To whom it May Concern, Case # 2017-00179

I'm writing to appose the rate increase for Ky power. I feel the rates are high enough. If they go any higher the people in South-eastern Ky will have to decide if they want to eat, take their medicine or stay warm. Most people have electric heat anymore, but many aren't going to stay warm as they can't afford the price of electricity. Right now we're all still paying for the Big Sandy power plant being removed. To me the electric Co. should shoulder that project. Not the consumer.

Another thing we need work done to the power lines up our way. A lot of the times when our power goes off there will be only a misty rain. I've had a work order for a tree across from my house either way it falls well.

take out a power line + probably either kill  
my full stock Beagle dog, get my work Building,  
my trailer, or my neighbors trailer + pump  
house. Don't know if they were come + checked  
it, As my husband had to have foot Surgery.  
So for these reasons I feel they don't need the  
raise. Rate increase

Please Vote NO on the Case # 2017-00179
