Case Number 2017 - 00179

I am writing this letter because I am very concerned with Kentucky Power Company wanting to raise the electric bill

I am a 70 year old widow with a very limited income

I try very hard to save on my electric bill every month

By the time I pay for Health Care, medicine, food and all other utilities there is not enough left for higher electric bill.

I cant understand why they would ask for a raise on the electric bills from people that struggle to get by. When they had a first Quater profit of 12 million dollars

The truth is I cannot afford a raise on my Electric Bill.
