that the damages represent HMPL's "total fixed expenses" allegedly associated with Excess Henderson Energy. While there appear to be numerous problems with your calculations, the most fundamental is that award recognizes no right by Henderson to recover any fixed costs allegedly associated with Excess Henderson Energy. Furthermore, the award recognized no entitlement to any past damages, regardless of how they might be calculated.

The award clarified the process whereby HMPL may seek more than the price set forth in Section 3.8(c) of the Power Sales Contract for Excess Henderson Energy. Specifically, HMPL may, if it chooses, obtain a firm and bona fide offer from a third party to purchase some quantity of Excess Henderson Energy. If it does so, then Henderson must present that offer to Big Rivers. Big Rivers may then match the offer or allow HMPL to sell the Excess Henderson Energy to the third party according to the terms of the original offer. To date, HMPL has never presented Big Rivers with a firm and bona fide third-party offer to purchase any Excess Henderson Energy, so any such energy was available to be purchased by Big Rivers at the price set forth in Section 3.8(c). Nothing in the Power Sales Contract, as interpreted by the award, provides any basis for HMPL to recover fixed costs associated with Excess Henderson Energy which is taken under the contract by Big Rivers at the default contractual price.
With regard to the Excess Henderson Energy going forward, you also urge Big Rivers to "cease any ongoing sales" of such energy. However, you offer no legal basis for your demand. As noted above, Big Rivers has the absolute right to take such energy, at the price set forth in Section 3.8(c), unless HMPL presents a firm and bona fide offer from a third party to purchase such energy at a higher price. The logistics associated with this is something that HMPL and Big Rivers would need to resolve. We recall Gary Quick making a comment to that effect following the issuance of the arbitration award. We also understand from your recent conversation with Jim Miller that we should be expecting a letter from Greg Haynes addressing those logistical issues. Please advise if HMPL is willing to meet and present a proposal for those logistics.

Respecting your demand for historical damages, however, Big Rivers does not believe there is any legal basis for the demands made in your September 14, 2015 letter. We invite you to set forth the alleged authority undergirding these claims in greater detail if you believe this analysis is mistaken or has overlooked anything in the Power Sales Contract or the arbitration award.

Sincerely,

[Signature]

Theresa A.

Gary

If it’s ok, I would like to call you. What number would be best?

Also, I would like to invite Jamie (VP Client Services) and Matt (Director-RTO Trading) to our discussion. Back in 2012 & 2013, Matt assisted Sam and I on the research and he will be a good asset if we have any “deep detail” questions.

Looking forward to speaking to you again. I spoke to Sam last night and he said to say hello!

Thanks

Pat

I am interested in visiting with you about the Excess Henderson Energy issue. The Kentucky Supreme Court issued an Order last week in favor of Henderson and I would like to visit with you about the process of scheduling energy and how the MISO market works. We may want to (or need to) enter another formal agreement with TEA.

Anyway, when you have some time, please call. Thank you and if you see Sam tell him we said hello.

Gary
August 20, 2015

Pat:

Thanks for taking the time to visit with us this morning.

Attached is a copy of the July 13, 2012, letter we discussed. Let us know if you need anything.

Thank you.

Gary
July 13, 2012

Mr. Mark Bailey
President
Big Rivers Electric Corporation
201 Third Street
Henderson, KY 42420

Dear Mark:

In response to Scott Greene’s letter dated June 28, 2012, Henderson (“HMPL”) offers the following process to begin scheduling our Excess Energy from our Henderson Station Two Facility (CP node BREC.HMP2). Initially, HMPL will pursue day-ahead sales of its Excess Energy using MISO Financial Schedules (“FinSched”). Over time HMPL may change its process for selling its Excess Energy, but currently HMPL will use the process described herein.

To achieve this, HMPL proposes the attached MISO Contract defining terms with which Henderson and Big Rivers Electric Corporation (BREC) could use to create MISO FinScheds for energy. Our expectation is that this process would begin on or shortly after July 23, 2012, and could be a daily exercise, performed on business days before the next day, weekend, and NERC holiday schedules (“Day-ahead Schedules”). In order to begin this MISO FinSched process, the first step would be for BREC, as Market Participant for Henderson Station Two, to approve the attached underlying MISO Contract. The proposed MISO Contract for FinScheds would not change BREC’s current scheduling process for Henderson’s native load and resources under the carve out status. The FinSched would involve the scheduling of Excess Energy between Henderson’s native load and its Annual Reserved Capacity.

HMPL proposes that the following processes be executed by our respective scheduling agents.

- The amount of HMPL’s available hourly Excess Energy will be based on its Annual Reserved Capacity minus its hourly forecasted loads. From the resulting amount of energy, HMPL will develop an hourly schedule of Excess Energy that it desires to offer for third party sales.
- Firm third party bids to purchase HMPL’s desired sale schedule, with pricing, will be provided to BREC no later than 8:00 a.m. EPT on the business day before the transaction.
- BREC will provide HMPL notice of its intent to accept or reject the purchase no later than 10:30 a.m. EPT on the business day before the transaction. BREC’s failure to respond by 10:30 a.m. EPT will be an assumed rejection of the purchase. An accepted transaction by BREC must match the firm third party purchaser’s hourly megawatt hours scheduled and prices.
As opportunities for physical bilateral transactions occur, HMPL's scheduling agent will manage the acquisition of the necessary transmission services, tagging, and will be responsible for managing real-time changes. Please let me know who we should contact at Big Rivers to begin the process of scheduling our Excess Energy.

Sincerely,

Gary Quick

Mr. Gary Quick
General Manager
Henderson Municipal Power & Light
P.O. Box 8
Henderson, KY 42419-0008

Dear Gary:

In accordance with Section 14.1 of the Power Plant Construction and Operation Agreement between the City of Henderson Kentucky (the City) and Big Rivers Electric Corporation (Big Rivers), dated as of August 1, 1970, as amended by the Amendments to Contracts dated May 1, 1993, Amendments to Contracts dated July 15, 1998, and 2005 Amendments to Contracts dated April 1, 2005 (the Operating Agreement), Big Rivers submitted the proposed operating budget for Station Two for the fiscal year beginning June 1, 2013, and ending May 31, 2014, to the City on March 1, 2013. Having now incorporated appropriate revisions resulting from review with HMP&L Station Two management, Big Rivers hereby submits this annual operating budget. Following the adoption by the City of the June 1, 2013, through May 31, 2014, Station Two operating budget, it will become the basis for monthly payments made by the City to Big Rivers for the City's Station Two cost-share during such year, payable on or before the 20th of each month. Please note the attached letter dated June 7, 2013, from Bob Berry, Chief Operating Officer, to Wayne Thompson, regarding Big Rivers exception related to MISO administration fees.

Please direct any questions you may have regarding any element of this proposed budget to me at [redacted].

Sincerely,

June 7, 2013

Wayne Henderson
Henderson Municipal Power & Light
100 Fifth Street
Henderson, KY 42420

Dear Wayne:

Thank you for taking the time to meet with Big Rivers on May 17, 2013, to attempt to resolve the issues regarding the 2013-2014 Station II fiscal budget. As you know, HMP&L has requested Big Rivers to defer certain maintenance projects at Station II based on its disagreement of certain items that were submitted by Big Rivers in the 2013-2014 fiscal budget. HMP&L has also denied the approval of the 2013-2014 fiscal budget due to the MISO administration fees included in the budget.

Subsequent to the May 17, 2013, meeting, Big Rivers conceded or provided the requested information to resolve all of the budget items with the exception of the MISO administration fees. In the spirit of cooperation, please find attached the revised HMP&L Station II budget which reflects all of your requested changes including the removal of the MISO administration fees.

Although Big Rivers has agreed to remove from the proposed Annual Budget the MISO cost incurred by Big Rivers in connection with its operation and maintenance of Station Two in compliance with applicable regulatory and legal standards, Big Rivers reserves and does not waive its right to demand recovery of the City's share of those cost from HMP&L and the City. We are hopeful this will resolve the issues with the Annual Budget and HMP&L will approve the revised 2013-2014 fiscal budget. Please contact me if you have any additional questions.

Sincerely,

Robert W. Berry
Chief Operating Officer
Big Rivers Electric Corporation
Good Morning Sam:

I wanted to let you know that yesterday Big Rivers filed a motion to appeal the Circuit Court's decision and the Arbitrator's final award in the Excess Henderson Energy dispute. I will contact you in the near future.

Thanks, Gary
Hi Sam:

I wanted you and the staff at TEA to see the letter from Big Rivers concerning the Henderson Energy. I will be in contact with you and I will keep you informed.

Gary

---

Good Afternoon Gary,

I hope this message finds you well. Please find attached my response to your letter to me dated July 13, 2012.

Regards,

Mark

VIA E-MAIL AND FIRST CLASS MAIL

Mr. Gary Quick
Henderson Municipal Power & Light
100 Fifth Street
P.O. Box 8
Henderson, Kentucky 42419-0008

RE: Scheduling of Excess Henderson Energy

Dear Gary:

This responds to your letter of July 13, 2012, in which you propose a process for scheduling “Excess Energy” from Station II utilizing—albeit initially—MISO Financial Schedules. While Big Rivers appreciates your providing a written response to Mr. Greene’s June 28, 2012, letter, Big Rivers cannot and does not agree with your scheduling proposal.

As you now know, Big Rivers has initiated vacatur proceedings with the Henderson Circuit Court, seeking an order vacating the award upon which HMPL purports to be relying in making its July 13 proposal. It is Big Rivers’ position that the arbitration award is defective on a number of levels, and we think it unwise to use it as a basis for developing a scheduling approach that contradicts the terms of the Power Sales Agreement.

Even without the Motion to Vacate, Big Rivers disagrees with the process you have proposed. Your proposal is inconsistent with the Panel’s award on numerous levels. For example, you have proposed use of a MISO process, even though Mr. Pemberton’s concurrence expressly questioned the applicability of MISO in the award. Similarly, you have proposed a purely financial process, but we believe the award contemplates only physical bilateral transactions. We also do not believe that the FinSched process you propose meets the “firm” and “bona fide” offer requirements of the award, and have concluded that it would require contract amendments or a new contract between the parties, which are not required by the Power Sales Agreement or the arbitration award. Additionally, you have defined Excess Energy as the difference between HMPL’s annual capacity reservation and hourly forecasted load, but both the Contract and the award define Excess Energy as the difference between HMPL’s capacity reservation and actual load.

Moreover, while you have offered some detail with your proposal, it still fails to address a host of important questions that must be resolved before any scheduling could be put into practice. The issues that remain open include, but are not limited to: (1) the characteristics of a “firm” and
“bonafide” third-party offer that Henderson believes Big Rivers would be obligated to match under the Award; (2) Big Rivers’ backup obligations for the proposed transactions; (3) how settlement will be handled between Big Rivers and Henderson for third-party sales, and how settlement will be affected in the event Excess Energy is unavailable from Station II to cover a sale, either due to an outage or derate of Station II or Henderson’s under-estimation of its native load needs in a given hour; (4) Big Rivers’ remedies in the event Big Rivers agrees to purchase the Excess Energy and that Excess Energy is not available from Station II; (5) the form of confirmation or verification Henderson would provide Big Rivers so it can verify the terms of third party offer; (6) how transmission and congestion-related charges will be handled; and (7) how MISO administrative and other expenses will be handled. Each would need to be fully considered and addressed.

Your letter referenced an intention to begin the proposed MISO financial transactions as early as July 23, 2012. For the reasons articulated, we believe such transactions would be entirely inappropriate at this time.

Sincerely,

Mark Bailey
President and CEO
Big Rivers Electric Corporation

June 28, 2012

VIA ELECTRONIC AND U.S. MAIL

Dear Greg:

This will acknowledge receipt of your letter dated June 26, 2012. Pursuant to your request, we will respond to that letter on or before July 13, 2012.

In the meantime, on behalf of Big Rivers, I ask that your client provide us with your proposed plan to implement the arbitration decision. Kendall Bryan testified that his interpretation of Section 3.8(c), which the Panel seemingly adopted, would necessitate another agreement between the parties to set out the specific terms, conditions, rights and responsibilities of the parties. Please provide us with Henderson's proposal on these matters, including, among other things, the method for determining available Excess Henderson Energy to offer to third parties, Henderson's definition of a "firm" or "bonafide" offer as used by the Panel, the time frame for communicating a firm/bonafide offer to Big Rivers, the time Big Rivers shall have to accept or reject the offer, the arrangements for transmission and NERC tagging, responsibilities of each party in case of changes in the quantity of Excess Henderson Energy after a sale has been made and any other agreement detail Henderson believes to be appropriate.

We look forward to receipt of Henderson's proposal and ask that you provide it by July 13, 2012.

Very truly yours,

[Signature]

C. Scott (Redacted)
April 6, 2011

Mr. Bill Blackburn
Senior Vice President Financial & Energy Services & CFO
Big Rivers Electric Corporation
201 Third Street
Henderson, KY 42419-0024

Dear Bill:

We received your April 5 letter concerning your interpretation of Henderson's contractual rights to schedule and take its Station Two reserved capacity and energy. Big Rivers is well aware of Henderson's position. As clearly noted in my March 18 letter to you, Henderson will hold Big Rivers financially liable for the illegal taking of Henderson's property by its refusal to allow Henderson to schedule and take its Station Two resources.

Sincerely,

[Signature]
Gary Quick
General Manager

cc: Wayne [Redacted]
Dear Gary:

In response to your letter dated March 18, 2011, we absolutely disagree with your statement that Big Rivers is refusing to allow the City of Henderson (the "City") to schedule its Station Two resources. We do not believe that the 1970 Power Sales Contract between Big Rivers and the City, as amended, allows the City to schedule "Excess Henderson Energy" (as that term is defined in the Power Sales Contract).

As you know, Big Rivers and the City are engaged in an arbitration proceeding to resolve the City's claim that the Power Sales Contract permits the City to sell Excess Henderson Energy to third parties without providing Big Rivers with a right of first refusal to purchase that energy at $ per MWh. It is Big Rivers' position that any such sale to a third party would be wrongful and constitute a breach of the Power Sales Contract. Big Rivers has an unqualified first right, pursuant to the Power Sales Contract, to purchase Excess Henderson Energy from the City or the City Utility Commission for $ per MWh (with Big Rivers responsible for other costs as contemplated in the Power Sales Contract), and Big Rivers desires to exercise that right and purchase that energy.

Please note that your letter dated February 10, 2011 did not schedule any energy. Instead, that letter asked Big Rivers to assist the City and The Energy Authority with the creation of financial schedules ("Finscheds") for the Midwest ISO Market Portal. The letter specifically states that the City wants to "begin [a] MISO Finsched process" and asks Big Rivers to "please inform your staff or scheduling agent and let us know their reaction to using the proposed MISO Finsched process." We are not aware of any provision in the Power Sales Contract, or any other contract between Big Rivers and the City, that obligates Big Rivers to advise about or participate in a MISO Finsched process with the City and The Energy Authority. In our letter dated March 17, 2011, we requested that you identify in writing the specific contractual provision(s) that you believe create such an obligation. Your reply letter of March 18, 2011 ignored that request. We ask again that you cite us to the portions of the contract that you believe obligate Big Rivers to participate with the City in its proposed MISO Finsched process.
Finally, I am the person at Big Rivers whom you should contact about any scheduling matters.

Sincerely yours,

C. William Blackburn
Senior Vice President
Financial & Energy Services & CFO
Big Rivers Electric Corporation

cc: Mr. Mark Bailey
March 18, 2011

Mr. Bill Blackburn  
Senior Vice President Financial & Energy Services & CFO  
Big Rivers Electric Corporation  
201 Third Street  
Henderson, KY 42419-0024

Dear Bill:

Thank you for your March 17 letter concerning the scheduling of Henderson’s Station Two reserved capacity and energy. We were surprised and disappointed to learn that Big Rivers is refusing to allow the City to schedule its Station Two resources.

Big Rivers’ position is contrary to the language and Henderson’s rights set forth in the Station Two Contracts. Henderson has the contractual right to schedule and take its reserved capacity and energy and Big Rivers has a contractual duty under the existing provisions of the contracts to comply with the schedules Henderson provides to Big Rivers.

As stated in your letter, Big Rivers has elected to litigate the dispute concerning Excess Henderson Energy not scheduled or taken by City. Clearly, Henderson’s February 10 letter and the subsequent telephone conference on March 9 were not about Henderson’s energy not scheduled or taken by City.

As the owner of Station Two, Henderson is hereby formally instructing Big Rivers to immediately identify an individual or organization Henderson should contact to begin scheduling Henderson’s Station Two resources. Big Rivers’ refusal to allow Henderson to schedule its reserved capacity and energy is a veiled illegal taking of Henderson’s property and, therefore, Henderson is financially damaged and the damages will be ongoing in the future. Please accept this letter as formal notice to Big Rivers of Henderson’s intent to fully recover all of its damages from the date of this notice related to your refusal to allow Henderson to schedule its reserved Station Two resources.

Sincerely,

Gary Quick  
General Manager

cc: Wayne Thompson
March 17, 2011

Mr. Gary Quick
General Manager
Henderson Municipal Power & Light
P. O. Box 8
Henderson, KY 42420

Dear Gary:

I am writing in regard to your letter of February 10, 2011 and March 9, 2011 follow-up telephone conference among representatives of Big Rivers Electric Corporation ("Big Rivers"), Henderson Municipal Power & Light ("HMPL"), and The Energy Authority ("TEA"). As I understand it, the purpose of the February 10 letter and March 9 teleconference was to inform Big Rivers of HMPL's desire for TEA to assist HMPL in selling the energy output associated with HMPL's capacity reservation from Station II into the Midwest ISO market, and to request Big Rivers' consent and cooperation in facilitating those efforts. Your February 10 letter asks that Big Rivers "let [you] know [its] reaction to using the proposed Finsched process."

Big Rivers cannot consent or otherwise agree to the arrangement you have proposed. As you are well aware, Big Rivers and HMPL are currently in arbitration before a AAA panel concerning this very issue - i.e., whether HMPL has the right under the Power Sales Contract, as amended, to market and sell energy associated with its capacity reservation that is in excess of the hour-to-hour needs of the City of Henderson and its inhabitants, without first giving Big Rivers the opportunity to purchase such energy at the contractually-specified price of $ in MWh (with Big Rivers providing fuel and other variable costs). Big Rivers has consistently and vigorously denied that HMPL possesses any such right under the terms of the Power Sales Contract. The primary relief sought by Big Rivers in the pending arbitration is an award declaring that HMPL has no right to sell energy associated with its capacity reservation to third parties without first making that energy available to Big Rivers at $ in MWh, as expressly provided in Section 3.8 of the parties' Power Sales Contract. For Big Rivers to agree to the process you now propose would be tantamount to surrendering the very issue we are currently litigating. Big Rivers cannot agree to that.

Big Rivers has reviewed the Power Sales Contract, and is aware of no provision in that agreement (or any other agreement between Big Rivers and HMPL) that would obligate Big Rivers to assist or consent to the type of arrangement you have proposed. Indeed, any such arrangement would be in direct contravention of the express terms of the Power Sales Contract. If you disagree, I would ask that you please identify, in writing, the contractual provisions that you contend impose such an obligation on Big Rivers.

Sincerely yours,

C. William Blackburn
Senior Vice President
Financial & Energy Services & CFO
Big Rivers Electric Corporation

c/ Mr. Mark Bailey
February 10, 2011

Mr. Mark Bailey  
President & CEO  
Big Rivers Electric Corporation  
201 Third Street  
Henderson, KY 42419-0024

Dear Mark:

I'm sure you recall our prior discussions concerning Henderson's reservation of capacity and energy at Station Two and Henderson's interest in retaining the services of The Energy Authority. We have concluded our preliminary discussions with The Energy Authority and both parties are now ready to move forward.

In an effort to begin the process of The Energy Authority scheduling Henderson's energy from Station Two [CP node BREC.HMP2], we are proposing to use the attached MISO Financial Contract form which was copied from the MISO website Market Portal. We believe the attached form provides the information and terms Big Rivers and Henderson will need in order to create the MISO Financial Schedules [Finscheds] for Henderson.

Based upon our past discussions with The Energy Authority and MISO, we anticipate the communications between Big Rivers, Henderson, The Energy Authority, and Big Rivers' scheduling agent will be conducted by 08:00 EST each day.

To begin the MISO Finsched process, we are requesting that you please inform your staff and scheduling agent and let us know their reaction to using the proposed MISO Finsched process. Also, we need to know the name of the person at Big Rivers or perhaps a representative of your scheduling agent who The Energy Authority will need to contact in order to begin the Finsched process. We understand the MISO Finscheds will not change the current process of Big Rivers reporting to MISO under the carve out status for Henderson.

Please let us know how you want to move forward and in advance, thank you.

Sincerely,

Gary Quick  
General Manager

Good Afternoon:

Thank you for taking the time to visit with us. Please accept this email as formal authorization for The Energy Authority to represent Henderson Municipal Power & Light in discussions with the Midwest ISO and the Big Rivers Electric Corporation regarding MISO membership, market participation, and registration of the Henderson Station Two Generation Facilities.

Please note that I have sent copies of this authorization to representatives of the Midwest ISO and the Big Rivers Electric Corporation.

Thank you, Gary

REF: MISO Registration — Big Rivers  
PSC Case No. 2010-00043

Dear Mark:

Thank you for your September 27 email (copy attached) concerning the pending MISO registration for Big Rivers. Since receiving your September 22 letter (copy attached) concerning the MISO registration a couple of events have taken place. Henderson has held discussions with The Energy Authority (TEA) which is located in Jacksonville, Florida, and this past Monday, Henderson and TEA participated in a conference call with representatives of MISO.

Based upon the statements made by MISO representatives during the conference call, it is Henderson’s understanding that an officer of Big Rivers has certified to MISO that Big Rivers has the authority or right to register all of the capacity and related energy of Henderson Station Two under Big Rivers’ name. Big Rivers has apparently also certified that it has the authority or right to act as the MISO Market Participant for Henderson’s annual reserved capacity and related energy. As the asset owner, Henderson is not aware of any existing verbal or written authorizations that allow Big Rivers to register Henderson Station Two, which apparently included Henderson’s annual reserved capacity and related energy, with MISO. Also, Henderson has not authorized Big Rivers to act as a MISO Market Participant for Henderson. Henderson is not aware of any existing documents between Henderson and Big Rivers that grant Big Rivers the authority to register Station Two with MISO without the written consent from Henderson. As we explained to Big Rivers and MISO, since our first meeting with you on April 12 concerning the possibility of Big Rivers joining MISO, Henderson has considered becoming a Market Participant or retaining a third party to act as our Market Participant. Henderson has also indicated an interest in registering Station Two with MISO since that was one of the options MISO presented to Henderson.
As the owner of Station Two, Henderson does not agree with or approve the Big Rivers proposed MISO registration filing for Station Two and we do not agree with Big Rivers' proposal to act as Market Participant for Henderson's reserved capacity and related energy. We suggest that Big Rivers and MISO correct the proposed Big Rivers' pending registration filing concerning Henderson's Station Two and Big Rivers' proposed market participation to represent Henderson.

Sincerely,

Gary Quick

Subject: RE: BREC Letter

Hello Gary:

You asked in the following e-mail message of September 24, 2010, how Big Rivers submitted the registration request for the Station Two capacity and related energy. Big Rivers, as Market Participant, has submitted to Midwest ISO registration forms for Station Two Unit 1 (153 MW) and Unit 2 (159 MW). The HMP&L load is registered as a part of Big Rivers’ load. This was accomplished on or about September 15, 2010, as required by Midwest ISO to assure integration of Big Rivers into Midwest ISO by December 1, 2010, prior to expiration on December 31, 2010, of Midwest ISO Attachment RR Contingency Reserve service to Big Rivers for all generators operated by it. As I noted in my letter of September 22, 2010, this registration will have no negative impact on Big Rivers’ performance of its contractual obligations under its agreements with the City of Henderson regarding Station Two. Please let me know if we may provide you further information.

Mark

Good Morning Mark:

I plan to respond to your September 22 letter concerning MISO, but after I received your letter I had several questions for MISO. Below is an email from Cheryl and she responded to some of my questions. However, please note her comment below concerning my questions about the registration of Station Two capacity and related energy. Cheryl suggested that I contact you; can you let me know how Big Rivers submitted the registration request for the Station Two capacity and related energy? As we discussed with you and your staff, if HMP&L participates in MISO we will register our annual reserved capacity and related energy. We assume Big Rivers has registered its annual allocated capacity and related energy. We have a meeting today with TEA and I’m sure they will need to have this information as they go forward as HMP&L’s Market Participant.

In advance, thanks for your help. Gary

Hi Gary,

I do have a copy of your referenced May 27th e-mail. As you recall at the time of those April to May discussions, Big Rivers was preparing for a September 1 integration (that was later postponed) and the timeline for Market Participants to register assets located in the Balancing Authority was June 15th, two and one-half months before the initial planned Big Rivers integration. The postponed integration date is now December 1 with the corresponding deadline for Market Participants (new and existing) to register assets falling the same two and one-half months before, or September 15. If you look at the materials Midwest ISO provided and reviewed in our visit to your offices back on April 27th, Slide 27 of those materials contains the registration process and due dates for Market Participant registration materials to be submitted.

In order for a Big Rivers Balancing Authority to join the Midwest ISO market all generation and load must be registered by Market Participants. Each Market Participant submits asset registration forms and becomes financially responsible for the assets it registers. As you recognize in your message below, under the Midwest ISO process the only way assets can be registered is by a Market Participant. On September 15 Midwest ISO only received the registration from an existing Market Participant—namely Big Rivers. Your May 27th e-mail confirmed that you were agreeable to Big Rivers registering the City’s assets. Therefore, we have processed the Big Rivers September 15th Registration accordingly.

As we discussed back in April, the City of Henderson, as an asset owner, can certainly register once you’ve met the requirements of a Market Participant or elect to have a different Market Participant register these assets on your behalf in a future modeling cycle. The timing of the registration needs to be compliant with the attached Midwest ISO model deadlines presentation. These deadlines are also posted on our website. We would be happy to assist you in better understanding that Market Participant and asset registration process if you would like.

With regard to specific questions as to how the capacity and energy was registered you would need to contact Mr. Bailey at Big Rivers.

Sincerely,

Cheryl

Good Morning Cheryl:

On May 27 of this year I sent you an email at 5:10pm concerning Henderson Municipal Power and Light’s intentions in the event Big Rivers Electric Cooperation became a member of MISO. Henderson has also held several meetings with you, MISO staff, and Big Rivers concerning the various options available to Henderson related to how Henderson could participate in MISO. Our position concerning participation in MISO has not changed since our last communication.

Attached is a letter I received this morning from Mr. Bailey at Big Rivers concerning the Henderson Station Two generation units. Henderson needs to know how MISO is planning to register the Henderson units. As stated in the attached letter, Big Rivers informed us this morning that it will act as the Market Participant on behalf of the
City of Henderson, which is not consistent with our position and what we have clearly stated to MISO and Big Rivers.

Before we respond to Big Rivers, we need to know what MISO and Big Rivers have done, if anything, regarding the Henderson Station Two capacity, energy, and Market Participation. As we explained to MISO and Big Rivers, Henderson has always intended to register its annual reserved capacity and the related energy. Furthermore, we also informed MISO and Big Rivers that Henderson was considering two options regarding future Market Participation: first, Henderson would request MISO's approval to become a Market Participant or second, Henderson would retain an existing external Market Participant to represent Henderson.

Please let me know the details of how Big Rivers is requesting to join MISO regarding the registration of Henderson's Station Two units and the Market Participant responsibilities.

In advance, thank you. Gary

September 22, 2010

Mr. Gary Quick
General Manager
Henderson Municipal Power & Light
P. O. Box 8
Henderson, KY 42419-0008

Dear Gary:

As you may know, Big Rivers’ hearing before the Public Service Commission in its case seeking authority to transfer functional control of its transmission system to Midwest Independent Transmission System Operator, Inc. (“Midwest ISO”) concluded September 15, 2010. In order to implement Big Rivers’ scheduled December 1, 2010, integration into the Midwest ISO, Big Rivers submitted Commercial Model data to the Midwest ISO on September 15, 2010, and on September 22, 2010, submitted two required certifications regarding the registration of the Station Two generation asset and the City of Henderson load. Pursuant to those submissions, Big Rivers will act as the Market Participant on behalf of the City of Henderson load and Station Two. This designation will have no impact on Big Rivers’ performance of its contractual obligations under its agreements with the City of Henderson regarding Station Two. Please let me know if you have any questions, or if we can provide you further information.

Sincerely yours,

Mark A. Bailey
President and CEO
Big Rivers Electric Corporation
Hi Cheryl:

Yes, we talked with Mark Bailey yesterday morning at 8:00 am at the Big Rivers Office Building. We informed Mark and his staff that Henderson was agreeable to Big Rivers registering Henderson’s 105 MW (as of June 1) and Big Rivers 207 MW separately rather than merely registering the 312 MW. You will need to visit with Mark, but I did not get the impression the separate registration was a problem for Big Rivers. We also informed Mark and his staff that Henderson was working with TEA to represent Henderson in the near future. Does this provide you with the information you need?

Thanks, Gary
