

To, the Public Service : Case Number 2017-00179
211 Sower Blvd
Frankfort Ky. 40601

Kentucky Power Company is proposing a 17% increase to our electric bills, which is already so high that it is almost impossible to pay. We pay for Big Sandy retirement which is ridiculous, just to name some of the other fees we pay. I'm a retired Coal Miner with 43 years working in Coal mines, and now I'm on Social Security which I have difficulty paying my electric bills and now they want to add to it. I'm totally against higher wage increase, which they are proposing. I won't be able to pay my bills if they do. It's already ridiculous. No one else pays these higher electric bills except the people in Perry County, it's a whole lot cheaper anywhere else. I think there nothing but a bunch of Crooks.
