## Why a rate increase for Kentucky Power is wrong

2017-000179

one of the hardest decisions  
a parent could possibly be  
asked to make is whether  
to keep your children fed or  
warm & yet that is exactly  
what AEP is asking parents  
to do!

## Why a rate increase for Kentucky Power is wrong

We cannot afford  
Any more increases.  
Old folks can't  
pay for electric and  
food.

## Why a rate increase for Kentucky Power is wrong

Letcher County is a small,  
poor county - How can its  
citizens pay these power bills  
and have a place to live -  
you will have homeless  
people - more so than we  
see now - How about the  
people in Ohio? Our coal +  
power have kept them open  
now we have to pay more than  
them?

## Why a rate increase for Kentucky Power is wrong

This area has already been hit hard enough with losing jobs. We can not afford another increase. If it increases it will affect other bills as well, other companies will have to raise prices. Groceries Groceries will raise more. Do we really need to choose between feeding our families (mine has 6) or paying our bills.
