COMMENTS: How does ASP/Ky Power  
Justify a 56% increase over 10 years.

Has anyone on the Commission looked  
at maintenance schedule for substation  
equipment, etc. ~~nothing~~ little to no  
trimming until 2006/07.

Has any one on the Commission ever looked  
at the demographics of eastern N Ky.

Have any one on Commission been to into the  
real eastern Ky. Not hazard of Prestonburg.

A normal electric bill is not 1000 kw  
when one has electric heat, no matter  
how tight the house is.

Seems the more we conserve, the higher rate.

What has Ky Power done to improve management  
skills and employee needs. IE Job Analysis.

Thank You.
