Reason:

"KUL" is seeking to raise our rates
6.4 %!

We are 73 & 71, retired, living on
social security: which only gives us
an 0.3 % rate increase.

How do you expect us to pay all
our utilities & bills when all
rate increases are higher than
our social security rise in the
cost of living is lower?

Please intervene!

I am having to work part time to
pay bills now! Other seniors can't
even work because of their health
issues.
