

Public Information Officer.

I am opposed to any increase in the base rate for electricity, from 10.75/month to \$22.00/month. The KU case # 2016-00370.

An increase rate is harmful to low & fixed income customers apartment dwellers, and those who attempt to conserve energy. Also, it discourages solar and other energy efficient systems so therefore increases global warming, which has a detrimental effect of the health & safety of us all.

Thank you for considering the unintended consequences.
