To Public Info Officer:

Regarding Case# 2016-00370

I am opposed to the increased rate on electric service (base rate) from \$10.75 to \$22.00/month. This is unfair & harmful for we people on a fixed income - the elderly, the ones of us who are conservative with electrical usage, and those of us with solar or other green energy systems. Our solar system was very expensive and the increased rate just makes it more unlikely that we will ever break even on our investment. Please have consideration for me and people like me.

Yours -
Donna W Coebeler
