To whom it may concern:

I am writing this letter in response to the 17% increase for our electric bills. I know you have to pay for what you do, but so do we, if we have to pay more we could do it right now but when I quit work which will happen soon it will be harder to pay our bills. I know there are people you help with their heat in the winter but if you do this there will soon be a lot more who need help. There will be some who will have to decide to I buy my medicine or do I chance freezing to death without that extra money it will be hard for some to decide either way. We know a lot of people who will be in this situation. I ask you to look over everything again.

Thank you
