Subject: KU rate case #2016-00370

I recommend that the subject rate case be denied as proposed. By raising the base fee for all consumers it will hurt individuals and benefit large consumers. As I see it, the excuse for raising the rates is to procure equipment that will reduce costs, specifically payroll related expenses. These recurring savings are not then offered for consumer benefit, nor for specific ecological benefit by developing alternative energy

resources. Big business will benefit from reduced use rates. There is no guarantee of general public benefit, only that of KU and business interests. As a monopoly operating for the public, KU must offer a sufficient reason for for making basic services cost more.

is an insult to consumers

Subject: KU service fee hikes - Case #2016-00370

Dear Dear Kentucky Public Service Commission:

I and my husband are disabled and on a fixed income. We are in our 60's. We can barely pay our bills as it is. _____(Briefly describe yourself.)

I am very concerned about KU's unfair proposal to double their basic service charge. Our community deserves affordable, clean energy, and we deserve to have control over our energy bills. This increase takes us in the wrong direction.

KU wants to charge us more - and they want to do it by increasing the flat fee we all have to pay no matter how much energy we use, while slightly lowering the rate they charge for energy use. That's not right. It hurts people with low and moderate incomes. And it makes it harder for my family to manage our bills by being careful about how much energy we use.

KU has sent customers misleading information about the new rate structure, indicating that it will save consumers money. But their claims only apply to very high-volume users, and only in months with very high energy use. For my family and many others, their plan will lead to an average increase in my monthly energy bill. I am concerned about the nature of the utilities' public information. And I believe it makes no sense for a rate structure to reward customers who use the most energy.

The proposed charges will discourage people like me from taking steps to make our homes and businesses more energy efficient or use renewable energy. These charges will move Kentucky in the wrong direction and make

things worse for our energy bills, health, local jobs and climate.

The Kentucky Public Service Commission must ensure that KU's rate structure is fair, necessary, and does not hurt low- and moderate-income residents. Please reject these proposals. Insist that these utilities come up with a fair plan that allows us all to breathe easier.

Sincerely,

Judy Combs

Subject: Case #2016-00370

KPSC Public Information Officer:

These rate proposals will hurt many customers, especially low and fixed income people, apartment dwellers and people who attempt to conserve energy. They will limit our ability to save money when we reduce our energy use. They will also discourage people from installing rooftop solar, purchasing energy efficient systems, and taking personal steps as home owners to conserve energy. Conservation is needed to lower harmful pollution and protect our health and climate. In short, these rates are the wrong direction for our community, our commonwealth, and our pocket books. Why in the heck would we want to discourage energy conservation? I thought our utilities were for energy conservation.

Subject: your comments in case number 2016-00370 - Kentucky Utilities rate case
Date: Monday, April 17, 2017 3:09:00 PM

Dear Mr. Schuler:

Thank you for your comments on the application of Kentucky Utilities Co. for an adjustment in rates.

Your comments in the above-referenced matter have been received and will be placed into the case file for the Commission's consideration.

As you noted, the case number in this matter is 2016-00370. It would be helpful if you would please refer to it in any further correspondence.

The application and other documents in this case are available at
http://psc.ky.gov/PSC_WebNet/ViewCaseFilings.aspx?case=2016-00370

Thank you for your interest in this matter.

Andrew Melnykovych

Subject: case #2016-00370

Hello,

I am vehemently opposed to Kentucky Utilities' proposed basic service charge rate change. It is very unfair to low income and low usage customers. It discourages those of us who are careful not to use a lot of power. The more than doubled service charge would be more than a typical total bill for me! It also discourages people from investing in alternative power such as solar.

I think this is a very bad idea. If you want to raise rates, raise it on consumption. Do not raise rates across the board.

Thank you for your consideration.

Dear Public Service Commission,

I am writing to urge you to deny the requests for increases to monthly service fees by Kentucky Utilities and Louisville Gas and Electric Company.

They propose to double their monthly service charges. This hurts poor people the most, because many of them are already struggling to make ends meet. For me, a senior citizen living in a two-person household, and doing everything I can to conserve energy, the result would be an increase in my electric bill. Meanwhile, big companies that use lots of energy, would have a decrease in their bills. This not fair to residents of Kentucky. It provides greater profits to big companies while costing individuals and families more.

Please deny the KU and LG&E requests for increases to monthly service fees.

Sincerely,
Susan Spalding
