Kentucky Public Commission

Ku Electric Company has put in for a raise to be effective July 2017 please don't allow this raise, we already have a good company and the raises in the past never helped us. All it did was raise our electric bill. I am 62 years old and get my disability social security that I have worked for (not a handout) I have copays medicine and other bills that also has to be paid. I don't get any extra money on my check every year. if you could soften your hearts about this I would be so thankful. The weather has not been no factor here we have had a mild mild winter. please help us and turn down this raise it will take money away from our copays at the doctor office and drugs, and groceries etc heat I have no computer I live a simple life I can't afford to live any other way.

Thank you
