Public Service  
Commission

I want to express my concerns towards the rate hike that is on the table to be installed upon us in the near future. I am deeply opposed to this unwarranted hike. There is already so much crap added to our bills its ridiculous . I read that they needed to raise because there was so many people that didn't have electric to make up for lost revenue!!

Well this is going to put many people I know in the dark!!and even lower revenue for them.

So I say NO!!! to this raise .
