RE: Kentucky Power Rate Case 2017-00179

Kentucky Power Company Rate Request – Customers joining AARP Kentucky petition and their comments.

Raise your voice before they raise your rates. Kentucky Power proposes increasing your monthly basic service charge by \$6.50 per month -- from \$11 to \$17.50.

Too many Kentuckians can't afford a rate hike from Kentucky Power (KPC). If the Kentucky Public Service Commission (PSC) gives KPC its requested rate hike, it means you owe \$17.50 before you turn on the lights. **You can help stop this unfair and expensive rate hike by signing the petition.**

Add your voice and send a message telling the Public Service Commission the Kentucky Power rate hike will hurt all electric customers - especially those on fixed incomes.

Angela Ramey

Amy Sizemore
PO BOX 119
Bear Branch, KY 41714-0119

Customer Comment:

As an middle aged, wheelchair bound Kentuckian, I am on a fixed income. Any increases in utilities can literally take food off my table. Especially during the cold winter months! I already have to keep my winter thermostat no higher than 68 degrees, bundle up in several layers. Please reconsider a rate increase, there truly can be hardships for customers such as myself. Thank you Amy Sizemore

RE: Kentucky Power Rate Case 2017-00179

Kentucky Power Company Rate Request – Customers joining AARP Kentucky petition and their comments.

Raise your voice before they raise your rates. Kentucky Power proposes increasing your monthly basic service charge by \$6.50 per month -- from \$11 to \$17.50.

Too many Kentuckians can't afford a rate hike from Kentucky Power (KPC). If the Kentucky Public Service Commission (PSC) gives KPC its requested rate hike, it means you owe \$17.50 before you turn on the lights. **You can help stop this unfair and expensive rate hike by signing the petition.**

Add your voice and send a message telling the Public Service Commission the Kentucky Power rate hike will hurt all electric customers - especially those on fixed incomes.

Clayton Stiltner
2925 Cannonsburg Road
Catlettsburg, KY 41129

Customer Comment:

Have expressed my option to the PSC before! I will say again KY/AEP had an opportunity to not convert the plant in Louisa KY from coal to Natural gas...They took the path of least resistancenot the most cost effective method! Now they expect the general public to pay for their conversion! I say NO....Let them bare the brunt of their inept decisions! I also disagree with them charging customers for a small utility service when it involves a home garage that house family cars 8' from the home! Their reason.."You can only have one meter on a property with a residential address!" KY/AEP dictates what they want when they want!

Sally Summerfield
22029 Country Club Dr
Catlettsburg, KY 41129

Customer Comment:

I have lived in the same house for 25 years. My budget was \$86 per month and now is \$278 per month for the same house with the same number of people (2). Rate increases plus all the fees attached which are a percentage of the bill (between \$50 and \$90 per month) are REDICULOUS!!!! We don't use any more electricity yet our bills are becoming unmanageable

shelby stacy
8660 hwy 550 west
emmalena, KY 41740

Customer Comment:

This is very sad. The elderly and disabled people simply cannot afford any higher hikes in electric bills as a lot of them are already doing without proper groceries now to pay their electric bills. Ask me how I know. I am one of them, although at this time I work every day. What you don't realize is the higher the bill, the higher the taxes and the other sur charges and that adds up to not being reasonable. The electric bill its self isn't as bad as all the riders and taxes that get added on. If you can't put a cap on the cost of electricity for the customer, please don't ask them to pay to retire your power plants. THAT is not our responsibility!!!!

Kentucky Power Company Rate Request – Customers joining AARP Kentucky petition and their comments.

Raise your voice before they raise your rates. Kentucky Power proposes increasing your monthly basic service charge by \$6.50 per month -- from \$11 to \$17.50.

Too many Kentuckians can't afford a rate hike from Kentucky Power (KPC). If the Kentucky Public Service Commission (PSC) gives KPC its requested rate hike, it means you owe \$17.50 before you turn on the lights. **You can help stop this unfair and expensive rate hike by signing the petition.**

Add your voice and send a message telling the Public Service Commission the Kentucky Power rate hike will hurt all electric customers - especially those on fixed incomes.

Wanda Stump
381 Pine Ridge
Harold, KY 41635

Customer Comment:

My husband and I are both retired and on fixed incomes. These rate increases negatively affect our budget and make it difficult for us to meet our monthly bills.

Keith Pray
165 Saint Kitts Ave
Hazard, KY 41701

Customer Comment:

Rates continue to rise, while cost of living increases are put on hold. How is anyone supposed to choose between medication, food or electricity? I am getting ready to retire at the end of this year. Not only will I be bringing home less money, but the benefits have decreased. There is only so much change in one man's pockets.

Clellan Hensley
71 evergreen dr
Hyden, KY 41749

Customer Comment:

The waste is terrible, starting with multiple mailed Billings to the same residential locations, to seeing power trucks with their operators parked up sleeping, or gathered in restaurants shooting the bull. Mismanagement of resources should be top priority, but since they are on a cost plus plan, they don't see the need. Coal fired power plants were shut down to introduce natural gas which was proclaimed cheaper, but what do we get? Raised utility bills! Added on surcharges for retirement of old power plants, that we as customers had to pay to have built, and now they wasn't to charge us to retire these. Bullcrap! Stop these raise hikes, stop this for KY citizens. Hold the companies responsible for trimming waste.

Kelli Neace
65 Hargis Street
Jackson, KY 41339

Customer Comment:

Everything in this area has increased. How can they raise this when so many people are on fixed incomes? The salaries for the executives are ridiculous. Burns me up every time that they are shown on tv or in the newspapers holding up a big check bragging on the big donations they are giving away. If they can give away all this money, then cut the rates and help all the people, not just a select few. Ridiculous!!!! Cut the big salaries. Cut out the donations. Cut the overhead. They need to learn to live like everyone else. Frugally!!!!

Kentucky Power Company Rate Request – Customers joining AARP Kentucky petition and their comments.

Raise your voice before they raise your rates. Kentucky Power proposes increasing your monthly basic service charge by \$6.50 per month -- from \$11 to \$17.50.

Too many Kentuckians can't afford a rate hike from Kentucky Power (KPC). If the Kentucky Public Service Commission (PSC) gives KPC its requested rate hike, it means you owe \$17.50 before you turn on the lights. **You can help stop this unfair and expensive rate hike by signing the petition.**

Add your voice and send a message telling the Public Service Commission the Kentucky Power rate hike will hurt all electric customers - especially those on fixed incomes.

Customer Comment:

Enough is ENOUGH!! We did not ask you to switch to the natural gas.....coal was just fine but you switched & now making all of us hard working people to pay for that switch so your company can see a more profitable investment return!! Enough already. I sit in the dark most nights except for tv being on to keep lower monthly bills. Shame on you. And i am not poor but i can only imagine how poor Louisa people are getting by with high monthly bills not to mention those poor people living in drafty shacks!! Go live in their homes for a month in winter & then come ask for a raise in operating expenses & see what you think then!!! I am fed up!!!!

Customer Comment:

In our subdivision your company is constantly working on the transformer in my yard because my street is always losing power and sometimes it's hours before it goes back on..... and you want to raise rates? Last December your company picked the coldest day to work at putting the underground lines in conduits on my street when the entire earlier part of the month was very warm..... and you want to raise rates? I was without power for 8 hours that very cold December 2016 day! You fried my brand new refrigerator when I complained to your company that my power went on and off 16 times in 6 minutes. Finally they gave us a new transformer.....and you want to raise rates? During a power outage my power would have been on 2 hours sooner but your workers couldn't understand why they saw lights on at my house & everyone else was dark..... finally they knocked on my door

Real Possibilities

only to see I had 2 three arm sconces in each bedroom & room with votive candles (3 candles per sconce).....and you want to raise rates? My particular street in Meadowbrook Subdivision has horrible service from your company and one of your workers lives at the end of my street while another lives on the street behind me & one of your Supervisors lives in my neighborhood!..... and still service sucks..... and you want to raise rates? I can't think how you justify this to people on fixed incomes or to the very poor in our community that can barely afford to eat!!! Enough of wanting a bigger profit for your investors!!! I have had your service for 21 yrs at current address and believe me if there was an option to have another electric company I would change in a heart beat. We never asked you to stop using coal and switch to natural gas. For more than 23 yrs your company knew they had to comply with clean air act & yet everyone griped about having to spend money on scrubbers ever since the 1990's when it would have been cheaper to comply back then! But all electric companies kept raising rates along the way & some waited to the end, the last 3 yrs to comply or not comply while all along duking the public that natural gas was going to be cheaper..... yet our rates keep going up..... and there is no one else to compete with you in our town!! Shame on your greedy company! Go back to using more coal & keep our rates more in line.

John Pannell
651 South Pocahontas st
Louisa, KY 41230

Customer Comment:

I think that raising the rates will be a bad move for the electric company because so many people are out of work and struggling to raise their families some people have to make a choice to purchase their medicine or buy food and the electric company is going to try to put a hardship on a lot of people remember if it want for your customers there would not be a Ky power company We already have to pay for your misuse of retirement funds and you just added them to our bill let someone with common horse sense manage the money and don't spend it if you don't have it don't be so wasteful with the money conserve

Michael Dingus
242 E.Potter Rd.
Neon, KY 41840

Customer Comment:

KY Power said they couldn't afford to put scrubbers on the Big Sandy plant in Louisia, After getting approval to convert it from coal to gas, they paid their sister co., just over the line in W. Va., \$480 million for a plant with scrubbers. In the process, they got approval for a rate hike to de-commission Big Sandy, plus they got to add on for maintenance of Big Sandy. Has the PSC EVER thought of letting KY. Power and their parent AEP dip into the millions they make every year.

RE: Kentucky Power Rate Case 2017-00179

Kentucky Power Company Rate Request – Customers joining AARP Kentucky petition and their comments.

Raise your voice before they raise your rates. Kentucky Power proposes increasing your monthly basic service charge by \$6.50 per month -- from \$11 to \$17.50.

Too many Kentuckians can't afford a rate hike from Kentucky Power (KPC). If the Kentucky Public Service Commission (PSC) gives KPC its requested rate hike, it means you owe \$17.50 before you turn on the lights. **You can help stop this unfair and expensive rate hike by signing the petition.**

Add your voice and send a message telling the Public Service Commission the Kentucky Power rate hike will hurt all electric customers - especially those on fixed incomes.

Barbara Keenan
158 BANK ST
Pikeville, KY 41501-9003

Customer Comment:

Please give serious consideration to the request from Rep. Angie Hatton to schedule a public hearing in Pikeville. There is consideration confusion and conflicting information concerning this requested rate hike and its justification.

Pikeville, KY 41502

Customer Comment:

We are on a fixed income and our pay isn't that great. Raising the electric prices will result in the possible need of help paying for it. Most families are barely getting by as it is and we are no exception.

Sherrie Marrs
659 Weddington Branch Road
Pikeville, KY 41501

Customer Comment:

I have yet to see an electric bill of mine with consistent charges. All the extra fees are unbelievable! We already use alternate infrared heaters to try to keep costs down, so the furnace doesn't run; we layer in clothing; I have an 89 year old and 70 year old on blood thinners and keeping them warm is a job; if the rates increase I am not sure what we will do. Not to mention the hundreds of others who are on limited incomes-power or medicine? power or food?

Earnest Hale
1832 Pigeon Roost Rd
Pilgrim, KY 41250

Customer Comment:

The citizens of eastern KY are already under tremendous pressure on property taxes due to the loss of Coal Severance Moneys. Assessments are decreasing causing Schools compensating tax rates increase significantly and in some cases to double. Most Districts in our area have decided this year to NOT raise taxes on their citizens and opt to reduce costs to balance the books. That will most likely not be an option for next year. Taxes will most likely have to be increased no matter what. You're reading this and thinking, it's only \$6.50 per month, \$78.00 per year... That's not the point I'm attempting to make. If we have School Districts in Eastern KY that are in crisis mode and they have chose not to burden citizens but to cut costs make it work with what we have, with a budget

Real Possibilities

only a fraction of what AEP's is, then why should AEP need more money. Be prudent, be fiscal, make it work!
AEP has people a lot smarter than I am, I have faith they can accomplish the task...

Johnny Fields
6505 Straight Hollow Road
Pinsonfork, KY 41555

Customer Comment:

I am retired on disability. I simply cannot afford to pay any more for my electrical service. For the past few years, my electric bill has been more and more of a problem in the winter months. I already supplement my heat with a wood burning stove. But I am unable to carry firewood up the hill to my house. And there are very few people that sell fire wood and are willing to pack it up the hill to my house. Haven't been able to find anyone willing to do that this year. I simply can not afford higher electric bills.

RE: Kentucky Power Rate Case 2017-00179

Kentucky Power Company Rate Request – Customers joining AARP Kentucky petition and their comments.

Raise your voice before they raise your rates. Kentucky Power proposes increasing your monthly basic service charge by \$6.50 per month -- from \$11 to \$17.50.

Too many Kentuckians can't afford a rate hike from Kentucky Power (KPC). If the Kentucky Public Service Commission (PSC) gives KPC its requested rate hike, it means you owe \$17.50 before you turn on the lights. **You can help stop this unfair and expensive rate hike by signing the petition.**

Add your voice and send a message telling the Public Service Commission the Kentucky Power rate hike will hurt all electric customers - especially those on fixed incomes.

Charles Reichenbach
112 Frank Street
Staffordsville, KY 41256

Customer Comment:

KY Power is already much higher than other electric companies in the area such as Big Sandy RECC. KY Powers bills have MANY add on charges now, such as paying their employees retirement cost. We are being ripped off by KY Power.

Customer Comment:

I oppose this increase because my electric bill has tripled in the last five years, which is both outrageous and unaffordable.

Wanda Brown
2257 Pratt Mountain Road
Viper, KY 41774

Customer Comment:

I am a retired teacher and my fixed retirement is already in jeopardy from Governor Bevin's plan. At minimum, he is going to take my COLAs for the next five years. I cannot afford an increase in my electric bill. My mother also retired as a classified employee of the system and her retirement pension is already ridiculously low. She lives in a remodeled trailer home and in the winter her electric bill is already sometimes \$600 per month. She also cannot afford another hike. Please DO THE RIGHT THING and forget about this rate hike, for goodness sake!!!
